With the number of people who take the exam increasing, the AIOps-Foundation exam has become more and more difficult for many people. A growing number of people have had difficulty in preparing for the AIOps-Foundation exam, and they have a tendency to turn to the study materials. However, a lot of people do not know how to choose the suitable study materials. We are willing to recommend the AIOps-Foundation Study Materials from our company to you.

In order to provide the most effective AIOps-Foundation exam materials which cover all of the current events for our customers, a group of experts in our company always keep an close eye on the changes of the AIOps-Foundation exam even the smallest one, and then will compile all of the new key points as well as the latest types of exam questions into the new version of our AIOps-Foundation Practice Test, and you can get the latest version of our study materials for free during the whole year. Do not lose the wonderful chance to advance with times.

For candidates who are going to buy AIOps-Foundation training materials online, you may pay more attention to the money safety. We apply the international recognition third party for the payment, so your account and money safety can be guaranteed if you choose us. In addition, we offer you free demo for you to have a try before buying AIOps-Foundation Exam Dumps, so that you can have a deeper understanding of what you are going to buy. AIOps-Foundation exam braindumps contain both questions and answers, and it's convenient for you to check the answers after practicing. We have the online and offline service, and if you have any questions, you can consult us.

Peoplecert DevOps Institute AIOps Foundation V1.0 Sample Questions (Q12-Q17):

NEW QUESTION # 12

What impact on incident related metrics is the desired outcome from AIOps implementation?

- A. Increase in MTTA, Increase in MTTR and Decrease in MTBF
- B. Decrease in MTTA, Decrease in MTTR and Decrease in MTBF
- **C. Decrease in MTTA, Decrease in MTTR and Increase in MTBF**
- D. Decrease in MTTA, Increase in MTTR and Decrease in MTBF

Answer: C

Explanation:

AIOps aims to improve incident-related metrics by:

- * Decreasing Mean Time to Acknowledge (MTTA): Faster detection and acknowledgment of issues.
- * Decreasing Mean Time to Resolve (MTTR): Quicker resolution through automation and actionable insights.
- * Increasing Mean Time Between Failures (MTBF): Enhanced system reliability and reduced frequency of failures.

These improvements lead to more reliable IT operations, as highlighted in the DevOps Institute's AIOps Foundation course.

NEW QUESTION # 13

At which stage does the data pipeline deduplicate data?

- A. Enrichment/filtering
- B. Extraction/collection
- C. Storage
- **D. Cleaning/integration**

Answer: D

Explanation:

In a data pipeline, deduplication occurs during the cleaning and integration stage. This process involves identifying and removing duplicate records to ensure data quality and accuracy. By eliminating redundancies, organizations can maintain a single source of truth, leading to more reliable analytics and decision-making.

The DevOps Institute's AIOps Foundation course underscores the importance of data cleaning and integration in preparing data for effective analysis and operational use.

NEW QUESTION # 14

What does reliability mean?

- A. The ability to not create harm
- B. The ability to be timely and easily maintained
- C. The ability to perform all desired functions
- **D. The ability to keep a functioning state**

Answer: D

Explanation:

Reliability in IT operations refers to a system's ability to consistently perform its intended functions without failure. This involves maintaining a functioning state over time, ensuring that services are available and operating correctly as expected. In the context of AIOps, enhancing reliability is a key objective, achieved through proactive monitoring, predictive analytics, and automated remediation. By leveraging AIOps, organizations can detect potential issues before they impact users, thereby maintaining system reliability and improving overall service quality.

NEW QUESTION # 15

Which definition BEST describes Big Data?

- A. Data sets of structured data that have grown over time
- B. Data sets that live in data warehouses or lakes
- **C. Data sets that are "too large" or diverse causing traditional data processing techniques to be ineffective**
- D. Data sets that are so large they can only be interrogated using AI

Answer: C

Explanation:

Big Data refers to data sets that are so large, fast, or complex that traditional data processing methods are inadequate to handle them. This concept is characterized by the Five V's:

- * Volume: The sheer amount of data generated.
- * Velocity: The speed at which new data is produced and needs to be processed.
- * Variety: The different types of data (structured, unstructured, semi-structured).
- * Veracity: The quality and accuracy of the data.
- * Value: The usefulness of the data for decision-making.

In the context of AIOps, understanding Big Data is crucial as it involves combining big data analytics with machine learning algorithms to enhance IT operations.

NEW QUESTION # 16

The effectiveness of an AIOps implementation is dependent on what performances?

- A. In-house AI skills
- B. Number of data sources
- C. System complexity
- **D. Machine Learning Model Performance**

Answer: D

Explanation:

The effectiveness of an AIOps implementation is significantly influenced by the performance of its machine learning (ML) models. These models are central to analyzing vast amounts of data, identifying patterns, and making predictions that enhance IT operations.

Key factors include:

- * Accuracy: The precision of the ML model in identifying and predicting issues directly impacts the reliability of the AIOps system.
 - * Training Data Quality: High-quality, relevant data is essential for training effective ML models.
 - * Model Adaptability: The ability of the model to adapt to new data and evolving system behaviors ensures sustained effectiveness.
- Therefore, optimizing machine learning model performance is crucial for a successful AIOps deployment.

NEW QUESTION # 17
