To gain all these benefits you need to enroll in the AWS Certified Cloud Practitioner Certification EXAM and put all your efforts to pass the challenging AWS Certified Cloud Practitioner (CLF-C02) exam easily. Do you want to gain all these Amazon CLF-C02

Certification personal and professional advantages? Looking for the quick, proven, and easiest way to pass the final CLF-C02 exam?

Amazon AWS Certified Cloud Practitioner Sample Questions (Q746-Q751):

NEW QUESTION # 746
A customer runs an On-Demand Amazon Linux EC2 instance for 3 hours, 5 minutes, and 6 seconds.
For how much time will the customer be billed?

- A. 3 hours, 5 minutes
- B. 3 hours, 6 minutes
- C. 4 hours
- D. 3 hours, 5 minutes, and 6 seconds

Answer: B

Explanation:
Explanation
Amazon EC2 usage is calculated by either the hour or the second based on the size of the instance, operating system, and the AWS Region where the instances are launched. Pricing is per instance-hour consumed for each instance, from the time an instance is launched until it's terminated or stopped. Each partial instance-hour consumed is billed per-second for Linux instances and as a full hour for all other instance types1. Therefore, the customer will be billed for 3 hours and 6 minutes for running an On-Demand Amazon Linux EC2 instance for 3 hours, 5 minutes, and 6 seconds. References: Understand Amazon EC2 instance-hours billing

NEW QUESTION # 747
Which AWS service uses edge locations to cache content?

- A. Amazon CloudFront
- B. Amazon Simple Queue Service (Amazon SQS)
- C. Amazon Route 53
- D. Amazon Kinesis

Answer: A

Explanation:
Amazon CloudFront is a content delivery network (CDN) that uses edge locations to cache content closer to users, reducing latency and improving performance. It supports the delivery of web content, such as videos and images, by caching copies at edge locations around the world. Amazon Kinesis, SQS, and Route 53 do not utilize edge locations for content caching.

NEW QUESTION # 748
A company needs to run its existing custom, nonproduction workloads in the AWS Cloud quickly and cost-effectively.
The workloads can recover from interruptions easily.
Which pricing model should the company use?

- A. Spot Instances
- B. Dedicated Hosts
- C. Reserved Instances
- D. On-Demand Instances

Answer: A

Explanation:
The correct answer is C because Spot Instances are the pricing model that enables the company to run its existing custom, nonproduction workloads in the AWS Cloud quickly and cost-effectively. Spot Instances are spare Amazon EC2 instances that are available at up to 90% discount compared to On-Demand prices. Spot Instances are suitable for stateless, fault-tolerant, and flexible workloads that can recover from interruptions easily. The other options are incorrect because they are not the pricing model that enables the company to run its existing custom, nonproduction workloads in the AWS Cloud quickly and cost-effectively. Reserved Instances are Amazon EC2 instances that are reserved for a specific period of time (one or three years) in exchange for a lower hourly rate. Reserved Instances are suitable for steady-state or predictable workloads that run for a long duration. On-Demand

Instances are Amazon EC2 instances that are launched and billed at a fixed hourly rate. On-Demand Instances are suitable for short-term, irregular, or unpredictable workloads that cannot be interrupted. Dedicated Hosts are physical servers that are dedicated to a single customer. Dedicated Hosts are suitable for workloads that require regulatory compliance or data isolation. Reference: Amazon EC2 Instance Purchasing Options

NEW QUESTION # 749

A company is running a workload in the AWS Cloud.
Which AWS best practice ensures the MOST cost-effective architecture for the workload?

- A. Caching
- B. Loose coupling
- C. Redundancy
- D. Rightsizing

Answer: D

Explanation:
Explanation
The AWS best practice that ensures the most cost-effective architecture for the workload is rightsizing.
Rightsizing means selecting the most appropriate instance type or resource configuration that matches the needs of the workload.
Rightsizing can help optimize performance and reduce costs by avoiding over-provisioning or under-provisioning of resources1.
Loose coupling, caching, and redundancy are other AWS best practices that can improve the scalability, availability, and performance of the workload, but they do not necessarily ensure the most cost-effective architecture.

NEW QUESTION # 750

A developer needs to build an application for a retail company. The application must provide real-time product recommendations that are based on machine learning.
Which AWS service should the developer use to meet this requirement?

- A. Amazon Transcribe
- B. AWS Health Dashboard
- C. Amazon Personalize
- D. Amazon Forecast

Answer: C

Explanation:
Explanation
Amazon Personalize is a fully managed machine learning service that customers can use to generate personalized recommendations for their users. It can also generate user segments based on the users' affinity for certain items or item metadata. Amazon Personalize uses the customers' data to train and deploy custom recommendation models that can be integrated into their applications.
Therefore, the correct answer is B. You can learn more about Amazon Personalize and its use cases from this page.

NEW QUESTION # 751

......

Discover what to buy, based on your unique investment profile, These are individuals CLF-C02 Valid Dumps Pdf who work regular fulltime jobs and also do some amount of freelance work, At least, they prove that you have the ability to shape yourself.

Amazon CLF-C02 Exam Questions are Real and Recommended By Experts

Therefore, the high pass rate of our CLF-C02 Exam resources is comprehensively guaranteed, You feel the exam is demanding is because that you do not choose a good method.

It is a time we pursuit efficiency and productivity, CLF-C02 so once we make the decision we want to realize it as soon as possible, And our CLF-C02 learning braindumps are easy to understand for the questions and answers are carefully compiled by the professionals.
