It includes managing user accounts, roles, and profiles efficiently. A critical skill evaluated is maintaining accurate user records to support security and compliance efforts.</li> </ul>

## SAP Certified Associate - Security Administrator Sample Questions (Q75-Q80):

### NEW QUESTION # 75

What must you do if you want to enforce an additional authorization check when a user starts an SAP transaction?

- A. Assign the authorization object to be checked to the chosen transaction code in the SAP Default authorization data using transaction SU22 and set Check Indicator to "Check".
- B. Assign the authorization object and permissions to the chosen transaction code using transaction SE93.
- C. Assign authorization object S\_START to the chosen transaction code with transaction SU24 and specify the Program ID and Object Type.
- D. Assign the authorization object to be checked to the chosen transaction code with transaction SU24 and set Default Status to "Yes".

**Answer: C**

### NEW QUESTION # 76

In the SAP BTP Cockpit, at which level is Trust Configuration available? Note: There are 2 correct answers to this question.

- A. Global Account
- B. Subaccount
- C. Organization
- D. Directory

**Answer: A,B**

Explanation:

In the SAP Business Technology Platform (BTP) Cockpit, Trust Configuration is available at both the Global Account and Subaccount levels. At the Global Account level, trust configurations define the identity provider (IdP) settings that apply across all subaccounts within the account, enabling centralized management of authentication for the entire BTP environment. This allows administrators to establish a default IdP or configure custom IdPs for consistent user authentication. At the Subaccount level, trust configurations provide flexibility to override or customize the IdP settings specific to individual subaccounts, accommodating unique requirements for different applications or services. This dual-level approach ensures that organizations can balance global standardization with localized control. The Directory and Organization levels are not used for trust configurations in SAP BTP, as these are not part of the platform's security configuration hierarchy, making options C and D incorrect.

### NEW QUESTION # 77

Which levels of security protection are provided by Secure Network Communication (SNC)? Note: There are 3 correct answers to this question.

- A. Availability
- B. Authorization
- C. Integrity
- D. Privacy
- E. Authentication

**Answer: C,D,E**

#### NEW QUESTION # 78

Where can you find information on the SAP-delivered default authorization object and value assignments? Note: There are 2 correct answers to this question.

- A. SU24
- B. USOBT
- C. USOBT\_C
- D. SU22

**Answer: B,D**

#### NEW QUESTION # 79

What must you do if you want to enforce an additional authorization check when a user starts an SAP transaction?

- A. Assign the authorization object to be checked to the chosen transaction code in the SAP
- B. Assign the authorization object and permissions to the chosen transaction code using transaction SE93.
- C. Assign authorization object S\_START to the chosen transaction code with transaction SU24 and specify the Program ID and Object Type.
- D. Assign the authorization object to be checked to the chosen transaction code with transaction SU24 and set Default Status to "Yes".

**Answer: C**

#### NEW QUESTION # 80

.....
