

ISTQB-CTAL-TA Pruefungssimulationen - ISTQB-CTAL-TA Prüfungsaufgaben

Die ISTQB ISTQB-CTAL-TA Fragenkataloge von Fast2test werden von den IT-Experten konzipiert. Sein Design ist eng mit dem heutigen schnell verändernden IT-Markt verbunden. Die Ausbildung von Fast2test wird Ihnen helfen, mit der erneuerten Technik Ihre Fähigkeit zur Problemlösung zu fördern und Ihre Zufriedenheit am Arbeitsplatz zu verbessern. Die Deckung der ISTQB ISTQB-CTAL-TA Zertifizierung von Fast2test ist um 100% als geplant gestiegen. Solange Sie unsere Prüfungsfragen und Antworten verwenden, garantieren wir Ihnen, dass Sie zum ersten Mal die ISTQB ISTQB-CTAL-TA Prüfung mühelos bestehen können.

Die ISTQB CTAL-TA-Zertifizierung wird von Arbeitgebern weltweit sehr geschätzt, da die fortschrittlichen Fähigkeiten und das Wissen eines Tester im Softwaretest nachweist. Es bietet auch einen Weg für den beruflichen Aufstieg und höhere Gehälter. Wenn Sie Ihre Karriere bei Software-Tests vorantreiben und ein Experte für die Testanalyse werden möchten, ist die CTAL-TA-Zertifizierung von ISTQB die richtige Wahl.

Um für die ISTQB CTAL-TA-Prüfung in Frage zu kommen, müssen die Kandidaten die Zertifizierung der ISTQB Foundation Level abgeschlossen haben und mindestens 18 Monate Testerfahrung haben. Die Zertifizierung gilt für das Leben und es besteht keine Notwendigkeit einer Neuzertifizierung.

Kostenlose gültige Prüfung ISTQB ISTQB-CTAL-TA Sammlung - Examcollection

Mit Fast2test können Sie sich nicht nur wertvolle Zeit ersparen, sondern auch sich ganz beruhigt auf die Prüfung vorbereiten und sie erfolgreich bestehen. Fast2test hat eine gute Zuverlässigkeit und ein hohes Ansehen in der IT-Branche. Sie können kostenlos einen Teil der von Fast2test gebotene ISTQB ISTQB-CTAL-TA Prüfungsfragen und Antworten als Probe herunterladen, um die Zuverlässigkeit unserer Produkte zu testen. Sie werden sicher mit unserem Produkten sehr zufrieden sein. Ich habe Vertrauen in unsere Produkte und glaube, dass die von Fast2test bietenden Prüfungsfragen und Antworten zu ISTQB ISTQB-CTAL-TA Zertifizierung bald Ihre beste Wahl sein würden. Und sie würden sicher die ISTQB-CTAL-TA Zertifizierungsprüfung erfolgreich abschließen. Es ist ratsam, Fast2test zu wählen. Fast2test würde Ihnen die zufriedenen Produkte bieten.

ISTQB (ISTQB CTAL-TA) ISTQB Certified Tester Advanced Level - Test Analyst (Syllabus 2012) ISTQB-CTAL-TA Prüfungsfragen mit Lösungen (Q79-Q84):

79. Frage

You are testing an enhanced user interface for a mortgage approval program involving multiple user roles. Which test technique would be MOST suitable for this next stage of testing?

SELECT ONE OPTION

- A. Pairwise
- B. Exploratory testing
- C. Boundary Value Analysis
- **D. Use Case testing**

Antwort: D

Begründung:

Comprehensive and Detailed in Depth Explanation:

Since the testing involves verifying the user interface (UI) enhancements and ensuring that they meet the needs of multiple user roles, Use Case Testing is the most appropriate technique.

* Use Case testing allows you to validate end-to-end user scenarios and ensure the system behaves correctly for each role, focusing on user interactions and usability.

* Exploratory testing (A) might be useful for finding unexpected issues, but it lacks the structured approach needed for role-based UI validation.

* Boundary Value Analysis (B) is useful for testing numeric input limits, not UI roles.

* Pairwise testing (D) focuses on combinatorial testing, not role-based UI testing.

The correct answer is C (Use Case testing).

80. Frage

An airline provides self-service check-in kiosks for its passengers. The user is asked to present the passport for reading, enter the flight booking number, the seats requested, the number of bags to check-in, and acknowledge that security requirements have been met. The machine then prints the boarding passes.

The following use case has been created:

USE CASE: SELF-SERVICE CHECK-IN

* Use case ID: UC23

* Purpose: Passenger checks-in using the self-service kiosk application.

* Actors: Passenger, System

* Pre-conditions: User selects to start self-service check-in at the kiosk and the system asks the user to place the passport on the reader.

STEP	ACTOR Action	STEP	SYSTEM action
1	Passenger places Passport on reader	2	System verifies the passport. If passport read successfully, asks Passenger to enter Flight booking number
		E1	Passport not recognized. Try again.
		E2	Three failed passport reading attempts. Passenger referred to check-in desk.
3	Passenger retrieves passport and enters Flight booking number	4	System verifies flight booking number, retrieves and displays seating plan
		E3	Flight booking number not recognized. Passenger prompted to try again.
5	Passenger selects seats	6	System verifies seat requests and displays checked bags screen
		E4	Seat requests invalid. Passenger prompted to try again.
7	Passenger enters number of checked bags	8	System verifies checked bag entries and displays security screen
		E5	Check-in bags number invalid. Passenger prompted to try again.
9	Passenger confirms security requirements met	10	System prints boarding passes
		E6	Security requirements not acknowledged. Passenger prompted to read and confirm.
		E7	Unable to print boarding passes. Passenger referred to check-in desk.
11	Passenger clicks Finish and collects boarding passes		↓

You are to apply the Use Case test technique, where the following coverage rules have been defined in the test plan:

* One test case should be designed for the basic behavior.

* One test case should be designed for each alternate and error-handling behavior.

Applying these rules to the Self-Service Check-In Use Case, how many test cases should be designed?

SELECT ONE OPTION:

- A. 0
- B. 1
- C. 2
- D. 3

Antwort: C

Begründung:

Comprehensive and Detailed In-Depth Explanation:

The use case has one basic behavior (happy path) where all steps are completed without any errors.

In addition, there are 7 error-handling cases (E1 to E7) that each require a separate test case to verify that the system correctly handles each error condition.

Therefore, the total number of test cases required is:

* 1 basic behavior test case

* 7 error-handling test cases

$1+7=8$

Hence, the correct answer is B (8).

81. Frage

Which statement BEST describes the activities performed by the Test Analyst during the TEST ANALYSIS stage of the test process?

SELECT ONE OPTION

- A. Ensuring that multiple product risks are covered by one test condition to reduce maintenance overheads
- B. Defining the start and completion dates for the test analysis stage
- C. Producing high-level test cases and defining the supporting test data
- D. Applying test techniques to reduce the likelihood of omitting important test conditions

Antwort: D

Begründung:

Comprehensive and Detailed in Depth Explanation:

According to the ISTQB CTAL-TTA syllabus, the Test Analysis stage involves identifying test conditions based on test basis documentation, requirements, and risk analysis. The primary focus is on analyzing the test basis to identify what needs to be tested. Applying test techniques during this stage helps reduce the risk of missing important test conditions. Therefore, Option A correctly states that test techniques are applied to minimize the risk of omitting important conditions.

Option B is incorrect because combining multiple product risks into one test condition can lead to overlooking specific risks, which contradicts the goal of thorough test analysis.

Option C is incorrect as defining dates is part of planning, not analysis.

Option D is incorrect because producing high-level test cases and defining data are tasks related to test design, which follows test analysis.

This detailed breakdown aligns with the ISTQB syllabus, emphasizing that test analysis primarily deals with identifying test conditions through the application of test techniques.

82. Frage

You are testing a hospital patient management system. New or amended patient data is captured by hospital administrators using an in-house patient capture application and transmitted to one or more hospital departments depending on the nature of the medical condition. Each department operates its own software package.

A new release has been scheduled which includes an improved user interface to the patient capture application as well as changes to the patient data to meet new regulatory requirements.

You are the test analyst for this release, working alongside a Technical Test Analyst. Which of the following requirements MOST align to your responsibilities to test as a Test Analyst?

- * R01: New and amended patient data can be successfully read and processed by receiving hospital department systems
 - * R02: Patient data will be transmitted and received by hospital department systems within ten seconds of entry
 - * R03: Patient data transmitted to other hospital department systems will remain secure and cannot be accessed by unauthorized third parties
 - * R04: High volumes of data can be successfully received and processed while the user interface is being used
 - * R05: The new user interface is appropriate for the needs of all hospital administrator roles
- SELECT ONE OPTION:

- A. R02, R03
- B. R03, R04
- C. R01, R02
- D. R01, R05

Antwort: D

Begründung:

Comprehensive and Detailed In-Depth Explanation:

* R01: Verifying that new and amended patient data can be successfully processed falls within the test analyst's responsibility, focusing on functional accuracy.

* R05: Ensuring the user interface meets the needs of administrators is a usability testing task, which also falls within the Test Analyst's role.

* R02 and R03: These are more related to performance and security testing, typically handled by a Technical Test Analyst.

* R04: High-volume processing and performance are the domain of the Technical Test Analyst.

Therefore, the correct answer is A (R01, R05).

83. Frage

Sell-It-Cheap salesrooms organize general and specialist sales where items are sold to the highest bidder.

There is a sliding scale of commission charges, based on the price of items sold, with lower-priced items attracting a higher percentage. All items sold have a price in multiples of £1.

New commission bandings after customer feedback:

- * Items sold for £150 or less attract a flat-rate fee of £7.00
- * Items otherwise sold for less than £500 have a fee of 6%
- * Items otherwise sold for less than £1000 have a 4.5% fee
- * Items otherwise sold for less than £5000 have a 3.5% fee
- * Items sold for £5000 or more have a 3% fee
- * Updated rule: Items sold between £500 and £749 have a fee of 5.5%

What tests would be appropriate to test this change in commission bandings, using the 2-point boundary value analysis technique?
SELECT ONE OPTION:

- A. No additional tests required; existing BVA tests can be used
- B. £500, £749, £999, £1000
- **C. £499, £500, £749, £750, £999, £1000**
- D. £748, £749, £750, £751

Antwort: C

Begründung:

Comprehensive and Detailed In-Depth Explanation:

- * Boundary Value Analysis (BVA) focuses on testing at the edges of the input range.
- * The critical boundaries are around the new commission banding change (from £500 to £749).
- * To fully test this change, BVA should include:
- * Lower boundary: £499, £500
- * Transition points: £749, £750
- * Upper boundary: £999, £1000

Therefore, the correct answer is D (£499, £500, £749, £750, £999, £1000).

84. Frage

.....

Die Fragenkataloge zur ISTQB ISTQB-CTAL-TA Zertifizierungsprüfung von Fast2test können den Kandidaten helfen, viel Zeit und Energie zu sparen. Auf diese Weise können Sie beim Bestehen der ISTQB ISTQB-CTAL-TA Zertifizierungsprüfung bessere Resultate mit wenigerem Einsatz erzielen. Nachdem Sie unsere Prüfungsfragen und Antworten gekauft haben, werden wir Ihnen einjähriger Aktualisierung umsonst anbieten. Wir versprechen Ihnen, dass wir Ihnen eine volle Rückerstattung bedingungslos geben werden, entweder die gekauften Prüfungsmaterialien Qualitätsproblem haben, oder Sie die ISTQB ISTQB-CTAL-TA Zertifizierungsprüfung nicht bestehen.
