VCEPrep exam dumps are written by IT elite who have more than ten years experience, through research and practice. VCEPrep provides you with the latest and the most accurate questions and answers. VCEPrep exists for your success. To choose VCEPrep is to choose your success. If you want to pass Salesforce Plat-Con-201 Certification Exam, VCEPrep is your unique choice.

## Salesforce Certified Omnistudio Consultant Sample Questions (Q84-Q89):

### NEW QUESTION # 84

A business wants to create a reusable OmniScript to capture customer payment information during the order process. The business decides that the first step of the payment process should include:

- \* Payment type (credit card or bank account)
- \* Payment amount

Which two elements should the consultant recommend for this step of the process?

Choose 2 answers

- A. Radio
- B. Currency
- C. Multi-select
- D. Number

**Answer: A,B**

Explanation:

The two elements that the consultant should recommend for this step of the process are: Radio and Currency.

A Radio element can display a list of options for the user to choose from, such as payment type. A Radio element allows only one option to be selected at a time, and can also have icons for each option. A Currency element can display a field for the user to enter a currency value, such as payment amount. A Currency element can also have validation and formatting options, such as minimum and maximum values, decimal places, etc

#### **NEW QUESTION # 85**

A company implements an integration procedure that is invoked from an OmniScript. The integration procedure includes a recommend to improve performance and address users concerns Which feature should the consultant recommend to improve performance and address users concerns?

- **A. Chaining**
- B. Conditions
- C. Batch jobs
- D. Try Catch

**Answer: A**

Explanation:

The two actions that the consultant should recommend to the project team are replace existing APEX using DataRaptors and HTTPActions, and implement FlexCards and OmniScripts for the front-end. Replacing existing APEX using DataRaptors and HTTPActions would reduce implementation time, as these tools are declarative and do not require coding. Implementing FlexCards and OmniScripts for the front-end would ensure end-user processes are as simple as possible, as these tools provide guided interactions and contextual data. Creating new LWC templates for branding and styling would increase implementation time, as this would require coding and testing. Using existing APEX classes as data sources would not ensure optimal UX, as this would limit the flexibility and scalability of the solution.

#### **NEW QUESTION # 86**

A company is beginning their first project using Calculation Procedures & Matrices. The developers on the tea are concerned about learning the new tool and how they will test their calculation procedures. The consultant recommends that they use the built-in simulator.

In this scenario, what benefit should the consultant highlight to the developer team?

- A. It verifies data types in the algebraic calculations of the calculation procedure.
- **B. It generates sample input and output JSON that can be easily used to build DataRaptors.**
- C. It aggregates data elements that have been calculated separately.
- D. It allows developers to create what-if calculations.

**Answer: B**

#### **NEW QUESTION # 87**

A consultant is working on a project that requires the use of Omnistudio tools to automate complex business processes. The consultant is considering using Decision Matrices and Expression Sets.

What is the primary benefit of using Decision Matrices and Expression Sets in Omnistudio?

- A. They facilitate the creation of custom objects.
- B. They enable the creation of custom code.
- C. They allow for the creation of custom fields.
- **D. They allow for calculations on matrix lookups and variables.**

**Answer: D**

Explanation:

\* Decision Matrices and Expression Sets are used to perform calculations, apply conditional logic, and evaluate business rules in OmniStudio.

- \* The primary benefit (A) is that they enable calculations on matrix lookups and variables.
  - \* Decision Matrices allow for defining complex rules based on multiple conditions (e.g., determining discount percentages based on customer type).
  - \* Expression Sets allow for calculations and formulas to process data dynamically.
  - \* B. Facilitate the creation of custom objects - Decision Matrices and Expression Sets do not create Salesforce objects; they only manipulate and evaluate data.
  - \* C. Allow for the creation of custom fields - Custom fields are created at the Salesforce object level, not via Decision Matrices or Expression Sets.
  - \* D. Enable the creation of custom code - OmniStudio is a low-code/no-code platform, meaning these tools are designed to replace the need for custom Apex or JavaScript.
- Comprehensive and Detailed In-Depth Explanation: Why not the other options?? Salesforce OmniStudio Reference:
- \* Decision Matrices Overview
  - \* Expression Sets in Calculation Procedures

### NEW QUESTION # 88

When designing OmniStudio solutions, what are two reasons that explain why Integration Procedures are recommended as the first choice of data sources for FlexCards and OmniScripts?

Choose 2 answers

- A. They can retrieve Salesforce data from multiple objects faster.
- B. They future-proof your front-end design.
- C. They combine multiple actions into a single server call.
- D. They enable better usability in digital interactions.

**Answer: B,C**

Explanation:

The two reasons that explain why Integration Procedures are recommended as the first choice of data sources for FlexCards and OmniScripts are: they future-proof your front-end design and they combine multiple actions into a single server call. An Integration Procedure can abstract the data source from the front-end design, making it easier to change or update the data source without affecting the FlexCard or OmniScript. An Integration Procedure can also execute multiple DataRaptor actions, such as Extract, Transform, and Load, and also invoke REST or SOAP services in one call, reducing the number of requests and processing time.

### NEW QUESTION # 89

.....

The team of experts hired by Plat-Con-201 exam torrent constantly updates and supplements the contents of our study materials according to the latest syllabus and the latest industry research results, and compiles the latest simulation exam question based on the research results of examination trends. We also have dedicated staffs to maintain updating Plat-Con-201 practice test every day, and you can be sure that compared to other test materials on the market, Plat-Con-201 quiz guide is the most advanced.
