Pdf AWS-Developer Free | Dumps AWS-Developer Download

If you want to check the quality and validity of our Amazon AWS-Developer exam questions, then you can click on the free demos on the website. The free demo has three versions. We only send you the PDF version of the Amazon AWS-Developer study questions. We have shown the rest two versions on our website.

Amazon AWS Certified Developer Associate Exam (DVA-C02) Sample Questions (Q217-Q222):

NEW QUESTION # 217

Which of the following services are key/value stores? Choose 3 answers

- A. Simple Workflow Service
- B. Simple Notification Service
- C. Amazon ElastiCache
- D. DynamoDB
- E. Simple Storage Service

Answer: B,C,D

NEW QUESTION # 218

An organization is setting up their website on AWS. The organization is working on various security measures to be performed on the AWS EC2 instances. Which of the below mentioned security mechanisms will not help the organization to avoid future data leaks

and identify security weaknesses?

- A. Run penetration testing on AWS with prior approval from Amazon.
- B. Perform a hardening test on the AWS instance.
- C. Perform SQL injection for application testing.
- **D. Perform a Code Check for any memory leaks.**

Answer: D

Explanation:

AWS security follows the shared security model where the user is as much responsible as Amazon. Since Amazon is a public cloud it is bound to be targeted by hackers. If an organization is planning to host their application on AWS EC2, they should perform the below mentioned security checks as a measure to find any security weakness/data leaks:

Perform penetration testing as performed by attackers to find any vulnerability. The organization must take an approval from AWS before performing penetration testing. Perform hardening testing to find if there are any unnecessary ports open. Perform SQL injection to find any DB security issues. The code memory checks are generally useful when the organization wants to improve the application performance.

NEW QUESTION # 219

A developer has written an application that runs on Amazon EC2 instances and generates a value every minute. The Developer wants to monitor and graph the values generated over time without logging in to the instance each time.

Which approach should the Developer use to achieve this goal?

- A. Use the Amazon CloudWatch metrics reported by default for all EC2 instances. View each value from the CloudWatch console.
- B. Develop the application to store each value in a file on Amazon S3 every minute with the Unix timestamp as the name.
- **C. Publish each generated value as a custom metric to Amazon CloudWatch using available AWS SDKs.**
- D. Store each value as a variable and add the variable to the list of EC2 metrics that should be reported to the Amazon CloudWatch console.

Answer: C

NEW QUESTION # 220

A Developer executed a AWS CLI command and received the error shown below:

```
A client error (UnauthorizedOperation) occurred when calling the RunInstances operation:
You are not authorized to perform this operation. Encoded authorization failure message:
oGsbAaIV7wlfj8zUqebHUANHfBmkzILlxyj_y9xwhIHk99U_cUq1FIeZnskWDjQ1wSHStVfdCEyZILGoccGpCiC
IhORceWF9rRwFTnEcRJ3N9iTrPAE1WHveC5Z54ALPaW1EjH1Lg8CaB8d81CKmxQuylCm0r1Bf2fHJRujAYopMVmga
8olFmKAl9yn_Z5rI120Q9p5ZIMX28zYM4dTulcJQUJQjosgrEejfiIMYDda817Ooko9H6VmGJX62KfkRa517yE6hhh
2bIwA6tpyQoy2LWFRTe4batqAyoqkarhPA4mGiZyWn4gSqbO8o-
uqSIvWYPweaKCKampa0arcFR4gBD7Ph097WYBkzX9hVjGppLMy4jpXRv
```

What action should the Developer perform to make this error human-readable?

- A. Use the AWS IAM decode-authorization-message API to decode this message.
- B. Make a call to AWS KMS to decode the message.
- C. Use an open source decoding library to decode the message.
- **D. Use the AWS STS decode-authorization-message API to decode the message.**

Answer: D

Explanation:

Explanation

<https://docs.aws.amazon.com/cli/latest/reference/sts/decode-authorization-message.html> The message is encoded because the details of the authorization status can constitute privileged information that the user who requested the operation should not see. To decode an authorization status message, a user must be granted permissions via an IAM policy to request the `DecodeAuthorizationMessage` (`sts:DecodeAuthorizationMessage`) action.

NEW QUESTION # 221

A development team is working on a mobile app that allows users to upload pictures to Amazon S3. The team expects the app will be used by hundreds of thousands of users during a single event simultaneously. Once the pictures are uploaded, the backend service will scan and parse the pictures for inappropriate content.

Which approach is the MOST resilient way to achieve this goal which also smooths out temporary volume spikes for the backend service?

- A. When the user uploads a picture, invoke an API hosted in Amazon API Gateway. The API will invoke an AWS Lambda function to scan and parse the picture.
- B. Develop an AWS Lambda function to check the upload folder in the S3 bucket. If new uploaded pictures are detected, the Lambda function will scan and parse them.
- **C. Create a state machine in AWS Step Functions to check the upload folder in the S3 bucket. If a new picture is detected, invoke an AWS Lambda function to scan and parse it.**
- D. Once a picture is uploaded to Amazon S3, publish the event to an Amazon SQS queue. Use the queue as an event source to trigger an AWS Lambda function. In the Lambda function, scan and parse the picture.

Answer: C

NEW QUESTION # 222

.....

Through years of efforts and constant improvement, our AWS-Developer study materials stand out from numerous study materials and become the top brand in the domestic and international market. Our company controls all the links of AWS-Developer study materials which include the research, innovation, survey, production, sales and after-sale service strictly and strives to make every link reach the acme of perfection. Our company pays close attention to the latest tendency among the industry and the clients' feedback about our AWS-Developer Study Materials.
