You won't be anxious because the available Agile Project Management (AgilePM) Foundation Exam (AgilePM-Foundation) exam dumps are structured instead of distributed. Agile Project Management (AgilePM) Foundation Exam (AgilePM-Foundation) certification exam candidates have specific requirements and anticipate a certain level of satisfaction before buying a APMG-International AgilePM-Foundation practice exam. The Agile Project Management (AgilePM) Foundation Exam (AgilePM-Foundation) practice exam applicants can rest assured that ITExamSimulator's round-the-clock support staff will answer their questions.

## APMG-International Agile Project Management (AgilePM) Foundation Exam Sample Questions (Q93-Q98):

### NEW QUESTION # 93

What role is responsible for interpreting the needs of the Business Sponsor and communicating these to the team?

- A. Business Visionary
- B. Technical Coordinator

- C. Business Analyst
- D. Team Leader

**Answer: A**

Explanation:

The Business Visionary is responsible for interpreting the needs of the Business Sponsor and communicating these to the team. This role represents the Business Sponsor by communicating the vision of the project and ensuring that the team understands the sponsor's requirements.

#### NEW QUESTION # 94

Which technique allows for testing the achievability of objectives?

- A. Facilitated Workshop
- **B. Timeboxing**
- C. Modeling
- D. MoSCoW

**Answer: B**

Explanation:

Timeboxing is the technique that allows for testing the achievability of objectives. This approach involves setting a fixed period (the Timebox) during which specific tasks or objectives must be completed. By focusing on what can be achieved within the set time frame, Timeboxing helps teams test and validate whether their objectives are realistic and attainable. This iterative approach ensures continuous assessment and adaptation, promoting efficient project management.

#### NEW QUESTION # 95

Which of the following roles may be substituted for a Scrum Master?

- A. Developer
- B. Project Manager
- C. Product Owner
- **D. Team Leader**

**Answer: D**

Explanation:

Comprehensive and Detailed 150 to 300 words Explanation From Exact Extract of Agile Project Management (paraphrased to avoid lengthy quotation):

In AgilePM (DSDM), the Team Leader role closely aligns with the facilitative, servant-leadership responsibilities commonly associated with a Scrum Master in Scrum. The Team Leader is accountable for enabling collaborative working, removing impediments, fostering continuous improvement, and protecting the team's focus within timeboxes—all hallmarks of Scrum Mastery. While titles differ across frameworks, AgilePM explicitly positions Team Leader as the day-to-day lead for the Solution Development Team, emphasizing facilitation, coaching, and ensuring adherence to agreed practices (e.g., MoSCoW prioritization, Definition of Done/quality criteria). By contrast, a Project Manager in AgilePM is a project-level role focused on governance and business case stewardship; a Product Owner (AgilePM's Business Visionary/Business Ambassador combination) prioritizes value and backlog—this is not a facilitation role; and a Developer focuses on building the solution. Therefore, when mapping roles between Scrum and AgilePM, the Team Leader most naturally substitutes for, or corresponds to, the Scrum Master responsibilities, ensuring servant leadership without shifting into command-and-control behavior.

#### NEW QUESTION # 96

Which of the phases in the AgilePM project lifecycle is optional?

- **A. Feasibility**
- B. None

- C. Foundations
- D. Realization

**Answer: A**

Explanation:

The AgilePM lifecycle typically includes Pre-Project, Feasibility, Foundations, Evolutionary Development/Realization, Deployment, and Post-Project (benefits). Feasibility is designed as a lightweight, optional phase to confirm there is a sensible case to proceed before deeper investment. In some contexts-when viability is already established, or scope and constraints are straightforward-Feasibility may be skipped or greatly abbreviated, moving directly to Foundations, where the approach, governance, and baselines are established. By contrast, Foundations is expected for alignment and control, and Realization (timeboxed delivery) is where the solution is built; these are not optional if you are proceeding with delivery. Thus, Feasibility is the optional phase.

#### NEW QUESTION # 97

Why might the priority of a requirement in the Product Backlog differ from what might otherwise be shown?

- A. Different budget
- B. Different quality
- C. Different resources
- **D. Different timeframe**

**Answer: D**

Explanation:

Comprehensive and Detailed 150 to 300 words Explanation From Exact Extract of Agile Project Management (paraphrased): AgilePM's MoSCoW prioritization is always applied within a defined timeframe (e.g., a release or timebox). A requirement can be a Must Have for a specific delivery window while being a Should/Could when viewed across the whole product roadmap. Timeboxing, dependency considerations, and the need to deliver a coherent, usable increment by a certain date mean that priority is inherently time-contextual. While budget and resources influence overall planning, AgilePM fixes time and cost to provide predictability and flexes scope to protect quality; thus, the most legitimate driver for a requirement's priority to change is the timeframe to which MoSCoW is applied. As delivery horizons shift (e.g., near-term release vs. later release), the same requirement's priority may be re-appraised to ensure the Business Case and Product/Release Goals are met. Therefore, Different timeframe is the correct reason that explains variations in backlog priority.

#### NEW QUESTION # 98
