Who should take the AI-102: Designing and Implementing an Azure AI Solution Exam

The **AI-102 Exam** certification is an internationally-recognized certification which help to have validation for Azure AI Solution Architects who have ability to accomplish the following technical tasks: analyze solution requirements; design solutions; integrate AI models into solutions; and deploy and manage solutions.

The Microsoft AI-102 exam is intended for AI solution architects, AI developers, and data scientists who have experience in designing and implementing AI solutions on the Microsoft Azure platform. Candidates are expected to have a solid understanding of programming languages such as Python, R, and C#, as well as experience in designing and implementing AI solutions using these languages. AI-102 Exam is a great way for professionals to demonstrate their skills and knowledge in AI solution design and implementation on the Azure platform, and to gain recognition as a Microsoft Certified Azure AI Engineer Associate.

The Microsoft AI-102 exam covers various topics related to AI solution development, including designing and implementing AI workflows, creating natural language processing solutions, leveraging computer vision techniques, and implementing machine learning models. It also tests the candidate's ability to work with Azure services such as Azure Cognitive Services, Azure Machine Learning, and Azure Databricks.
