CSI CSC2 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Portfolio Analysis: This section of the exam measures the skills of a Portfolio Manager and covers portfolio management approaches including risk and return measurement, portfolio optimization strategies, management styles, and the complete portfolio management process from objective setting to performance evaluation and rebalancing.
Topic 2	<ul style="list-style-type: none"> The Corporation: This section of the exam measures the skills of a Corporate Finance Analyst and covers corporate structures, financial statements, disclosure requirements, investor rights, financing methods, capital raising processes, prospectus requirements, securities distribution, and exchange listing procedures for corporations.
Topic 3	<ul style="list-style-type: none"> The Canadian Investment Marketplace: This section of the exam measures the skills of a Securities Industry Professional and covers the structure and operation of Canada's investment marketplace. It includes the roles of investment dealers and financial intermediaries, capital market functions, financial instruments, and the complete Canadian regulatory environment with its regulatory bodies, principles of regulation, client remediation options, and ethical standards for financial services professionals.
Topic 4	<ul style="list-style-type: none"> Investment Analysis: This section of the exam measures the skills of a Research Analyst and covers both fundamental and technical analysis methods, including macroeconomic, industry and company analysis techniques, financial statement interpretation, ratio analysis, and security valuation approaches.
Topic 5	<ul style="list-style-type: none"> The Economy: This section of the exam measures the skills of an Economic Analyst and covers fundamental economic concepts including microeconomics and macroeconomics, economic growth measurement, business cycles, labor markets, interest rates, inflation, international trade, and both fiscal and monetary policy with emphasis on the Bank of Canada's role and government policy challenges.
Topic 6	<ul style="list-style-type: none"> Additional Topics: This section of the exam measures the skills of a Wealth Management Professional and covers Canadian taxation systems, tax-advantaged accounts, fee-based account structures, retail client financial planning and estate planning, institutional client management, and ethical standards for financial advisors serving both individual and institutional clients.

CSI Canadian Securities Course Exam2 Sample Questions (Q22-Q27):

NEW QUESTION # 22

What action must an investment advisor take when submitting a trade ticket for a short sale?

- A. Mark the sell-order ticket as a short sale
- B. Verify the client can borrow the shares.
- C. Obtain minimum margin amount from client
- D. Mark it as a margin order

Answer: A

Explanation:

When submitting a trade ticket for a short sale, an investment advisor must mark the sell-order ticket as a short sale. This ensures compliance with regulatory requirements and informs the broker and exchange that the sale involves borrowed shares. Marking the order appropriately helps maintain transparency and enables monitoring for potential market manipulation.

* A. Verify the client can borrow the shares: The responsibility for ensuring share availability lies with the broker, not the advisor.

* C. Obtain minimum margin amount from client: This is done separately as part of the account setup and transaction process, not when submitting the trade ticket.

* D. Mark it as a margin order: Short sales involve margin, but the ticket must specifically indicate "short sale" rather than just "margin." Reference:CSC Volume 1, Chapter 9, "Short Selling - Trade Requirements" details the process and importance of marking short-sale tickets.

NEW QUESTION # 23

A shareholder receive rights from a company through direct ownership in shares. Not expecting to exercise them, she sells the right

on the relevant exchange. What is her capital gain?

- A. The sale price of the rights.
- B. The current share price less the exercise price of the rights.
- C. The sales price less the exercise price of the rights.
- D. The current price of the shares less the sale price of the rights.

Answer: A

Explanation:

When a shareholder sells rights on the exchange, the proceeds of the sale represent the capital gain. Rights provide shareholders with the opportunity to purchase additional shares of a company at a discounted price. If a shareholder chooses not to exercise these rights and instead sells them on the secondary market, the value they receive from the sale constitutes their capital gain.

* Rights Offering:

* A rights offering allows existing shareholders to purchase additional shares at a set price (exercise price) within a specific period.

* Shareholders can either exercise these rights or sell them on the market.

* Capital Gain Calculation:

* The capital gain from selling the rights equals the sale price. This is because the rights themselves were issued at no cost to the shareholder.

* The exercise price is irrelevant to the calculation as the rights were not exercised.

* Tax Implications:

* The gain from the sale of rights is treated as a capital gain for tax purposes. Only 50% of the capital gain is taxable under Canadian taxation rules.

* Since the shareholder did not exercise the rights but sold them, the capital gain is the sale price of the rights. Subtracting the exercise price or using the share price is unnecessary and incorrect for this scenario.

Key Concepts: Why Option A Is Correct: References from CSC Study Materials:

* Volume 2, Chapter 24: "Canadian Taxation," Section on Capital Gains and Losses.

NEW QUESTION # 24

What is most likely true of a portfolio that is managed from a value basis?

- A. Portfolio turnover is high, so investors can expect to incur frequent capital gains
- B. Stock selections tend to have a higher beta than those chosen by a growth manager
- C. This portfolio style tends to perform best in up markets, with minimal gains in down markets
- D. The portfolio will realize higher dividend yields than a growth equity portfolio

Answer: D

NEW QUESTION # 25

Anwar is placing a market order to purchase 100 shares of AJL when the bid/ask is \$10.25/\$10.75. Before the trade is complete, the bid/ask moves to \$10.20/\$10.70. What is the share price that Anwar will pay on the purchase transaction?

- A. \$10.20
- B. \$10.70
- C. \$10.75
- D. \$10.29

Answer: B

Explanation:

A market order executes immediately at the best available ask price for a purchase transaction. In this case, the bid/ask initially was \$10.25/\$10.75. However, before execution, the ask price updated to \$10.70, meaning Anwar will pay \$10.70 per share.

* B. \$10.75: This was the previous ask price but is no longer valid after the update.

* C. \$10.29: This value is not relevant to the current bid/ask spread.

* D. \$10.20: This represents the updated bid price, which applies to sell orders, not buy orders.

NEW QUESTION # 26

When a company issues a number of common shares, some of which are held by institutional investors, what are the institutional

investors' shares known as?

- A. Outstanding shares.
- B. Market capitalization shares.
- C. Public float shares.
- D. issued shares

Answer: C

Explanation:

The shares held by institutional investors, along with other shares available for trading by the public, are referred to as the public float shares. These are the issued shares of a company that are actively traded in the market, excluding restricted shares held by insiders or strategic investors.

Other options:

* Issued shares: Includes all shares a company has issued, including restricted shares.

* Outstanding shares: Includes all shares held by all shareholders, including restricted shares and shares not available for trading.

* Market capitalization shares: Not a term used to describe shares; market capitalization is a measure of a company's total value based on its stock price and outstanding shares.

References:

* Volume 1, Chapter 8: Equity Securities, section on "Public Float and Market Capitalization" explains the concept of public float shares.

NEW QUESTION # 27
