New FCP_FAZ_AN-7.6 Dumps, FCP_FAZ_AN-7.6 Top Dumps

Our FCP_FAZ_AN-7.6 preparation exam have assembled a team of professional experts incorporating domestic and overseas experts and scholars to research and design related exam bank, committing great efforts to help the candidates to pass the FCP_FAZ_AN-7.6 exam. Most of the experts have been studying in the professional field for many years and have accumulated much experience in our FCP_FAZ_AN-7.6 Practice Questions. Our company is considerably cautious in the selection of talent and always hires employees with store of specialized knowledge and skills to help you get the dreaming FCP_FAZ_AN-7.6 certification.

Fortinet FCP - FortiAnalyzer 7.6 Analyst Sample Questions (Q64-Q69):

NEW QUESTION # 64

Which two FortiAnalyzer features allow you to automatically build a dataset and chart based on a filtered search result? (Choose two.)

- A. Dataset Library
- B. Export to Report Chart (FortiView)
- C. Chart Builder
- D. Custom View

Answer: B,C

NEW QUESTION # 65

You find that as part of your role as an analyst, you frequently search log View using the same parameters. Instead of defining your search filters repeatedly, what can you do to save time?

- A. Configure a custom dashboard.
- **B. Configure a custom view.**
- C. Configure a data selector.
- D. Configure a marco and apply it to device groups.

Answer: B

Explanation:

When you frequently use the same search parameters in FortiAnalyzer's Log View, setting up a reusable filter or view can save considerable time. Here's an analysis of each option:

* Option A - Configure a Custom Dashboard:

* Custom dashboards are useful for displaying a variety of widgets and summaries on network activity, performance, and threat data, but they are not designed for storing specific search filters for log views.

* Conclusion: Incorrect.

* Option B - Configure a Custom View:

* Custom views in FortiAnalyzer allow analysts to save specific search filters and configurations.

By setting up a custom view, you can retain your frequently used search parameters and quickly access them without needing to reapply filters each time. This option is specifically designed to streamline the process of recurring log searches.

* Conclusion: Correct.

* Option C - Configure a Data Selector:

* Data selectors are used to define specific types of data for FortiAnalyzer reports and widgets.

They are useful in reports but are not meant for saving and reusing log search parameters in Log View.

* Conclusion: Incorrect.

* Option D - Configure a Macro and Apply It to Device Groups:

* Macros in FortiAnalyzer are generally used for automation tasks, not for saving log search filters.

Applying macros to device groups does not fulfill the requirement of saving specific log view search parameters.

* Conclusion: Incorrect.

Conclusion:

* Correct Answer: B. Configure a custom view.

* Custom views allow you to save specific search filters, enabling quick access to frequently used parameters in Log View.

FortiAnalyzer 7.4.1 documentation on creating and using custom views for log searches.

NEW QUESTION # 66

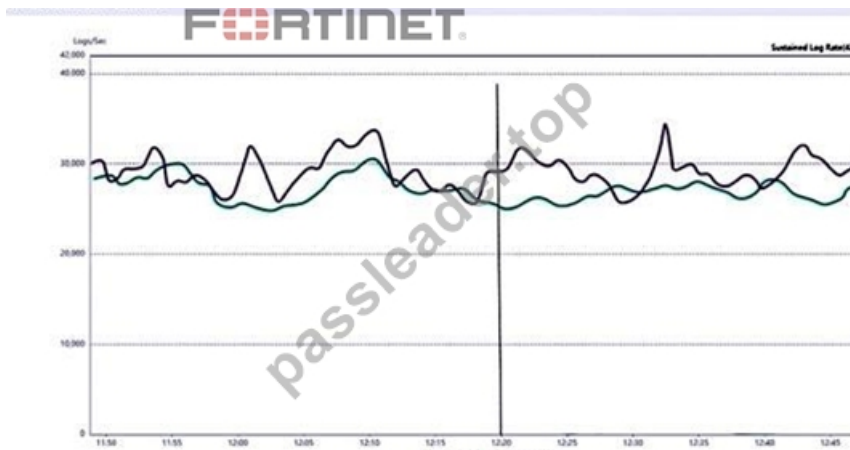

What should you always do after erasing the FortiAnalyzer configuration on flash?

- A. Run the execute reboot command
- **B. Run the execute format disk command**
- C. Run the execute reset all-settings command
- D. Perform a system backup

Answer: B

NEW QUESTION # 67

Refer to the exhibit. What does the data point at 12:20 indicate?

- A. The performance of FortiAnalyzer is below the baseline.
- B. The sqlplugind service is caught up with the logs
- C. The log insert log time is increasing.
- D. FortiAnalyzer is using its cache to avoid dropping logs.

Answer: C

Explanation:

Insert Rate vs. Receive Rate is a graph that shows the rate at which raw logs reach the FortiAnalyzer (receive rate) and the rate at which they are indexed (insert rate) by the SQL database and the sqlplugind daemon. At minimum, the difference between these parameters should be generally consistent.

Log Insert Lag Time shows the amount of time between when a log was received and when it was indexed. Ideally, this parameter should be as small as possible with the occasional spikes according to the network activity being logged. A good baseline should be created to allow for the identification of possible performance issues.

NEW QUESTION # 68

Exhibit. What is the analyst trying to create?

- A. The analyst is trying to create a report in the playbook.
- B. The analyst is trying to create a trigger variable to be used in the playbook.
- C. The analyst is trying to create a SOC report in the playbook.
- D. The analyst is trying to create an output variable to be used in the playbook.

Answer: D

Explanation:

In the exhibit, the playbook configuration shows the analyst working with the "Attach Data" action within a playbook. Here's a breakdown of key aspects:

Incident ID: This field is linked to the "Playbook Starter," which indicates that the playbook will attach data to an existing incident.
Attachment: The analyst is configuring an attachment by selecting Run_REPORT with a placeholder ID for report_uuid. This suggests that the report's UUID will dynamically populate as part of the playbook execution.

Option B - Creating an Output Variable:

The field Attachment with a report_uuid placeholder suggests that the analyst is defining an output variable that will store the report data or ID, allowing it to be attached to the incident. This variable can then be referenced or passed within the playbook for further actions or reporting.

NEW QUESTION # 69

.....

Our FCP_FAZ_AN-7.6 PDF format is also an effective format to do test preparation. In your spare time, you can easily use the FCP_FAZ_AN-7.6 dumps PDF file for study or revision. The PDF file of Fortinet FCP_FAZ_AN-7.6 real questions is convenient and manageable. These Fortinet FCP_FAZ_AN-7.6 Questions are also printable, giving you the option of paper study since some Fortinet FCP_FAZ_AN-7.6 applicants prefer off-screen preparation rather than on a screen.
