

# AI-900 Reliable Test Materials - Latest AI-900 Training

BONUS!!! Download part of Pass4training AI-900 dumps for free: <https://drive.google.com/open?id=13D6ki0wwdCdzwPdzh3n6v9QjcpAYWc6>

Our company has been putting emphasis on the development and improvement of AI-900 test prep over ten year without archaic content at all. So we are bravely breaking the stereotype of similar content materials of the exam, but add what the exam truly tests into our AI-900 exam guide. So we have adamant attitude to offer help rather than perfunctory attitude. All AI-900 Test Prep is made without levity and the passing rate has up to 98 to 100 percent now. We esteem your variant choices so all these versions of AI-900 exam guides are made for your individual preference and inclination.

The AI-900 exam covers various AI technologies, including machine learning, natural language processing, computer vision, and cognitive services. AI-900 exam assesses candidates' knowledge of Azure AI services, including Azure Machine Learning, Azure Cognitive Services, and Azure Bot Service. AI-900 exam also evaluates candidates' understanding of AI workloads and how to create and manage AI solutions using Azure tools and services. Passing the AI-900 Exam demonstrates that candidates have foundational knowledge of AI concepts and the ability to leverage Azure AI services to build intelligent solutions.

## High Microsoft Azure AI Fundamentals passing score, AI-900 exam review

AS is known to all of us, no pain, no gain. It's also applied in a AI-900 exam, if we want to pass the AI-900 exam, you also need to pay the time, money as well as efforts. However, induction may be quite difficult for someone who have little time to preparing the AI-900 exam. If you face the same problem like this, our product will be your best choice, the practice materials will provide you the most excellent and best ways for the exam. Our product for the AI-900 Exam will help you to save the time as well as grasp the main knowledge point of the AI-900 exam.

## Microsoft Azure AI Fundamentals Sample Questions (Q290-Q295):

### NEW QUESTION # 290

What is a use case for classification?

- A. predicting whether someone uses a bicycle to travel to work based on the distance from home to work
- B. predicting how many minutes it will take someone to run a race based on past race times
- C. predicting how many cups of coffee a person will drink based on how many hours the person slept the previous night.
- D. analyzing the contents of images and grouping images that have similar colors

**Answer: A**

Explanation:

Section: Describe features of computer vision workloads on Azure

Explanation:

Two-class classification provides the answer to simple two-choice questions such as Yes/No or True/False.

Incorrect Answers:

A: This is Regression.

B: This is Clustering.

D: This is Regression.

Reference:

<https://docs.microsoft.com/en-us/azure/machine-learning/algorithm-module-reference/linear-regression>

<https://docs.microsoft.com/en-us/azure/machine-learning/studio-module-reference/machine-learning-initialize-model-clustering>

### NEW QUESTION # 291

You have a database that contains a list of employees and their photos.

You are tagging new photos of the employees.

For each of the following statements select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
The Face service can be used to group all the employees who have similar facial characteristics.	<input type="radio"/>	<input type="radio"/>
The Face service will be more accurate if you provide more sample photos of each employee from different angles.	<input type="radio"/>	<input type="radio"/>
If an employee is wearing sunglasses, the Face service will always fail to recognize the employee.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area

Microsoft

Statements	Yes	No
The Face service can be used to group all the employees who have similar facial characteristics.	<input checked="" type="radio"/>	<input type="radio"/>
The Face service will be more accurate if you provide more sample photos of each employee from different angles.	<input checked="" type="radio"/>	<input type="radio"/>
If an employee is wearing sunglasses, the Face service will always fail to recognize the employee.	<input type="radio"/>	<input checked="" type="radio"/>

### NEW QUESTION # 292

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

## Answer Area

### Statements

Yes

No

You can use the Speech service to transcribe a call to text.

☐☐

You can use the Text Analytics service to extract key entities from a call transcript.

☐☐

You can use the Speech service to translate the audio of a call to a different language.

☐☐

Answer:

Explanation:

Statements	Yes	No
You can use the Speech service to transcribe a call to text.	<input type="radio"/>	<input type="radio"/>
You can use the Text Analytics service to extract key entities from a call transcript.	<input type="radio"/>	<input type="radio"/>
You can use the Speech service to translate the audio of a call to a different language.	<input type="radio"/>	<input type="radio"/>

Explanation:

Answer Area

### Statements

Yes

No

You can use the Speech service to transcribe a call to text.

☒☐

You can use the Text Analytics service to extract key entities from a call transcript.

☒☐

You can use the Speech service to translate the audio of a call to a different language.

☒☐

This question assesses knowledge of the Azure Cognitive Services Speech and Text Analytics capabilities, as described in the Microsoft Azure AI Fundamentals (AI-900) official study guide and Microsoft Learn modules "Explore natural language processing" and "Explore speech capabilities." These services are part of Azure Cognitive Services, which provide prebuilt AI capabilities for speech, language, and text understanding.

\* You can use the Speech service to transcribe a call to text # YesThe Speech-to-Text feature in the Azure Speech service automatically converts spoken words into written text. Microsoft Learn explains:

"The Speech-to-Text capability enables applications to transcribe spoken audio to text in real time or from recorded files." This makes it ideal for call transcription, voice assistants, and meeting captioning.

\* You can use the Text Analytics service to extract key entities from a call transcript # YesOnce a call has been transcribed into

text, the Text Analytics service (part of Azure Cognitive Services for Language) can process that text to extract key entities, key phrases, and sentiment. For example, it can identify names, organizations, locations, and product mentions. Microsoft Learn notes: "Text Analytics can extract key phrases and named entities from text to derive insights and structure from unstructured data."

\* You can use the Speech service to translate the audio of a call to a different language # Yes The Azure Speech service also includes Speech Translation, which can translate spoken language in real time. It converts audio input from one language into translated text or speech output in another language.

Microsoft Learn describes this as: "Speech Translation combines speech recognition and translation to translate spoken audio to another language."

### NEW QUESTION # 293

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area	Statements	Yes	No
	You can use Language Service's question answering to query an Azure SQL database.	<input type="radio"/>	<input type="radio"/>
	You should use Language Service's question answering when you want a knowledge base to provide the same answer to different users who submit similar questions.	<input type="radio"/>	<input type="radio"/>
	Language Service's question answering can determine the intent of a user utterance.	<input type="radio"/>	<input type="radio"/>

**Answer:**

Explanation:

Answer Area	Statements	Yes	No
	You can use Language Service's question answering to query an Azure SQL database.	<input type="radio"/>	<input checked="" type="checkbox"/>
	You should use Language Service's question answering when you want a knowledge base to provide the same answer to different users who submit similar questions.	<input checked="" type="checkbox"/>	<input type="radio"/>
	Language Service's question answering can determine the intent of a user utterance.	<input type="radio"/>	<input checked="" type="checkbox"/>

### NEW QUESTION # 294

You are creating an app to help employees write emails and reports based on user prompts. What should you use?

- A. Azure Machine Learning studio
- B. Azure AI Speech
- C. Azure OpenAI in Foundry Models
- D. Azure AI Vision

**Answer: C**

Explanation:

For an app that helps employees write emails and reports based on user prompts, you need a text generation model capable of understanding natural language instructions and producing coherent, contextually appropriate output. Azure OpenAI GPT models- available through Azure AI Foundry (formerly Azure OpenAI Studio)-are specifically designed for such generative tasks. By integrating GPT-3.5 or GPT-4, the app can analyze prompts like "Write a professional email to a client about project updates" and automatically generate polished text in seconds.

The other options do not fit:

- \* A. Azure AI Speech: Converts spoken language to text or text to speech; not suitable for generating written content.
- \* C. Azure AI Vision: Processes and analyzes images or video content.
- \* D. Azure Machine Learning Studio: Used for training, testing, and deploying custom ML models, not directly for content generation.

Therefore, to create a writing-assistance app for emails and reports, the correct solution is B. Azure OpenAI in Foundry Models using GPT-based language generation.

### NEW QUESTION # 295

.....

Our Pass4training will provide you with the most satisfying after sales service. We provide one-year free update service to you one

year after you have purchased AI-900 exam software., which can make you have a full understanding of the latest and complete AI-900 Questions so that you can be confident to pass the exam. If you are unlucky to fail AI-900 exam for the first time, we will give you a full refund of the cost you purchased our dump to make up your loss.
