NEW QUESTION # 88

What is one responsibility of a Scrum Master/Team Coach?

- A. Improving flow
- B. Testing the system
- C. Demoing the system
- D. Prioritizing the backlog

Answer: A

Explanation:

One of the responsibilities of a Scrum Master/Team Coach is to help the team achieve flow, which is a state of continuous and sustainable delivery of value. They do this by teaching and coaching the team on SAFe Scrum and SAFe Team Kanban practices, such as limiting work in progress, visualizing work, managing queues, and reducing batch sizes. They also help identify and eliminate impediments and bottlenecks that hinder the team's progress and performance.

NEW QUESTION # 89

Team A has decided to use the IP Iteration to continue the finalizing Feature delivery work they have been working on for the past two IP Iterations. What is one effect Team A might experience by continuing to stay heads-down rather than using the IP Iteration as intended?

- A. They could lose an opportunity to manage risks and communication within the ART
- B. They could lose an opportunity to consider new approaches to Solution delivery
- C. They could lose an opportunity to build relationships across the teams
- D. They could lose an opportunity to collaborate with other developers and understand dependencies

Answer: B

Explanation:

The Innovation and Planning (IP) Iteration is designed to give teams space for innovation, exploration, learning, and improvement,

not for continuing regular feature work. When a team misuses the IP Iteration to "catch up" on delivery, it misses the opportunity to experiment, innovate, and explore new ways to deliver solutions more effectively.

This reduces the long-term adaptability and creativity of the team, limiting their ability to introduce process or technical improvements that could increase efficiency in future PIs. The IP Iteration is also a time for the Inspect and Adapt event and PI Planning, both of which are critical to continuous improvement.

From SAFe guidance:

"The IP Iteration provides dedicated time for innovation and planning. Using it for normal work diminishes opportunities to innovate, learn, and explore new approaches." Therefore, the correct answer is D. They could lose an opportunity to consider new approaches to Solution delivery.

NEW QUESTION # 90

Building Enterprise-Class Software and cyber-physical systems are one of the most complex challenges our industry faces today.

- A. False
- B. True

Answer: B

NEW QUESTION # 91

What are two reasons the 5 Whys technique is effective? (Choose two.)

- A. It explores the cause and effect relationship underlying a particular problem
- B. It reveals the nature of the problem through repeating "why" five times
- C. It allows problems of a similar nature to be combined into groups
- D. It allows for assumptions and logic traps
- E. It is an effective way for the team to collaborate

Answer: A,B

NEW QUESTION # 92
