C_TS4FI_2023 Exam Dumps - Top Questions and Answers from the Last Five Years

Boost your C_TS4FI_2023 exam preparation with the most frequently asked questions and answers from the past five years. Understand their significance from both instructors' and students' perspectives. Find reliable **C_TS4FI_2023 exam dumps** on **Killerdumps** to enhance your exam readiness and confidence.

Why These Questions Are More Important

Instructors' Perspective: Instructors consider these questions essential for teaching and evaluating student understanding of key concepts. By emphasizing frequently asked questions, instructors can ensure that their students are well-prepared for the C_TS4FI_2023 exam. These questions cover fundamental topics that are crucial for a comprehensive understanding of the subject matter. Instructors use these questions to design lesson plans, create practice exams, and guide classroom discussions. They believe that if students can confidently answer these questions, they will be well-equipped to succeed in the exam and apply their knowledge in real-world scenarios. Moreover, these questions help instructors identify areas where students may need additional support or clarification, allowing them to tailor their teaching methods accordingly.

Students' Perspective: From a student's perspective, these questions are invaluable for exam preparation. Students rely on these questions to practice and familiarize themselves with the format and types of questions they will encounter on the actual exam. By focusing on the most frequently asked questions, students can prioritize their study efforts and ensure they are covering the most critical topics. Answering these questions helps build confidence, as students can gauge their understanding and identify areas where they need further review. Additionally, these questions serve as a benchmark for students to assess their progress and readiness for the exam. Being able to answer these questions correctly gives students a sense of accomplishment and reassurance that they are on the right track.

Salesforce Certified Field Service Consultant Sample Questions (Q114-Q119):

NEW QUESTION # 114
Universal Containers just started its Field Service Implementation and is configuring Service Territories and Locations. The Locations need to be associated to Territories.
In which two ways should the Consultant show this relationship?
Choose ? answers

- A. Create the Service Territory Location as a Location lookup field.
- B. Add the Service Territory Location Related List on the Service Territory page layout.
- C. Add the Service Territory Location Related List on the Location page layout.
- D. Create the Service Territory Location as a Service Territory lookup field.

Answer: B,C

Explanation:
Service Territory Location is a junction object that links Service Territory and Location objects[236]. Related Lists are components on page layouts that show records that are related to a record through a lookup or master- detail relationship[237]. Adding the Service Territory Location Related List on the Service Territory page layout and adding the Service Territory Location Related List on the Location page layout would allow Universal Containers to show how Locations are associated to Territories by displaying a list of Service Territory Locations on each record[238]. Creating the Service Territory Location as a Service Territory lookup field or creating the Service Territory Location as a Location lookup field would not work because they are not valid fields on either object. NEW QUESTION # 115
Universal Containers wants Technicians to view work progress through the Work Order Line Item card in the Salesforce Field Service mobile app.
Which configuration steps should 8 Conzultant take to meet this requirement?

- A. Add the Work Order Line Items related list to the Work Order page layout and assign the layout to the Technician's profile.
- B. Create a custom Visuaiforce page and add an external link in the Salesforce Field Service mobile app to view the page in the mobile browser.
- C. Create a Report Chart that summarizes wk Order Line Items and add 2 link to the Service Appointment layout.
- D. Create a custom Lightning Component that displays Work Order progress and deploy it to Technicians through the Salesforce Field Service mobile app.

Answer: D

Explanation:
Explanation
Lightning Components are reusable units of user interface that can be customized and embedded in different pages or apps[180]. Work Order Line Items are records that track specific tasks or products related to a work order[181]. Creating a custom Lightning Component that displays Work Order progress and deploying it to Technicians through the Salesforce Field Service mobile app

would allow Universal Containers' Technicians to view work progress through the Work Order Line Item card in the Salesforce Field Service mobile app by creating a component that shows the status or completion percentage of work order line items and adding it to the work order line item card layout in the mobile app settings[182]. Creating a custom Visualforce page and adding an external link in the Salesforce Field Service mobile app to view the page in the mobile browser would not allow Technicians to view work progress through the Work Order Line Item card in the Salesforce Field Service mobile app. Visualforce pages are web pages that can display custom user interface using HTML, CSS, JavaScript, and Apex[183]. Creating a Report Chart that summarizes Work Order Line Items and adding a link to the Service Appointment layout would not allow Technicians to view work progress through the Work Order Line Item card in the Salesforce Field Service mobile app. Report Charts are visual representations of report data that can be added to different pages or layouts[184]. Adding the Work Order Line Items related list to the Work Order page layout and assigning the layout to the Technician's profile would not allow Technicians to view work progress through the Work Order Line Item card in the Salesforce Field Service mobile app. Related lists are lists of records that are directly related to another record and can be added to different page layouts[185]. NEW QUESTION # 116

Universal Containers typically performs installs, break-fix, and inspections for all clients. The Service Manager wants to create a template for common work requests. What should a Consultant implement to assist the dispatch team?

- A. Work Order Record Types for Break-fix, Install, and Inspection.
- B. Work Type Line Items for Install, Break-fix, and Inspections.
- C. Work Order custom fields to define Install, Break-fix, and Inspections.
- D. Work Types and Skill Requirements for Install, Break-fix, and Inspections.

Answer: D

NEW QUESTION # 117

Northern Trail Outfitters has a customer login page on their website and wants to use Marketing Cloud to send an email to customers who need to reset their password. The email needs to be sent as quickly as possible. Their web server should receive a notification when the email is sent.
Which solution should they use?

- A. Multi-Step Journey with an API Event entry source
- B. Triggered Send Definition
- C. Transactional Messaging API
- D. Single Send Journey with an API Event entry source

Answer: C

NEW QUESTION # 118

Which three factors should a Consultant consider when configuring routing? Choose 3 answers

- A. Default Travel Speed is used only if a different travel speed is null on the resource.
- B. Configure Schedule Policy by modifying Work Rules and Service Objectives.
- C. Configure the Resource Availability Work Rule to calculate travel at the expense of the resource and breaks.
- D. A straight line is used to compute the shortest distance between two locations if Street Level Routing is enabled.
- E. Set Auto Schedule to True upon creation of the Service Appointment.

Answer: A,B,C

Explanation:
These are three factors that should be considered when configuring routing. Routing is the process of finding the best resource for a service appointment based on various criteria and constraints. A schedule policy is used to define the routing preferences and rules

for a service territory or operating hours. A work rule is used to define a scheduling constraint or preference for a service appointment or a resource. A service objective is used to define a scheduling goal or metric for a service appointment. The Resource Availability work rule is used to calculate travel time and breaks as part of the resource's availability. The Default Travel Speed is used to estimate the travel time between locations if a different travel speed is not specified for the resource.
