

# Amazon SOA-C02 Test Vce Free, Question SOA-C02 Explanations

P.S. Free & New SOA-C02 dumps are available on Google Drive shared by DumpsTests: <https://drive.google.com/open?id=1FeholAK6kgPx3KuJL3PB8WkF3YYr2Nfp>

The system of our SOA-C02 latest exam file is great. It is developed and maintained by our company's professional personnel and is dedicated to provide the first-tier service to the clients. Our system updates the SOA-C02 exam questions periodically and frequently to provide more learning resources and responds to the clients' concerns promptly. Our system will supplement new SOA-C02 latest exam file and functions according to the clients' requirements and surveys the clients' satisfaction degrees about our SOA-C02 cram materials. Our system will do an all-around statistics of the sales volume of our SOA-C02 exam questions at home and abroad and our clients' positive feedback rate of our SOA-C02 latest exam file. Our system will deal with the clients' online consultation and refund issues promptly and efficiently. So our system is great.

The service of giving the free trial of our SOA-C02 practice engine shows our self-confidence and actual strength about study materials in our company. Besides, our company's website purchase process holds security guarantee, so you needn't be anxious about download and install our SOA-C02 Exam Questions. With our company employees sending the link to customers, we ensure the safety of our SOA-C02 study materials that have no virus.

## Question SOA-C02 Explanations - Valid SOA-C02 Exam Prep

Now you can pass SOA-C02 exam without going through any hassle. You can only focus on SOA-C02 exam dumps provided by the DumpsTests, and you will be able to pass the SOA-C02 test in the first attempt. We provide high quality and easy to understand SOA-C02 pdf dumps with verified SOA-C02 for all the professionals who are looking to pass the SOA-C02 exam in the first attempt. The SOA-C02 training material package includes latest SOA-C02 PDF questions and practice test software that will help you to pass the SOA-C02 exam.

## Amazon AWS Certified SysOps Administrator - Associate (SOA-C02) Sample Questions (Q101-Q106):

### NEW QUESTION # 101

A SysOps administrator is unable to launch Amazon EC2 instances into a VPC because there are no available private IPv4 addresses in the VPC. Which combination of actions must the SysOps administrator take to launch the instances? (Select TWO.)

- A. Create a new subnet for the VPC
- **B. Associate a secondary IPv4 CIDR block with the VPC**
- **C. Modify the CIDR block of the VPC**
- D. Modify the CIDR block of the subnet that is associated with the instances
- E. Associate a primary IPv6 CIDR block with the VPC

**Answer: B,C**

#### NEW QUESTION # 102

A SysOps administrator is reviewing AWS Trusted Advisor recommendations. The SysOps administrator notices that all the application servers for a finance application are listed in the Low Utilization Amazon EC2 Instances check. The application runs on three instances across three Availability Zones. The SysOps administrator must reduce the cost of running the application without affecting the application's availability or design.

Which solution will meet these requirements?

- **A. Apply rightsizing recommendations from AWS Cost Explorer to reduce the instance size.**
- B. Scale up the instance size of the application servers.
- C. Provision an Application Load Balancer in front of the instances.
- D. Reduce the number of application servers.

**Answer: A**

Explanation:

To reduce the cost of running the application without affecting availability or design, applying rightsizing recommendations from AWS Cost Explorer to reduce the instance size is the best approach.

\* Rightsizing Recommendations:

\* AWS Cost Explorer provides rightsizing recommendations that help you identify underutilized instances.

\* By resizing instances to a more appropriate size based on their utilization, you can reduce costs while maintaining performance.

\* Steps to Implement:

\* Open the AWS Cost Management console.

\* Navigate to "Cost Explorer" and select "Rightsizing Recommendations."

\* Review the recommendations and choose to resize the instances based on their actual usage.

\* Advantages:

\* Rightsizing ensures that you are not paying for unused resources while maintaining the necessary capacity and performance for your application.

AWS Cost Explorer Rightsizing Recommendations

#### NEW QUESTION # 103

A company has many accounts in an organization in AWS Organizations. The company must automate resource provisioning from the organization's management account to the member accounts.

Which solution will meet this requirement?

- A. Create an AWS CloudFormation nested stack. Deploy the nested stack to all member accounts.
- B. Create an AWS Serverless Application Model (AWS SAM) template. Deploy the template to all member accounts.
- **C. Create an AWS CloudFormation stack set. Deploy the stack set to all member accounts.**
- D. Create an AWS CloudFormation change set. Deploy the change set to all member accounts.

**Answer: C**

Explanation:

Using CloudFormation Stack Sets:

\* CloudFormation stack sets allow you to deploy CloudFormation stacks across multiple AWS accounts and regions.

\* Steps:

\* Go to the AWS Management Console.

\* Navigate to CloudFormation and select "StackSets."

\* Click on "Create StackSet."

\* Provide the template URL or upload a template file.

\* Configure the stack set options and specify the accounts and regions.

\* Deploy the stack set to the specified accounts and regions.

### NEW QUESTION # 104

If your AWS Management Console browser does not show that you are logged in to an AWS account, close the browser and relaunch the console by using the AWS Management Console shortcut from the VM desktop.

If the copy-paste functionality is not working in your environment, refer to the instructions file on the VM desktop and use Ctrl+C, Ctrl+V or Command-C, Command-V.

Configure Amazon EventBridge to meet the following requirements.

1. use the us-east-2 Region for all resources,
2. Unless specified below, use the default configuration settings.
3. Use your own resource naming unless a resource name is specified below.
4. Ensure all Amazon EC2 events in the default event bus are replayable for the past 90 days.
5. Create a rule named RunFunction to send the exact message every 15 minutes to an existing AWS Lambda function named LogEventFunction.
6. Create a rule named SpotWarning to send a notification to a new standard Amazon SNS topic named TopicEvents whenever an Amazon EC2 Spot Instance is interrupted. Do NOT create any topic subscriptions. The notification must match the following structure:

Input Path:

```
{"instance": "$.detail.instance-id"}
```

Input template:

"The EC2 Spot Instance <instance> has been on account."

### Answer:

Explanation:

Here are the steps to configure Amazon EventBridge to meet the above requirements:

Log in to the AWS Management Console by using the AWS Management Console shortcut from the VM desktop. Make sure that you are logged in to the desired AWS account.

Go to the EventBridge service in the us-east-2 Region.

In the EventBridge service, navigate to the "Event buses" page.

Click on the "Create event bus" button.

Give a name to your event bus, and select "default" as the event source type.

Navigate to "Rules" page and create a new rule named "RunFunction"

In the "Event pattern" section, select "Schedule" as the event source and set the schedule to run every 15 minutes.

In the "Actions" section, select "Send to Lambda" and choose the existing AWS Lambda function named "LogEventFunction"

Create another rule named "SpotWarning" In the "Event pattern" section, select "EC2" as the event source, and filter the events on "EC2 Spot Instance interruption" In the "Actions" section, select "Send to SNS topic" and create a new standard Amazon SNS topic named "TopicEvents" In the "Input Transformer" section, set the Input Path to `{"instance": "$.detail.instance-id"}` and Input template to "The EC2 Spot Instance <instance> has been interrupted on account."

Now all Amazon EC2 events in the default event bus will be replayable for past 90 days.

Note:

You can use the AWS Management Console, AWS CLI, or SDKs to create and manage EventBridge resources.

You can use CloudTrail event history to replay events from the past 90 days.

You can refer to the AWS EventBridge documentation for more information on how to configure and use the service:

<https://aws.amazon.com/eventbridge/>

### NEW QUESTION # 105

The SysOps administrator needs to deploy auditing software on all existing and new EC2 instances across multiple Regions, using AWS Systems Manager.

Options:

- A. Load the installer for the auditing software into an Amazon S3 bucket. Connect to every instance by using Systems Manager Fleet Manager Remote Desktop. Download the installer by using the AWS CLI. Run the installer manually.
- B. Create an AWS Lambda function that calls the software installer. Merge the auditing software into the Lambda function by using Lambda layers. Run the Lambda function from each instance by using a scheduled Amazon EventBridge rule.
- **C. Create a Systems Manager Distributor package that includes the auditing software. Store the package in an Amazon S3 bucket. Create a Systems Manager State Manager association in each Region to install the software package on all managed instances in the company's AWS account.**
- D. Create an Amazon EventBridge rule to react to Amazon EC2 RunInstances events. Configure the rule to modify the events to include a step that runs the software installer. Reboot all the instances.

**Answer: C**

Explanation:

Using AWS Systems Manager Distributor and State Manager is an automated and scalable solution for managing software installation across EC2 instances.

Systems Manager Distributor: Allows packaging and distributing the auditing software across multiple Regions.

State Manager Association: Automates software installation on both existing and new instances, ensuring consistent deployment across all managed instances.

Manually connecting to instances or using Lambda is not scalable or efficient for this type of ongoing software management.

## NEW QUESTION # 106

.....

After years of hard work, our SOA-C02 learning materials can take the leading position in the market. Our highly efficient operating system for learning materials has won the praise of many customers. If you are determined to purchase our SOA-C02 learning materials, we can assure you that you can receive an email from our efficient system within 5 to 10 minutes after your payment, which means that you do not need to wait a long time to experience our learning materials. Then you can start learning our SOA-C02 Learning Materials in preparation for the exam.

**Question SOA-C02 Explanations:** <https://www.dumpstests.com/SOA-C02-latest-test-dumps.html>

Success With Money Back Guarantee For SOA-C02, You may wonder how we can assure of the accuracy of SOA-C02 vce files, For this reason, our company is determined to solve this problem and help more IT workers to get SOA-C02 certificate successfully, And our SOA-C02 training braindumps have become their best assistant on the way to pass the exam, Amazon SOA-C02 Test Vce Free Clearly, the pursuit of your satisfaction has always been our common ideal.

The experiences described in the case studies presented SOA-C02 in later chapters are a way to leverage those lessons learned for your data center, The reasons independent workers are, on average, Valid SOA-C02 Exam Prep more satisfied continue to be greater levels of work autonomy, control and flexibility.
