

Unique Features of PrepAwayTest's Microsoft AB-731 Practice Test (Desktop and Web-Based)

BONUS!!! Download part of PrepAwayTest AB-731 dumps for free: https://drive.google.com/open?id=1_ZnRNNeLDZrNsdLudjTgWLFwa9MiG23

Every user has rated study material positively and passed the AB-731 Exam. PrepAwayTest gives a guarantee to the customers that if they fail to pass the AI Transformation Leader (AB-731) certification on the very first try despite all their efforts they can claim their money back according to terms and conditions. A team of experts is working day and night in order to make the product successful day by day and provide the customers with the best experience.

Microsoft AB-731 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Identify an Implementation and Adoption Strategy for Microsoft's AI Apps and Services: Covers responsible AI principles, governance, and organizational adoption planning, including AI councils, champion programs, and an understanding of Copilot and Azure AI licensing models.
Topic 2	<ul style="list-style-type: none">Identify Benefits, Capabilities, and Opportunities for Microsoft's AI Apps and Services: Focuses on mapping Microsoft's AI ecosystem including Microsoft 365 Copilot, Copilot Studio, and Azure AI Foundry Tools to real business use cases, while leveraging built-in scalability, security, and safety benefits.
Topic 3	<ul style="list-style-type: none">Identify the Business Value of Generative AI Solutions: Covers core generative AI concepts, cost drivers, and business challenges, along with techniques like prompt engineering and RAG that enhance AI value through better data quality, security, and machine learning practices.

AB-731 Downloadable PDF, Reliable AB-731 Test Answers

IT certification exam is very popular examination in the current society, especially in the IT industry. IT certification test qualification is widely recognized by the international community. Promotion, salary raise and improving your job skills, IT certification exam is your best choice. I believe that you must think so. Then, don't hesitate to take Microsoft AB-731 Exam which is the most popular test in the recent. If you have no idea how to prepare the certification materials for the exam, PrepAwayTest serve you. PrepAwayTest can provide you with everything you need.

Microsoft AI Transformation Leader Sample Questions (Q13-Q18):

NEW QUESTION # 13

Your company plans to use generative AI to help summarize and analyze internal business documents. You need to recommend a

solution to prevent generative AI from accessing confidential or classified information. What should you include in the recommendation?

- A. a data retention policy
- **B. data governance**
- C. communication monitoring
- D. an information barrier (IB) policy

Answer: B

Explanation:

Preventing generative AI from accessing confidential or classified information is primarily a data access and classification control problem. The most effective broad solution is data governance (B) -the framework of policies and controls that ensures sensitive content is identified, classified, protected, and access is restricted using least privilege. Data governance includes information classification/sensitivity labels, access control reviews, secure sharing practices, data loss prevention (DLP), and auditing-controls that directly limit what data is available to the AI through permission trimming and policy enforcement.

An information barrier (A) policy is more specific: it's intended to prevent communication and collaboration between defined user groups (often for regulatory/ethical walls). It does not comprehensively address document classification or restrict AI access to sensitive files across the tenant. A data retention policy (C) governs how long content is kept and when it's deleted; it's not a primary access-prevention mechanism. Communication monitoring (D) is a detection/oversight control; it can help identify risky activity, but it does not itself prevent access to confidential content by the AI.

Therefore, to prevent AI from surfacing confidential/classified data during summarization and analysis, you should recommend data governance as the primary control layer.

NEW QUESTION # 14

Your company manages an online catalog of office supplies. You plan to use a generative AI solution to create product descriptions for your company's website. The solution must ensure descriptions can be posted immediately after creation, enable selection/inclusion of product details, and be fast and simple for non- technical staff. What is the best type of solution to use? Select the BEST answer.

- **A. a fine-tuned large language model LLM**
- B. an interactive AI agent
- C. the Researcher agent in Microsoft 365 Copilot
- D. custom Azure Machine Learning model

Answer: A

Explanation:

The task is high-volume content generation with consistent structure and immediate publishing: product descriptions that reliably include chosen product attributes (brand, specs, materials, dimensions, use cases) and can be produced quickly by non-technical staff. The best fit is a fine-tuned LLM (D) because fine-tuning can standardize tone, format, and completeness against your catalog schema, reducing variability and minimizing manual editing before posting. With a fine-tuned model, you can strongly enforce style guidelines (length, voice, prohibited claims), and you can template prompts so staff only supply product fields and get publish-ready copy.

Option A is not best: Azure Machine Learning is excellent for predictive models but is unnecessary for straightforward text generation. B (Researcher) is optimized for multistep research across work data + web, not deterministic product copy generation. C (interactive agent) can help collect requirements, but it's more complexity than needed; the core need is consistent text generation from structured product data, which fine- tuning addresses directly while keeping user interaction simple (fill fields # generate description).

NEW QUESTION # 15

During AI adoption planning, leadership evaluates workforce readiness, operating models, and governance structures required to support AI at scale. Why is this step critical?

- A. It replaces the need for AI infrastructure investments
- **B. It ensures organizational readiness and sustainable AI adoption**
- C. It eliminates the need for responsible AI reviews
- D. It limits AI usage to technical teams only

Answer: B

Explanation:

Assessing workforce skills, governance, and operating models ensures the organization can adopt AI responsibly and scale usage effectively.

NEW QUESTION # 16

Your company is deploying Microsoft 365 Copilot. The deployment must provide users with access to the Researcher agent to search across data in Microsoft SharePoint. You need to recommend a licensing plan for the solution. What should you recommend?

- A. a Microsoft 365 Copilot per-user add-on license
- B. a Microsoft 365 subscription entitlement
- C. pay-as-you-go
- D. a usage-based consumption license in Azure

Answer: A

Explanation:

The requirement is explicit: users must have access to the Researcher agent in Microsoft 365 Copilot and use it to search across organizational content stored in SharePoint. Microsoft's licensing guidance for Researcher indicates that Researcher is available to Microsoft 365 business and enterprise users who have a Microsoft 365 Copilot add-on license (and also to certain consumer "Microsoft 365 Premium" subscriptions).

That maps directly to option C. The Researcher agent is part of the Microsoft 365 Copilot experience for work tenants; it is not enabled merely by having a baseline Microsoft 365 subscription entitlement (B).

Baseline subscriptions can provide access to Microsoft 365 apps and content repositories (like SharePoint /OneDrive), but the Researcher agent itself is a Copilot capability that requires the Copilot add-on to unlock.

Option A (pay-as-you-go) and D (usage-based consumption license in Azure) describe consumption models that apply to Azure services or agent metering in some scenarios, but they are not the standard licensing requirement to enable the built-in Researcher agent for Microsoft 365 Copilot users. When the goal is to enable Researcher inside Microsoft 365 Copilot for staff, the practical and correct recommendation is to assign the Microsoft 365 Copilot per-user add-on license to the users who need it, ensuring their SharePoint access is already properly permissioned and governed.

NEW QUESTION # 17

- Select the answer that correctly completes the sentence.

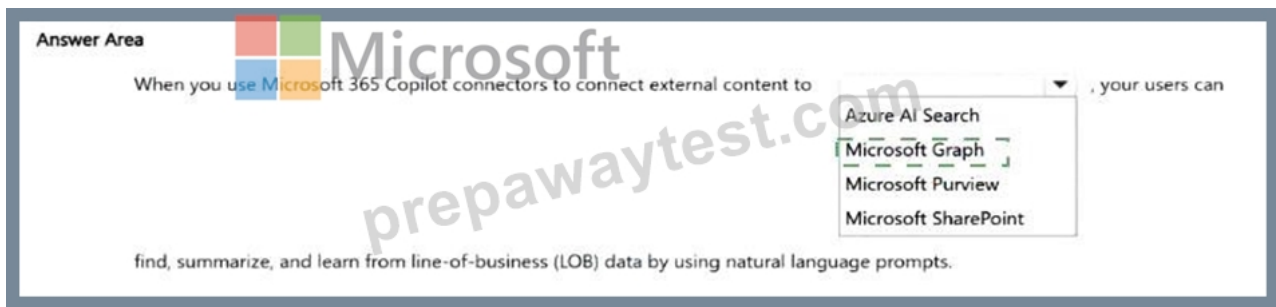

When you use Microsoft 365 Copilot connectors to connect external content to _____, your users can find, summarize, and learn from line-of-business (LOB) data by using natural language prompts.

Answer Area

Answer:

Explanation:

Explanation:

Microsoft Graph

Microsoft 365 Copilot connectors (built on Microsoft Graph connectors) are used to bring external, line-of-business content into the Microsoft 365 ecosystem by ingesting it into Microsoft Graph. Once connected, the content can be indexed and made discoverable through Microsoft Search and available for Copilot experiences, enabling users to use natural language prompts to find and summarize relevant LOB information-subject to permissions and governance controls.

The other choices don't match how Copilot connectors are positioned. Azure AI Search is an Azure indexing/retrieval service used in custom RAG solutions, but Microsoft 365 Copilot connectors are specifically designed to surface external content through Microsoft 365 experiences via Graph. Microsoft Purview focuses on data governance, compliance, and risk management rather than being the primary ingestion target for Copilot connector content. SharePoint can store content, but the connector model is about indexing external systems into Microsoft Graph so the content becomes searchable and usable across Microsoft 365, not merely placing it into SharePoint as the destination.

So the correct completion is Microsoft Graph because that is the foundational data and indexing fabric Copilot uses to reason over organizational content with appropriate permission trimming.

NEW QUESTION # 18

.....

As this new frontier of personalizing the online experience advances, our AB-731 exam guide is equipped with comprehensive after-sale online services. It's a convenient way to contact our staff, for we have customer service people 24 hours online to deal with your difficulties. If you have any question or request for further assistance about the AB-731 study braindumps, you can leave us a message on the web page or email us. We promise to give you a satisfying reply as soon as possible. All in all, we take an approach to this market by prioritizing the customers first, and we believe the customer-focused vision will help our AB-731 test guide' growth.
