## Vce PCCP Test Simulator, PCCP Guide

Although it is not an easy thing for somebody to pass the PCCP exam, ValidDumps can help aggressive people to achieve their goals. More qualified PCCP certification for our future employment has the effect to be reckoned with, only to have enough qualification certifications to prove their ability, can we win over rivals in the social competition. This is the reason why we need to recognize the importance of getting our PCCP Quiz torrent. And with our PCCP exam questions, you dream will be easy to come true.

### **Palo Alto Networks Certified Cybersecurity Practitioner Sample Questions (Q23-Q28):**

#### **NEW QUESTION # 23**

Which attacker profile uses the internet to recruit members to an ideology, to train them, and to spread fear and induce panic?

- A. hacktivists
- **B. cyberterrorists**
- C. cybercriminals
- D. state-affiliated groups

**Answer: B**

**Explanation:**

Cyberterrorists are attackers who use the internet to recruit members to an ideology, to train them, and to spread fear and induce panic. Cyberterrorists may target critical infrastructure, government systems, or public services to cause disruption, damage, or harm. Cyberterrorists may also use the internet to disseminate propaganda, incite violence, or coordinate attacks. Cyberterrorists

differ from other attacker profiles in their motivation, which is usually political, religious, or ideological, rather than financial or personal. References: Cyberterrorism, Cyber Threats, Cybersecurity Threat Landscape

#### NEW QUESTION # 24

Which of the following is a Routed Protocol?

- A. Domain Name Service (DNS)
- B. Internet Protocol (IP)
- C. Routing Information Protocol (RIP)
- D. Transmission Control Protocol (TCP)

**Answer: B**

Explanation:

A routed protocol is a protocol by which data can be routed. It provides appropriate addressing information in its internet layer or network layer to allow a packet to be forwarded from one network to another network.

Examples of routed protocols are the Internet Protocol (IP) and Internetwork Packet Exchange (IPX). IP is the most widely used routed protocol on the Internet and other networks. It assigns a unique logical address to each device and enables data to be fragmented, reassembled, and routed across multiple networks. References:

- \* Routing v/s Routed Protocols in Computer Network
- \* Routing protocol - Wikipedia
- \* CCNA Certification: Routed Protocols vs Routing Protocols
- \* What is the difference between Routing Protocols and Routed Protocols

#### NEW QUESTION # 25

What are two functions of User and Entity Behavior Analytics (UEBA) data in Prisma Cloud CSPM? (Choose two.)

- A. Assessing severity levels
- B. Detecting and correlating anomalies
- C. Unifying cloud provider services
- D. Identifying misconfigurations

**Answer: A,B**

Explanation:

Assessing severity levels - UEBA data helps prioritize incidents by evaluating the risk and severity based on user and entity behavior.

Detecting and correlating anomalies - UEBA continuously analyzes activity to identify abnormal behavior and correlate anomalies that may indicate insider threats or compromised accounts.

#### NEW QUESTION # 26

In which phase of the cyberattack lifecycle do attackers establish encrypted communication channels back to servers across the internet so that they can modify their attack objectives and methods?

- A. command and control
- B. exploitation
- C. actions on the objective
- D. installation

**Answer: A**

Explanation:

Command and Control: Attackers establish encrypted communication channels back to command-and-control (C2) servers across the internet so that they can modify their attack objectives and methods as additional targets of opportunity are identified within the victim network, or to evade any new security countermeasures that the organization may attempt to deploy if attack artifacts are discovered.

## NEW QUESTION # 27

Based on how much is managed by the vendor, where can CaaS be situated in the spread of cloud computing services?

- A. between IaaS and PaaS
- B. between On-Prem and IaaS
- C. between FaaS and Serverless
- D. between PaaS and FaaS

**Answer: A**

Explanation:

CaaS, or Containers-as-a-Service, is a cloud service that allows users to manage and deploy applications using containers and clusters. CaaS can be situated between IaaS and PaaS in the spread of cloud computing services, based on how much is managed by the vendor. IaaS, or Infrastructure-as-a-Service, provides the lowest level of abstraction, where users have to manage the servers, storage, network, and operating system.

PaaS, or Platform-as-a-Service, provides a higher level of abstraction, where users only have to manage the application code and data. FaaS, or Function-as-a-Service, provides the highest level of abstraction, where users only have to manage the functions or logic of the application. CaaS falls in between IaaS and PaaS, as it provides users with more control over the container orchestration and configuration than PaaS, but also simplifies the infrastructure management and scaling than IaaS.

\* What is CaaS? from Red Hat

\* Containers as a Service from Atlassian

\* Container as a Service (CaaS) from GeeksforGeeks

## NEW QUESTION # 28

.....

Why we give a promise that once you fail the exam with our dump, we guarantee a 100% full refund of the dump cost to you, as all those who have pass the exam successfully with our PCCP exam dumps give us more confidence to make the promise of "No help, full refund". PCCP exam is difficult to pass, but it is an important reflection of ability for IT workers in IT industry. So our IT technicians of ValidDumps take more efforts to study PCCP Exam Materials. All exam software from ValidDumps is the achievements of more IT elite.
