	Automatically generating captions for pre-recorded videos is an example of conversational AI.	☐	☐

Answer:

Explanation:

Answer Area

Statements	Yes	No
A smart device in the home that responds to questions such as "When is my next appointment?" is an example of conversational AI.	☒	☐
An interactive webchat feature on a company website can be implemented by using Azure Bot Service.	☒	☐
Automatically generating captions for pre-recorded videos is an example of conversational AI.	☒	☐

NEW QUESTION # 255

Match the types of AI workloads to the appropriate scenarios.

To answer, drag the appropriate workload type from the column on the left to its scenario on the right. Each workload type may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

Workloads Types	Answer Area
Anomaly detection	Workload Type: An automated chat to answer questions about refunds and exchange
Computer vision	Workload Type: Determining whether a photo contains a person
Conversational AI	Workload Type: Determining whether a review is positive or negative
Knowledge mining	
Natural language processing	

Answer:

Explanation:

Workloads Types

- Anomaly detection
- Computer vision
- Conversational AI
- Knowledge mining
- Natural language processing

Answer Area

- Conversational AI: An automated chat to answer questions about refunds and exchange
- Computer vision: Determining whether a photo contains a person
- Natural language processing: Determining whether a review is positive or negative

Explanation

Answer Area

- Conversational AI: An automated chat to answer questions about refunds and exchange
- Computer vision: Determining whether a photo contains a person
- Natural language processing: Determining whether a review is positive or negative

Box 3: Natural language processing

Natural language processing (NLP) is used for tasks such as sentiment analysis, topic detection, language detection, key phrase extraction, and document categorization.
