As is known to all, SPLK-2003 practice guide simulation plays an important part in the success of exams. By simulation, you can get the hang of the situation of the real exam with the help of our free demo. Simulation of our SPLK-2003 training materials make it possible to have a clear understanding of what your strong points and weak points are and at the same time, you can learn comprehensively about the SPLK-2003 Exam. By combining the two aspects, you are more likely to achieve high grades.

Splunk Phantom Certified Admin Sample Questions (Q55-Q60):

NEW QUESTION # 55
Splunk user account(s) with which roles must be created to configure SOAR with an external Splunk Enterprise instance?

- A. phantomcreate, phantomedit
- B. superuser, administrator
- C. admin, user
- D. phantomsearch, phantomdelete

Answer: D

NEW QUESTION # 56
Which of the following are the default ports that must be configured on Splunk to allow connections from SOAR?

- A. SplunkWeb (8088), SplunkD (8089), HTTP Collector (8000)
- B. SplunkWeb (8421), SplunkD (8061), HTTP Collector (8798)
- C. SplunkWeb (8089), SplunkD (8088), HTTP Collector (8000)
- D. SplunkWeb (8000), SplunkD (8089), HTTP Collector (8088)

Answer: D

Explanation:
The default ports that must be configured on Splunk to allow connections from Phantom are SplunkWeb (8000), SplunkD (8089), and HTTP Collector (8088). SplunkWeb is the port used to access the Splunk web interface. SplunkD is the port used to communicate with the Splunk server. HTTP Collector is the port used to send data to Splunk using the HTTP Event Collector (HEC). These ports must be configured on Splunk and Phantom to enable the integration between the two products.
To allow connections from Splunk Phantom to Splunk, certain default ports need to be open and properly configured. The default ports include SplunkWeb (8000) for web access, SplunkD (8089) for Splunk's management port, and the HTTP Event Collector (HEC) on port 8088, which is used for ingesting data into Splunk. These ports are essential for the communication between Splunk Phantom and Splunk, facilitating data exchange, search capabilities, and the integration of various functionalities between the two platforms.

NEW QUESTION # 57
During a second test of a playbook, a user receives an error that states: 'an empty parameters list was passed to phantom.act()."
What does this indicate?

- A. The playbook is using an incorrect container.
- B. The playbook debugger's scope is set to new.
- C. The container has artifacts not parameters.
- D. The playbook debugger's scope is set to all.

Answer: C

NEW QUESTION # 58
In addition to full backups. Phantom supports what other backup type using backup?

- A. Snapshot
- B. Incremental
- C. Differential

- D. Partial

Answer: B

NEW QUESTION # 59
When the Splunk App for SOAR Export executes a Splunk search, which activities are completed?

- A. CIM fields are mapped to CEF fields and a container is created on the SOAR server.
- B. CEF fields are mapped to CIM fields and a container is created on the SOAR server.
- C. CEF fields are mapped to CIM and a container is created on the Splunk server.
- D. CIM fields are mapped to CEF and a container is created on the Splunk server.

Answer: A

Explanation:
When the Splunk App for SOAR Export executes a Splunk search, it typically involves mapping Common Information Model (CIM) fields from Splunk to the Common Event Format (CEF) used by SOAR, after which a container is created on the SOAR server to house the related artifacts and information. This process allows for the integration of data between Splunk, which uses CIM for data normalization, and Splunk SOAR, which uses CEF as its data format for incidents and events.
Splunk App for SOAR Export is responsible for sending data from your Splunk Enterprise or Splunk Cloud instances to Splunk SOAR. The Splunk App for SOAR Export acts as a translation service between the Splunk platform and Splunk SOAR by performing the following tasks:
*Mapping fields from Splunk platform alerts, such as saved searches and data models, to CEF fields.
*Translating CIM fields from Splunk Enterprise Security (ES) notable events to CEF fields.
*Forwarding events in CEF format to Splunk SOAR, which are stored as artifacts.
Therefore, option B is the correct answer, as it states the activities that are completed when the Splunk App for SOAR Export executes a Splunk search. Option A is incorrect, because CEF fields are not mapped to CIM fields, but the other way around. Option C is incorrect, because a container is not created on the Splunk server, but on the SOAR server. Option D is incorrect, because a container is not created on the Splunk server, but on the SOAR server.

NEW QUESTION # 60
......

You do not need to enroll yourself in expensive SPLK-2003 exam training classes. With the Splunk SPLK-2003 valid dumps, you can easily prepare well for the actual SPLK-2003 exam at home. Do you feel SPLK-2003 Exam Preparation is tough? VCETorrent desktop and web-based online Splunk SPLK-2003 practice test software will give you a clear idea about the final SPLK-2003 test pattern.
