Note: There are 2 correct answers to this question.

- A. Personal Data Collection
- B. Document Flow
- C. Compliance Forms
- D. Additional Data Collection

Answer: A,D

Explanation:

Tasks such as "Personal Data Collection" and "Additional Data Collection" can be completed by onboarding participants on behalf of the new hire, allowing HR or designated users to enter necessary information directly into the system, ensuring data is accurately captured even if the new hire is unavailable.

NEW QUESTION # 22

Note: There are 3 correct answers to this question.

- A. Additional Onboarding Data Collection
- B. New Hire Verification
- C. Compliance Forms
- D. New Employee
- E. Create New Hire Tasks

Answer: A,C,E

Explanation:

The Process Variant Manager in SAP SuccessFactors Onboarding allows administrators to customize onboarding workflows by adding various steps to align with organizational needs. "Create New Hire Tasks" and "Additional Onboarding Data Collection" help streamline task assignments and data collection, while "Compliance Forms" ensure that legal and regulatory documentation requirements are met during onboarding.

NEW QUESTION # 24

What is the only condition that executes the second rehire check?

- A. A potential match is not identified in the first rehire check
- B. The Personal Data Collection step is completed
- C. A potential match is detected during the Review New Hire Data step
- D. A potential match is detected when Onboarding is initiated

Answer: A

Explanation:

The rehire check process in SAP SuccessFactors Onboarding is designed to identify whether a new hire is a returning employee (rehire) by matching their data against existing employee records. The process includes a first and second rehire check, with the second check executed only under specific conditions.

According to the SAP SuccessFactors Onboarding Implementation Guide:

* Thesecond rehire checkis executed only whena potential match is not identified in the first rehire check(Option A). The first rehire check attempts to match the new hire's data(e.g., National ID, name, or date of birth) against existing records. If no match is found, the system proceeds to the second rehire check, which may use additional criteria or manual review to confirm the new hire's status. Option B (match detected when Onboarding is initiated) is incorrect because a match at initiation would trigger the first check, not the second. Option C (Personal Data Collection step completed) is incorrect because the rehire check occurs earlier, typically during initiation or Manage Pending Hires. Option D (match detected during Review New Hire Data) is incorrect because a match at this stage would not trigger a second check; it would resolve the rehire status.
