Successful companies are those which identify customers' requirements and provide the solution to MS-102 exam candidate needs

and to make those dreams come true, we are in continuous touch with the exam candidates to get more useful ways. We have favorable quality reputation in the mind of exam candidates these years by trying to provide high quality MS-102 Study Guide with the lowest prices while the highest quality. So you can't miss our MS-102 learning prep.

## Microsoft 365 Administrator Sample Questions (Q535-Q540):

### NEW QUESTION # 535

You need to configure the information governance settings to meet the technical requirements.

Which type of policy should you configure, and how many policies should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

### NEW QUESTION # 536

You have a Microsoft 365 E5 tenant that uses Microsoft Intune.

You need to configure Intune to meet the following requirements:

Prevent users from enrolling personal devices.

Ensure that users can enroll a maximum of 10 devices.

What should you use for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation

Graphical user interface, text, application, chat or text message Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/intune/enrollment/enrollment-restrictions-set#blocking-personal-windows>

### NEW QUESTION # 537

#### HOTSPOT

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint site named Site1 and a data loss prevention (DLP) policy named DLP1. DLP1 contains the rules shown in the following table.

Site1 contains the files shown in the following table.

Which policy tips are shown for each file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

Box 1: Rule1 tip only

File1 matches Rule1, Rule2, and Rule3.

Rule1 has the highest priority.

Note: The Priority parameter specifies a priority value for the policy that determines the order of policy processing. A lower integer value indicates a higher priority, the value 0 is the highest priority, and policies can't have the same priority value.

Box 2: Rule1 tip only

Note: User Override support

The option to override is per rule, and it overrides all of the actions in the rule (except sending a notification, which can't be overridden).

It's possible for content to match several rules in a DLP policy or several different DLP policies, but only the policy tip from the most restrictive, highest-priority rule will be shown (including policies in Test mode). For example, a policy tip from a rule that blocks

access to content will be shown over a policy tip from a rule that simply sends a notification. This prevents people from seeing a cascade of policy tips.

If the policy tips in the most restrictive rule allow people to override the rule, then overriding this rule also overrides any other rules that the content matched.

### NEW QUESTION # 538

DRAG DROP

You have a Microsoft 365 E5 subscription that contains two groups named Group1 and Group2.

You need to ensure that each group can perform the tasks shown in the following table.

The solution must use the principle of least privilege.

Which role should you assign to each group? To answer, drag the appropriate roles to the correct groups. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Box 1: Billing admin  
manage service request  
Purchase new services  
Etc.

Assign the Billing admin role to users who make purchases, manage subscriptions and service requests, and monitor service health.

Box 2: User admin

User admin

Assign the User admin role to users who need to do the following for all users:

- Add users and groups
- Assign licenses
- Manage most users properties
- Create and manage user views
- Update password expiration policies
- Manage service requests
- Monitor service health

### NEW QUESTION # 539

You have a Microsoft 365 Enterprise E5 subscription.

You add a cloud-based app named App1 to the Azure AD enterprise applications list.

You need to ensure that two-step verification is enforced for all user accounts the next time they connect to App1.

Which three settings should you configure from the policy? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**
