Amazon AWS Certified Cloud Practitioner Sample Questions (Q425-Q430):

NEW QUESTION # 425

Under the AWS shared responsibility model, customers are responsible for which aspects of security in the cloud? (Choose two.)

- A. Hardware management
- B. Firewall management
- C. Facilities management
- D. Visualization management
- E. Encryption management

Answer: B,E

Explanation:

Explanation

With the basic Cloud infrastructure secured and maintained by AWS, the responsibility for what goes into the cloud falls on you. This covers both client and server side encryption and network traffic protection, security of the operating system, network, and firewall configuration, followed by application security and identity and access management.

Firewall configuration remains the responsibility of the end user, which integrates at the platform and application management level.

For example, RDS utilizes security groups, which you would be responsible for configuring and implementing.

NEW QUESTION # 426

Which managed AWS service provides real-time guidance on AWS security best practices?

- A. AWS Systems Manager
- B. AWS X-Ray
- C. Amazon CloudWatch
- D. AWS Trusted Advisor

Answer: D

Explanation:

AWS offers premium services such as AWS Trusted Advisor, which provides real-time guidance to help you reduce cost, increase performance, and improve security.
