**NEW QUESTION # 231**

Which service provides serverless computing in Azure?

- **A. Azure Functions**
- B. Azure storage account
- C. Azure dedicated hosts
- D. Azure Virtual Machines

**Answer: A**

Explanation:

Section: Describe core solutions and management tools on Azure

Explanation:

Azure Functions provide a platform for serverless code.

Azure Functions is a serverless compute service that lets you run event-triggered code without having to explicitly provision or manage infrastructure.
