The practice tests have been made according to the latest pattern so you can practice in real GitHub Copilot (GH-300) exam environment and improve yourself daily.

Microsoft GH-300 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Domain 6: Testing with GitHub Copilot: This section measures abilities of QA Engineers and Test Automation Specialists to use Copilot for test generation, including unit and integration tests. It explains how Copilot can identify edge cases and assist in writing assertions. The domain also covers different Copilot subscription SKUs, privacy considerations, organizational code suggestion settings, and configuration files related to Copilot.
Topic 2	<ul style="list-style-type: none"> • Domain 4: Prompt Crafting and Prompt Engineering This section measures skills of Software Developers and AI Interaction Designers in effectively crafting prompts to optimize Copilot's output. It reviews foundational concepts such as prompt components, the role of language in prompting, zero-shot vs. few-shot prompting, and how chat history influences responses. Best practices and engineering principles for prompt design and training methods are also covered.
Topic 3	<ul style="list-style-type: none"> • GitHub Copilot Plans and Feature: This domain targets Product Managers and DevOps Engineers and focuses on understanding the various GitHub Copilot subscription plans like Individual, Business, and Enterprise, including distinctions and management features. It covers how Copilot is integrated into IDEs, different triggering methods for code suggestions, organizational policy management, subscription administration via API, and effective use of Copilot Chat and Knowledge Bases. Candidates also learn about CLI usage and configuration.
Topic 4	<ul style="list-style-type: none"> • Developer Use Cases for AI: Targeting Software Engineers and Technical Leads, this domain elaborates on how AI improves developer productivity across common tasks like learning new languages, translation, documentation, debugging, data science, and refactoring. It discusses Copilot's support in software development lifecycle management and highlights its limitations. Use of the productivity API to track Copilot's impact is also included.

Microsoft GitHub Copilot Sample Questions (Q75-Q80):

NEW QUESTION # 75

If you are working on open source projects, GitHub Copilot Individual can be paid:

- A. Based on the payment method in your user profile
- B. N/A - Copilot Individual is a free service for all open source projects
- C. Through an Azure Subscription
- D. Through an invoice or a credit card

Answer: A

Explanation:

"GitHub Copilot Individual subscriptions are billed using the payment method configured in your GitHub user profile." There is no free tier for open source projects, so option A is correct.

References: GitHub Copilot billing documentation.

NEW QUESTION # 76

What is a limitation of content exclusions?

- A. Repository administrators and organization owners cannot manage content exclusion settings.
- B. Content exclusions are only available in the GitHub Copilot Individual plan.
- C. Content exclusions can only be configured by an enterprise administrator.
- D. Content exclusions can be worked around as it is only available for Git repositories.

Answer: D

Explanation:

A limitation is that content exclusions are only available for Git repositories, meaning they can be worked around if content is accessed through other means.

NEW QUESTION # 77

What configuration needs to be set to get help from Microsoft and GitHub protecting against IP infringement while using GitHub Copilot?

- A. You need to check code suggestions yourself before accepting
- B. Enforce blocking of MIT or GPL licensed code
- C. Enable GitHub Copilot license checking
- **D. Suggestions matching public code to 'blocked'**

Answer: D

Explanation:

To help protect against IP infringement, you need to configure GitHub Copilot to block suggestions that match public code. This ensures that the generated code is not directly copied from publicly available sources.

Reference: GitHub Copilot documentation on IP protection and code filtering.

NEW QUESTION # 78

What specific function does the /fix slash command perform?

- A. Converts pseudocode into executable code, optimizing for readability and maintainability.
- B. Initiates a code review with static analysis tools for security and logic errors.
- C. Generates new code snippets based on language syntax and best practices.
- **D. Proposes changes for detected issues, suggesting corrections for syntax errors and programming mistakes.**

Answer: D

Explanation:

"/fix: Propose changes to resolve detected issues, such as syntax errors or common programming mistakes, in the selected code."

This confirms that the /fix command is used to suggest corrections for identified problems.

References: GitHub Copilot Chat command reference.

NEW QUESTION # 79

Why is code reviewing still necessary when using GitHub Copilot to write tests?

- A. Because GitHub Copilot can cover all possible scenarios in your test cases.
- B. Because GitHub Copilot replaces the need for manual testing.
- **C. Because GitHub Copilot's generated test cases may not cover all possible scenarios.**
- D. Because GitHub Copilot generates the best code possible for the test scenario.

Answer: C

Explanation:

Code review is necessary because GitHub Copilot's generated test cases might not cover all possible scenarios, especially edge cases and complex interactions.

Reference: GitHub Copilot testing best practices.

NEW QUESTION # 80

.....
