If you are having the same challenging problem, do not worry, Pass4Leader is here to help. Our direct and dependable Using HPE

OneView Exam Questions in three formats will surely help you pass the HP HPE2-T37 Certification Exam. Because this is a defining moment in your career, do not undervalue the importance of our HP HPE2-T37 exam dumps.

A quick Intro to the HP HPE2-T37 Certification Exam

HPE2-T37 Exam is a static web-based certification exam that is also known as Using HPE OneView. This certification exam is authorized by the Hewlett-Packard Company. HPE2-T37 Exam was created in 2014 and is designed to test the skills of the candidates in the areas of hardware and software. Indeed, this certification is one of the most popular IT certifications in the market. Presentation through server-based applications and virtualization are the two major features of the HPE2-T37 exam. **HPE2-T37 Dumps** is a product that is specifically designed to help you prepare for the HPE2-T37 exam.

The boot mode is used to test the candidates' ability to install and configure the HPE OneView Management Suite (HPE1VM). This certification is designed to assess the ability of the candidates to install and configure the HPE OneView Management Suite (HPE1VM) and to design and deploy an HPE environment. Candidates will need to demonstrate their ability to perform configuration, installation, and troubleshooting tasks, and to understand the relationship between the management and provisioning planes of the OneView suite. The arrays that are accessible through the OneView management suite are the servers, switches, storage devices, and network infrastructure. The success rate of the HPE2-T37 Exam is very high.

HP Using HPE OneView Sample Questions (Q103-Q108):

NEW QUESTION # 103

You are implementing an HPE Synergy solution with multiple frames in one management ring. Image Streamer is not a part of this solution. How can an IPv4 address pool defined by the administrator be used in HPE OneView?

- A. to provide static IP addresses for storage systems managed in HPE OneView
- **B. to provide static IP addresses for an operating system running on a Compute Module**
- C. to provide static IP addresses for Logical Interconnects and Logical Enclosures
- D. to provide static IP addresses to ILO and interconnect modules if applicable

Answer: B

NEW QUESTION # 104

You have to move a server profile from a server to the other server. What must be done prior server profile migration?

- A. Source system has to be placed in a maintenance mode.
- B. Source server has to be powered on.
- **C. Target system must be powered off.**
- D. Target server has to be placed in a maintenance mode.

Answer: C

Explanation:

Before moving a server profile to another server in HPE OneView, the target system must be powered off.

This is required to ensure that the profile settings, including firmware, BIOS settings, and connectivity configurations, are applied correctly without any conflicts. Powering off the target server prevents any operational disruptions and ensures a smooth transition of the server profile.

NEW QUESTION # 105

You configured downlink aggregation for one of the HPE Synergy Compute Modules in an environment by placing two connections in the same Link Aggregation Group. After you made the changes to the server profile, its status changed to critical. What can be done to fix this issue?

- **A. The teaming or bonding driver in the server OS must be configured to enable the LACP and to form the LAG correctly.**
- B. Link Aggregation Group functionality should be enabled in advanced properties of the Logical Interconnect.
- C. Ensure that the Link Aggregation Group time-out value matches the server set values.
- D. The server profile for a given HPE Synergy compute module should be reapplied, then the Compute Module should be rebooted.

Answer: A

NEW QUESTION # 106

You need to make sure that server ports connected to this network cannot communicate with each other within the logical interconnect. Click the option within the network definition that will allow you to configure the required parameter.

Answer:

Explanation:

NEW QUESTION # 107

Refer to the exhibit.

What does selecting the "Permanent" option mean?

- A. Deleting the logical JBOD is possible only from the CLI with Administrator privileges.
- **B. The logical JBOD will not be deleted, even when server profile is deleted.**
- C. To remove data from the logical JBOD, the "erase on delete" option must be selected.
- D. Any write operation to the logical JBOD will be immediately written, bypassing the cache.

Answer: B

NEW QUESTION # 108

.....
