In today's society, many people are busy every day and they think about changing their status of profession. They want to improve their competitiveness in the labor market, but they are worried that it is not easy to obtain the certification of AI-900. Our study tool can meet your needs. Once you use our AI-900 exam materials, you don't have to worry about consuming too much time, because high efficiency is our great advantage. You only need to spend 20 to 30 hours on practicing and consolidating of our AI-900 learning material, you will have a good result. After years of development practice, our AI-900 test torrent is absolutely the best.

The Microsoft Azure AI Fundamentals (AI-900) certification is one of the hottest career advancement credentials in the modern Microsoft world. The Microsoft Azure AI Fundamentals (AI-900) certification can help you to demonstrate your expertise and knowledge level. With only one badge of Microsoft Azure AI Fundamentals in AI-900 Certification, successful candidates can advance their careers and increase their earning potential.

Interactive AI-900 EBook & Valid AI-900 Exam Review

With the help of AI-900 study materials, you can conduct targeted review on the topics which to be tested before the exam, and then you no longer have to worry about the problems that you may encounter a question that you are not familiar with during the exam. With AI-900 study materials, you will not need to purchase any other review materials. We have hired professional IT staff to maintain AI-900 Study Materials and our team of experts also constantly updates and renew the question bank according to changes in the syllabus.

Microsoft Azure AI Fundamentals Sample Questions (Q226-Q231):

NEW QUESTION # 226

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Automated machine learning is the process of automating the time-consuming, iterative tasks of machine learning model development.	☐	☐
Automated machine learning can automatically infer the training data from the use case provided.	☐	☐
Automated machine learning works by running multiple training iterations that are scored and ranked by the metrics you specify.	☐	☐
Automated machine learning enables you to specify a dataset and will automatically understand which label to predict.	☐	☐

Answer:

Explanation:

Answer Area

Statements	Yes	No
Automated machine learning is the process of automating the time-consuming, iterative tasks of machine learning model development.	☐	☐
Automated machine learning can automatically infer the training data from the use case provided.	☐	☐
Automated machine learning works by running multiple training iterations that are scored and ranked by the metrics you specify.	☐	☐
Automated machine learning enables you to specify a dataset and will automatically understand which label to predict.	☐	☐

Explanation

Answer Area

Statements	Yes	No
Automated machine learning is the process of automating the time-consuming, iterative tasks of machine learning model development.	☒	☐
Automated machine learning can automatically infer the training data from the use case provided.	☐	☒
Automated machine learning works by running multiple training iterations that are scored and ranked by the metrics you specify.	☒	☐
Automated machine learning enables you to specify a dataset and will automatically understand which label to predict.	☐	☒

Box 1: Yes

Automated machine learning, also referred to as automated ML or AutoML, is the process of automating the time consuming,

iterative tasks of machine learning model development. It allows data scientists, analysts, and developers to build ML models with high scale, efficiency, and productivity all while sustaining model quality.

Box 2: No

Box 3: Yes

During training, Azure Machine Learning creates a number of pipelines in parallel that try different algorithms and parameters for you. The service iterates through ML algorithms paired with feature selections, where each iteration produces a model with a training score. The higher the score, the better the model is considered to

"fit" your data. It will stop once it hits the exit criteria defined in the experiment.

Box 4: No

Apply automated ML when you want Azure Machine Learning to train and tune a model for you using the target metric you specify. The label is the column you want to predict.

NEW QUESTION # 227

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area	Statements	Yes	No
	The following service call will accept English text as an input and output Italian and French text. /translate?from=it&to=fr&to=en	☐	☐
	The following service call will accept English text as an input and output Italian and French text. /translate?from=en&to=fr&to=it	☐	☐
	The Translator service can be used to translate documents from English to French.	☐	☐

Answer:

Explanation:

Answer Area	Statements	Yes	No
	The following service call will accept English text as an input and output Italian and French text. /translate?from=it&to=fr&to=en	☒	☐
	The following service call will accept English text as an input and output Italian and French text. /translate?from=en&to=fr&to=it	☒	☐
	The Translator service can be used to translate documents from English to French.	☒	☐

NEW QUESTION # 228

You have the process shown in the following exhibit.

Which type AI solution is shown in the diagram?

- A. a sentiment analysis solution
- B. a machine learning model
- C. a computer vision application
- D. a chatbot

Answer: D

NEW QUESTION # 229

Select the answer that correctly completes the sentence.

Answer Area

In a machine learning model, the data that is used as inputs are called

Microsoft

labels.
features.
functions.
labels.
instances.

Answer:

Explanation:

Answer Area

In a machine learning model, the data that is used as inputs are called

Microsoft

labels.
features.
functions.
labels.
instances.

Explanation:

Answer Area

Microsoft

In a machine learning model, the data that is used as inputs are called

labels.

NEW QUESTION # 230

You are building an AI system.

Which task should you include to ensure that the service meets the Microsoft transparency principle for responsible AI?

- A. Enable autoscaling to ensure that a service scales based on demand.
- B. Ensure that a training dataset is representative of the population.
- C. Provide documentation to help developers debug code.
- D. Ensure that all visuals have an associated text that can be read by a screen reader.

Answer: C

Explanation:
