It is human nature to pursue wealth and success. No one wants to be a common person. In order to become a successful person, you must sharpen your horizons and deepen your thoughts. Our AWS-Solutions-Associate study materials can help you update yourself in the shortest time. You just need to make use of your spare time to finish learning our AWS-Solutions-Associate Study Materials. So your normal life will not be disturbed. Please witness your growth after the professional guidance of our AWS-Solutions-Associate study materials.

Topics covered in AWS Solutions Architect Associate Exam

Candidates must know the topics before they start of preparation. Because it will really help them in hitting the core. Our **AMAZON AWS-SOLUTIONS-ARCHITECT-ASSOCIATE exam dumps** will include the following topics:

- Design High-Performing Architectures
- Design Cost-Optimized Architectures
- Design Secure Applications and Architectures
- Design Resilient Architectures

Valid AWS-Solutions-Associate Practice Questions - New Exam AWS-Solutions-Associate Braindumps

Because of the different habits and personal devices, requirements for the version of our AWS-Solutions-Associate exam questions vary from person to person. To address this issue, our AWS-Solutions-Associate actual exam offers three different versions for users to choose from. The PC version is the closest to the real test environment, which is an excellent choice for windows - equipped computers. And this version also helps establish the confidence of the candidates when they attend the AWS-Solutions-Associate Exam after practicing.

Amazon AWS Certified Solutions Architect - Associate (SAA-C02) Sample Questions (Q72-Q77):

NEW QUESTION # 72

A user has created a subnet in VPC and launched an EC2 instance within it. The user has not selected the option to assign the IP address while launching the instance. The user has 3 elastic IPs and is trying to assign one of the Elastic IPs to the VPC instance from the console. The console does not show any instance in the IP assignment screen. What is a possible reason that the instance is unavailable in the assigned IP console?

- A. The IP address may be attached to one of the instances
- B. The user has not created an internet gateway
- C. The IP address belongs to a different zone than the subnet zone
- D. The IP addresses belong to EC2 Classic; so they cannot be assigned to VPC

Answer: D

Explanation:

A Virtual Private Cloud (VPC) is a virtual network dedicated to the user's AWS account. A user can create a subnet with VPC and launch instances inside that subnet. When the user is launching an instance he needs to select an option which attaches a public IP to the instance. If the user has not selected the option to attach the public IP then it will only have a private IP when launched. If the user wants to connect to an instance from the internet he should create an elastic IP with VPC. If the elastic IP is a part of EC2 Classic it cannot be assigned to a VPC instance.

NEW QUESTION # 73

A company is running a critical business application on Amazon EC2 instances behind an Application Load Balancer. The EC2 instances run in an Auto Scaling group and access an Amazon RDS DB instance. The design did not pass an operational review because the EC2 instances and the DB instance are all located in a single Availability Zone. A solutions architect must update the design to use a second Availability Zone. Which solution will make the application highly available?

- A. Provision a subnet that extends across both Availability Zones. Configure the Auto Scaling group to distribute the EC2 instances across both Availability Zones. Configure the DB instance for Multi-AZ deployment.
- B. Provision a subnet in each Availability Zone. Configure the Auto Scaling group to distribute the EC2 instances across both Availability Zones. Configure the DB instance with connections to each network.
- C. Provision two subnets that extend across both Availability Zones. Configure the Auto Scaling group to distribute the EC2 instances across both Availability Zones. Configure the DB instance with connections to each network.
- D. Provision a subnet in each Availability Zone. Configure the Auto Scaling group to distribute the EC2 instances across both Availability Zones. Configure the DB instance for Multi-AZ deployment.

Answer: D

NEW QUESTION # 74

A company has deployed a serverless application that invokes an AWS Lambda function when new documents are uploaded to an Amazon S3 bucket. The application uses the Lambda function to process the documents. After a recent marketing campaign, the

company noticed that the application did not process many of The documents What should a solutions architect do to improve the architecture of this application?

- A. Set the Lambda function's runtime timeout value to 15 minutes
- B. Deploy an additional Lambda function Load balance the processing of the documents across the two Lambda functions
- **C. Configure an S3 bucket replication policy Stage the documents in the S3 bucket for later processing**
- D. Create an Amazon Simple Queue Service (Amazon SQS) queue Send the requests to the queue Configure the queue as an event source for Lambda.

Answer: C

NEW QUESTION # 75

A company uses Amazon API Gateway to run a private gateway with two REST APIs in the same VPC. The BuyStock RESTful web service calls the CheckFunds RESTful web service to ensure that enough funds are available before a stock can be purchased. The company has noticed in the VPC flow logs that the BuyStock RESTful web service calls the CheckFunds RESTful web service over the internet instead of through the VPC. A solutions architect must implement a solution so that the APIs communicate through the VPC.

Which solution will meet these requirements with the FEWEST changes to the code?

(Select Correct Option/s and give detailed explanation from AWS Certified Solutions Architect - Associate (SAA-C03) Study Manual or documents)

- A. Add an X-API-Key header in the HTTP header for authorization.
- B. Use a gateway endpoint.
- C. Add an Amazon Simple Queue Service (Amazon SQS) queue between the two REST APIs.
- **D. Use an interface endpoint.**

Answer: D

Explanation:

Using an interface endpoint will allow the BuyStock RESTful web service and the CheckFunds RESTful web service to communicate through the VPC without any changes to the code. An interface endpoint creates an elastic network interface (ENI) in the customer's VPC, and then configures the route tables to route traffic from the APIs to the ENI. This will ensure that the two APIs will communicate through the VPC without any changes to the code.

NEW QUESTION # 76

In regards to IAM you can edit user properties later, but you cannot use the console to change the _____.

- A. default group
- **B. user name**
- C. password

Answer: B

NEW QUESTION # 77

.....

Our AWS-Solutions-Associate exam torrent has three versions which people can choose according to their actual needs: PDF, PC and APP versions. The vision of PDF is easy to download, so people can learn AWS-Solutions-Associate guide torrent anywhere if they have free time. As for PC version, it can simulated real operation of test environment, users can test themselves in mock exam in limited time. This version of our AWS-Solutions-Associate Exam Torrent is applicable to windows system computer. Based on Web browser, the APP version of AWS-Solutions-Associate exam questions can be available as long as there is a browser device can be used.
