Instant MTCNA Access, MTCNA Exam Answers

What's more, part of that Prep4pass MTCNA dumps now are free: https://drive.google.com/open?id=1BBo1PD_n55-3Pvrjr6ECADEalXLEWqow

Our technician will check the update of MTCNA exam questions every day, and we can guarantee that you can get a free update service from the date of purchase. Once you have any questions and doubts about the MTCNA exam questions we will provide you with our customer service before or after the sale, you can contact us if you have question or doubt about our MTCNA Exam Materials and the professional personnel can help you solve your issue about using MTCNA study materials.

MikroTik MTCNA (MikroTik Certified Network Associate) Exam is a certification exam designed for individuals who want to demonstrate their knowledge and skills in network administration using MikroTik RouterOS software. The MTCNA exam covers various topics such as basic networking concepts, router configuration, wireless networking, firewall and security, and advanced routing protocols. Passing the MTCNA exam is a testament to an individual's ability to configure, manage, and troubleshoot MikroTik networks.

MikroTik's MTCNA Certification Exam is an essential certification for network engineers, administrators, and technicians who work with MikroTik routers and switches. MikroTik Certified Network Associate Exam certification program provides a solid foundation for building and managing networks using MikroTik devices. MikroTik Certified Network Associate Exam certification program is an excellent way for network professionals to demonstrate their competence in configuring and managing MikroTik devices.

Exam Questions for MikroTik MTCNA With Money Back Guarantee

Due to the shortage of useful practice materials or being scanty for them, many candidates may choose the bad quality exam materials, but more and more candidates can choose our MTCNA study materials. Actually, some practice materials are shooting the breeze about their effectiveness, but our MTCNA training quiz are real high quality practice materials with passing rate up to 98 to 100 percent. And you will be amazed to find that our MTCNA exam questions are exactly the same ones in the real exam.

MikroTik MTCNA certification program is a valuable certification for network professionals who want to enhance their skills in configuring, managing, and troubleshooting MikroTik networks. MikroTik Certified Network Associate Exam certification program is recognized globally and is highly regarded in the networking industry. The MTCNA Certification is an excellent way for network professionals to demonstrate their competence in managing and troubleshooting MikroTik devices.

MikroTik Certified Network Associate Exam Sample Questions (Q59-Q64):

NEW QUESTION # 59
Which firewall chain should you use to filter ICMP packets from the router itself?

- A. postrouting
- B. input

- C. output
- D. forward

Answer: C

Explanation:
MikroTik RouterOS uses firewall chains to process packets based on direction:
* input: For packets destined to the router itself (from outside)
* output: For packets originating from the router (e.g., router pings)
* forward: For packets passing through the router between interfaces
* postrouting: Used for NAT and marking, not filtering
Therefore:
* To block/allow ICMP (ping) generated by the router (e.g., netwatch, DNS probes), use the output chain
* To block incoming pings to the router, use input
* To block pings between LAN and WAN, use forward
MTCNA Firewall Module - Chain Responsibilities:
"To control traffic originating from the router itself, use the output chain. For example, when the router itself sends ICMP requests."
Rene Meneses Guide - Firewall Chains Explained:
"output is for locally generated traffic. input is for inbound traffic to the router." Terry Combs Notes - Chain Use Cases:
"Ping from router = output. Ping to router = input. Ping between networks = forward."

NEW QUESTION # 60

What flavor of Network Address Translation can be used to have one IP address allow many users to connect to the global Internet?

- A. Dynamic
- B. NAT
- C. Static
- D. PAT

Answer: D

NEW QUESTION # 61

PPPoE server only works within one Ethernet broadcast domain that it is connected to. If there is a router between server and end-user host, it will not be able to create PPPoE tunnel to that PPPoE server.

- A. False
- B. True

Answer: B

Explanation:
PPPoE (Point-to-Point Protocol over Ethernet) relies on Ethernet broadcast and discovery mechanisms. It uses a discovery stage (PPPoE Active Discovery Initiation - PADI) which is sent as a broadcast. Therefore, PPPoE only works within the same Layer 2 broadcast domain.
If a router (Layer 3 device) exists between the client and PPPoE server, it breaks the Layer 2 broadcast domain, making it impossible for the client to reach the server.
* A.#False - Routers break the broadcast domain; PPPoE will fail.
* B.#True - PPPoE requires L2 adjacency.
Extract from Official MTCNA Course Material - PPPoE Concepts:
"PPPoE operates only over Ethernet broadcast domains. If routed, PADI packets will not reach the PPPoE server." Extract from Rene Meneses MTCNA Study Guide - PPPoE:
"PPPoE discovery is broadcast-based and does not traverse routers."
Extract from MikroTik Wiki - PPPoE Limitations:
"PPPoE cannot function over routed networks. Server and client must be in the same broadcast domain."

NEW QUESTION # 62

What is the default protocol/port of (secure) winbox?

- A. UDP/5678
- B. TCP/8291
- C. TCP/8080
- D. TCP/22

Answer: B

NEW QUESTION # 63
How many layers does the Open Systems Interconnection model have?

- A. 0
- B. 1
- C. 2
- D. 3
- E. 4

Answer: E

Explanation:
The OSI (Open Systems Interconnection) model is a conceptual framework that standardizes the functions of a communication system into seven distinct layers. It is used to understand and design computer networking systems.
The seven layers of the OSI model are:
* Application
* Presentation
* Session
* Transport
* Network
* Data Link
* Physical
Each layer has its own specific purpose and interacts with adjacent layers to perform data transmission functions.
MTCNA Official Course Material - OSI Model Chapter:
"The OSI model consists of 7 layers. Understanding these layers is critical for troubleshooting and protocol analysis." Rene Meneses MTCNA Study Guide - OSI Model Section:
"There are exactly seven OSI layers. They range from the Physical Layer (Layer 1) to the Application Layer (Layer 7)." Terry Combs Notes - OSI Summary Page:
"OSI = 7 Layers. The most important ones for network engineers are Layer 1 through Layer 4."
