## Quiz 2025 NICET ITFAS-Level-1: Latest Inspection and Testing of Fire Alarm Systems Level I Exam Test Fee

We provide the update freely of ITFAS-Level-1 exam questions within one year and 50% discount benefits if buyers want to extend service warranty after one year. The old client enjoys some certain discount when buying other exam materials. We update the ITFAS-Level-1 guide torrent frequently and provide you the latest study materials which reflect the latest trend in the theory and the practice. So you can master the ITFAS-Level-1 Test Guide well and pass the exam successfully. While you enjoy the benefits we bring you can pass the exam. Don't be hesitated and buy our ITFAS-Level-1 guide torrent immediately!

## NICET Inspection and Testing of Fire Alarm Systems Level I Exam Sample Questions (Q77-Q82):

### NEW QUESTION # 77

An inspector has been given a list of 45 devices and 1 fire alarm control unit that needs to be inspected at a job site. The inspector knows it takes on average about 2 minutes to inspect 1 device with documentation. Also, the inspector knows it takes 20 minutes to perform the required tests on the fire alarm control unit and get the system restored.

How long does the inspector tell the owner that the fire alarm system is expected to be impaired?

- A. 1 hour, 50 minutes
- B. 1 hour, 30 minutes
- C. 1 hour, 5 minutes
- D. 1 hour, 10 minutes

**Answer: A**

Explanation:

This question focuses on estimating system impairment time, which is a key planning function when coordinating fire alarm inspections.

Step-by-step breakdown:

- \* 45 devices  $\times$  2 minutes = 90 minutes
- \* FACU testing and restoration = 20 minutes
- \* Total = 90 + 20 = 110 minutes
- \* 110 minutes = 1 hour and 50 minutes

While NFPA 72 doesn't specify how to calculate impairment time, NICET expects Level I technicians to plan and communicate system impairments accurately - part of their responsibilities under:

NICET Level I Content Outline - Domain: Plan and Coordinate Work

"Estimate and communicate the time required to perform inspection and testing tasks while minimizing system impairments."

Therefore, the correct choice is:

D: 1 hour, 50 minutes

**NEW QUESTION # 78**

Records of inspections, testing, and maintenance shall be provided in accordance with which section of NFPA 72?

- A. 7.8.2
- **B. 14.6.3**
- C. 10.5.3
- D. 7.6.6

**Answer: B**

Explanation:

This is a documentation requirement, and it's found in Chapter 14 of NFPA 72, which deals with Inspection, Testing, and Maintenance.

NFPA 72 (2022), Section 14.6.3.1:

"Records shall be retained for a period of one year after the next test and until the next test is performed.

Records shall be made available to the authority having jurisdiction upon request." Section 14.6.3 lays out the format, retention, and content requirements for inspection, testing, and maintenance records.

Correct answer: D. 14.6.3

Tip: For questions involving recordkeeping, head straight to Chapter 14, especially section 14.6.

**NEW QUESTION # 79**

According to NFPA 72, which statement is true as it pertains to the testing of audible alarm notification appliances?

- A. Sound pressure levels are required to be taken during initial acceptance and periodic testing.
- **B. Sound pressure levels are required to be taken during initial acceptance and reacceptance testing.**
- C. Sound pressure levels are required to be taken in hallways only during initial acceptance testing.
- D. Sound pressure levels are required to be taken in sleeping areas only during initial acceptance testing.

**Answer: B**

Explanation:

NFPA 72 requires sound pressure level measurements to verify that audibility meets code requirements. This must be done during initial acceptance and reacceptance testing (e.g., when system changes occur).

NFPA 72 (2022), Section 18.4.7.2:

"Sound pressure level measurements shall be taken and documented during acceptance and reacceptance testing." Correct answer:

B. Sound pressure levels are required to be taken during initial acceptance and reacceptance testing.

**NEW QUESTION # 80**

Which of the following situations is considered an impairment?

- A. Intelligible audibility
- B. Smoke detector within 4 feet of a return air opening

- C. Smoke detector within 4 feet of an air supply diffuser
- D. **Closed sprinkler valve**

**Answer: D**

Explanation:

An impairment occurs when part of the life safety system is disabled or rendered ineffective. A closed sprinkler valve directly disables part of the fire suppression system, which meets the definition of an impairment.

NFPA 72 (2022), Section 3.3.149 - Impairment:

"A condition where a fire protection or life safety system or portion thereof is out of service." Smoke detector placement issues may be a code violation but not a system impairment. Intelligible audibility is a positive attribute, not a problem.

Correct answer: A. Closed sprinkler valve

**NEW QUESTION # 81**

Lights used for fire alarm signaling shall be which of the following colors?

- A. Clear or amber
- B. Clear or nominal white
- C. Clear or blue
- D. **Clear or red**

**Answer: D**

Explanation:

Visible notification appliances used in fire alarm systems (like strobes) must be either clear or red to distinguish them from other building systems.

NFPA 72 (2022), Section 18.5.1.4:

"Visible signals used in fire alarm systems shall be clear or nominal red in color." This ensures standardized visual recognition during fire emergencies.

Correct answer: D. Clear or red

**NEW QUESTION # 82**

.....

Our company has dedicated ourselves to develop the ITFAS-Level-1 latest practice materials for all candidates to pass the exam easier, also has made great achievement after more than ten years' development. As the certification has been of great value, a right ITFAS-Level-1 exam guide can be your strong forward momentum to help you pass the ITFAS-Level-1 Exam like a hot knife through butter. And our ITFAS-Level-1 exam questions are exactly the right one for you as our high quality of ITFAS-Level-1 learning guide is proved by the high pass rate of more than 98%.
