satisfied without doubt.

## **IIBA Entry Certificate in Business Analysis (ECBA) Sample Questions (Q62-Q67):**

### **NEW QUESTION # 62**

What is the purpose of comparing the results collected through elicitation activities?

- **A. Confirm that the information is consistent and accurately represented**
- B. Validate sufficient information was collected
- C. Classify and organize the results
- D. Ensure that information produced is recorded for later reference use

**Answer: A**

Explanation:

After elicitation activities are performed, the purpose of comparing the results is to ensure consistency and accuracy across information gathered from various stakeholders or techniques. This comparison helps in identifying discrepancies, resolving conflicting inputs, and validating that stakeholder perspectives are properly reflected.

BABOK Reference - Task: Confirm Elicitation Results (Section 4.3):

"The purpose of Confirm Elicitation Results is to check the information gathered during elicitation for accuracy and consistency with other information."

### **NEW QUESTION # 63**

One element of the task plan business analysis information management is:

- A. change control process.
- **B. level of abstraction.**
- C. decision making authority.
- D. complexity and risk.

**Answer: B**

Explanation:

The level of abstraction is one of the key elements in the task of planning business analysis information management. It refers to the degree of detail or generality at which the business analysis information is captured and managed. Deciding on the appropriate level of abstraction is crucial as it affects how information is understood, communicated, and used by stakeholders.

References: This element is part of the guidance provided for business analysis planning and monitoring, which includes organizing business analysis information and planning for requirement reuse, storage, and access, as well as requirements attributes1.

### **NEW QUESTION # 64**

Which of the following is an activity that a business analyst (BA) performs to prepare for elicitation?

- **A. Secure supporting material**
- B. Analyze performance measures
- C. Trace requirements
- D. Assess risk

**Answer: A**

Explanation:

Explanation/Reference:

### **NEW QUESTION # 65**

What technique is used to elicit business analysis information, including contextual understanding and requirements, by examining available materials that describe either the business environment or existing organizational assets?

- A. Organizational modeling
- B. Data flow diagrams
- **C. Document analysis**
- D. Functional decomposition

**Answer: C**

Explanation:

It is a research technique that is used to elicit business analysis information with contextual understanding and requirements.

#### NEW QUESTION # 66

In which task would the business analyst (BA) engage the stakeholders to help them support change?

- A. Plan change strategy
- B. Plan business analysis approach
- **C. Manage stakeholder collaboration**
- D. Conduct elicitation

**Answer: C**

Explanation:

The task "Manage Stakeholder Collaboration" includes activities where the BA engages stakeholders to gain support for changes, build consensus, and ensure effective communication. This is crucial for enabling change adoption and ensuring that stakeholders remain committed and involved.

BABOK Reference - Task: Manage Stakeholder Collaboration (Section 4.5):

"This task includes working to ensure stakeholders are working towards a common goal and are supportive of the change."
