## 100% Pass Quiz 2026 Perfect Oracle 1Z0-1055-25: Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Latest Exam Papers

Nowadays, we live so busy every day. Especially for some businessmen who want to pass the 1Z0-1055-25 exam and get related certification, time is vital importance for them, they may don't have enough time to prepare for their exam. Some of them may give it up. After so many years' development, our 1Z0-1055-25 exam torrent is absolutely the most excellent than other competitors, the content of it is more complete, the language of it is more simply. Believing in our 1Z0-1055-25 Guide tests will help you get the certificate and embrace a bright future. Time and tide wait for no man. Come to buy our test engine.

### Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Sample Questions (Q50-Q55):

#### NEW QUESTION # 50

In the implementation project you are leading, the customer has a requirement to add new transactional attributes to the Expense Approver Report workflow notification. Which two Business Intelligence catalog objects should you copy (or customize) and edit?

- A. The Output types
- B. The Original Source
- C. The layout template
- D. The Data Model

**Answer: C,D**

Explanation:

Comprehensive and Detailed In-Depth

To incorporate new transactional attributes into the Expense Approver Report workflow notification in Oracle Financials Cloud, you need to customize specific Business Intelligence Publisher (BI Publisher) catalog objects. The two primary objects that require customization are:

The Data Model (Option B):

Purpose: The Data Model defines the data structure and sources for the report. It determines which attributes from the application's data sources are available for inclusion in the report.

Customization Process:

Navigate to the BI Catalog: Shared Folders > Financials > Workflow Notifications > Expenses.

Locate the Expense Approval Data Model.

Use the Customize option to create a copy of the data model in the Custom folder.

Edit the copied data model to include the new transactional attributes required for the notification.

Reference:

The Layout Template (Option A):

Purpose: The Layout Template defines the visual presentation of the notification, including which data fields are displayed and their formatting.

Customization Process:

In the same BI Catalog location, find the Expense Report Approval report.

Use the Customize option to create a copy of the report layout template in the Custom folder.

Download the copied layout template (an .rtf file) and open it using Microsoft Word with the BI Publisher Template Builder add-in.

Insert the new transactional attributes into the template as needed.

Upload the modified template back to the BI Catalog and set it as the default layout.

By customizing both the Data Model and the Layout Template, you ensure that the new transactional attributes are not only retrieved from the data source but also properly displayed in the workflow notification.

Note: Options C (The Original Source) and D (The Output types) are not directly involved in the process of adding new attributes to the workflow notification and therefore are not relevant to this requirement.

### NEW QUESTION # 51

You are trying to use the Match in Full option for a purchase order, but your search for the PO is returning no results.

Which two are the reasons for this?

- A. The match approval level is set to 4-way matching
- B. The Purchase Order is already partially matched to an invoice
- C. The Supplier or Purchase Order is set up for self-billing
- D. The match approval level is set to 3-way matching

**Answer: B,C**

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, the Match in Full feature allows users to create invoices by matching the full amount of a purchase order (PO) efficiently. However, certain conditions can prevent a PO from appearing in the Match in Full search results.

Analysis of Each Option:

A . The match approval level is set to 4-way matching

The match approval level determines the matching requirements between the PO, receipt, inspection, and invoice. A 4-way matching requires that the PO, receipt, accepted quantities from inspection, and invoice quantities all match within defined tolerances before payment approval. This setting, however, does not impact the availability of the PO in the Match in Full search results. Therefore, a 4-way matching configuration is not a reason for the PO not appearing in the search results.

B . The Supplier or Purchase Order is set up for self-billing

Self-billing arrangements mean that the buyer generates the invoice on behalf of the supplier. In such scenarios, the Match in Full feature is not applicable because the invoicing process is handled differently. As per Oracle documentation, "Match in Full can't be used in the following circumstances:... A supplier or the purchase order is set up for self-billing." docs.oracle.com Therefore, if the supplier or PO is configured for self-billing, the PO will not appear in the Match in Full search results.

C . The match approval level is set to 3-way matching

Similar to 4-way matching, a 3-way matching requires that the PO, receipt, and invoice quantities match within tolerances before payment approval. This setting ensures that the goods received and invoiced align with the PO terms. However, the match approval level, whether 3-way or 4-way, does not affect the PO's availability in the Match in Full search results. Thus, a 3-way matching configuration is not a reason for the PO not appearing in the search results.

D . The Purchase Order is already partially matched to an invoice

The Match in Full feature is designed for situations where the supplier sends an invoice for the full amount of the PO. If a PO has already been partially matched to an invoice, it indicates that some portions of the PO have been invoiced, and the remaining amounts do not represent the full PO value. According to Oracle documentation, "Match in Full can't be used in the following circumstances:... The purchase order has already been partially matched to an invoice." docs.oracle.com Therefore, a PO that has been partially matched will not appear in the Match in Full search results.

Conclusion:

The two reasons preventing the purchase order from appearing in the Match in Full search results are:

B . The Supplier or Purchase Order is set up for self-billing

D . The Purchase Order is already partially matched to an invoice

These conditions make the Match in Full feature inapplicable, thereby excluding the PO from the search results.

### NEW QUESTION # 52

Your company will be utilizing the Campaign Management for Early Payment Discount Offers feature to maximize early payment discounts. This feature allows companies to send email-based campaigns offering suppliers the opportunity to enroll in an early payment discounts program. There is a predefined list of response options that suppliers can choose from, and such supplier responses are then automatically processed and applied in the system.

Which two are predefined response options available to suppliers?

- A. Subscribe
- B. Enroll in a Standing Offer
- C. Decline the Offer
- D. Accept All Offers

**Answer: B,C**

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, the Campaign Management for Early Payment Discount Offers feature enables organizations to send email campaigns to suppliers, inviting them to participate in early payment discount programs. Suppliers receiving these offers have predefined response options that are automatically processed by the system.

Predefined Supplier Response Options:

Accept a One-Time Offer:

Suppliers can choose to accept a discount offer for specific invoices that are currently eligible for early payment. This action applies the discount to the selected invoices, and they are processed for early payment accordingly.

Enroll in a Standing Offer:

By selecting this option, suppliers agree to participate in an ongoing early payment discount program. All future invoices that meet the agreed-upon criteria will automatically be eligible for early payment discounts without the need for individual acceptances.

Decline the Offer:

Suppliers may opt to decline the current early payment discount offer. Declining does not prevent them from receiving future offers; it simply indicates that they are not interested in the present offer.

Unsubscribe:

If a supplier chooses to unsubscribe, they will no longer receive email notifications regarding early payment discount offers from the campaign. This action effectively removes them from the current and any future campaigns.

Analysis of the Provided Options:

A . Accept All Offers:

There is no predefined response option that allows suppliers to accept all past and future offers in a single action. Acceptance is either for a specific one-time offer or through enrollment in a standing offer for future invoices.

B . Decline the Offer:

This is a valid predefined response. Suppliers can choose to decline the current offer, indicating they are not interested in the proposed early payment discount for the specified invoices.

C . Subscribe:

While suppliers can unsubscribe from receiving future offers, there isn't a specific "Subscribe" option. Suppliers are considered participants by default and can choose to enroll in standing offers or accept individual offers.

D . Enroll in a Standing Offer:

This is a valid predefined response. Suppliers can enroll in a standing offer, agreeing to early payment discounts on all future eligible invoices automatically.

Conclusion:

The correct predefined response options available to suppliers are B. Decline the Offer and D. Enroll in a Standing Offer. These options provide suppliers with the flexibility to manage their participation in early payment discount programs effectively.
