Analytics-Admn-201 Latest Dumps Questions - Reliable Analytics-Admn-201 Exam Dumps

The desktop Salesforce Certified Tableau Server Administrator (Analytics-Admn-201) practice exam software helps its valued customer to be well aware of the pattern of the real Analytics-Admn-201 exam. You can try a free Salesforce Certified Tableau Server Administrator (Analytics-Admn-201) demo too. This Salesforce Certified Tableau Server Administrator (Analytics-Admn-201) practice test is customizable and you can adjust its time and Salesforce Certified Tableau Server Administrator (Analytics-Admn-201) exam questions.

Your performance and exam skills will be improved with our Analytics-Admn-201 practice test software. The software provides you with a range of Analytics-Admn-201 exam dumps, all of which are based on past Salesforce Analytics-Admn-201 certification. Either way, the Analytics-Admn-201 Practice Exam software will provide you with feedback on your performance. The Salesforce Certified Tableau Server Administrator (Analytics-Admn-201) practice test software also includes a built-in timer and score tracker so students can monitor their progress.

Reliable Salesforce Analytics-Admn-201 Exam Dumps - Analytics-Admn-201 Reliable Exam Materials

We provide top quality verified Salesforce certifications preparation material for all the Analytics-Admn-201 exams. Our Analytics-Admn-201 certified experts have curated questions and answers that will be asked in the real exam, and we provide money back guarantee on PracticeTorrent Salesforce preparation material. Moreover, we also offer Analytics-Admn-201 practice software that will help you assess your skills before real Analytics-Admn-201 exams. Here is exclusive Salesforce bundle deal, you can get all Analytics-Admn-201 exam brain dumps now at discounted price.

Salesforce Certified Tableau Server Administrator Sample Questions (Q23-Q28):

NEW QUESTION # 23
What are two features of the Tableau Server user-based license? (Choose two.)

- A. A subscription license
- B. A perpetual license
- C. Restricts the number of machine cores you can deploy
- D. Enables distinct user roles

Answer: A,D

Explanation:
Tableau Server's user-based licensing model assigns licenses to individual users (Creator, Explorer, Viewer) rather than machines or cores. Key features include:
* Subscription license: Licenses are typically subscription-based, renewed annually or monthly, aligning with Tableau's pricing model.
* Distinct user roles: It supports three roles (Creator, Explorer, Viewer), each with specific capabilities, enabling granular access control.
* Option A (A subscription license): Correct. User-based licenses are subscription-based by default.
* Option B (Enables distinct user roles): Correct. The model defines Creator, Explorer, and Viewer roles.

* Option C (Restricts the number of machine cores): Incorrect. This applies to core-based licensing, not user-based.
* Option D (A perpetual license): Incorrect. Perpetual licenses were phased out; user-based licenses are subscription-based as of recent models.
Reference: Tableau Server Documentation - "Licensing Overview" (https://help.tableau.com/current/server/en-us/license_usage.htm).

NEW QUESTION # 24
Which two options can be configured by a server administrator per site? (Choose two.)

- A. Limitation on storage space
- B. Language and locale
- C. Limitation on number of users
- D. Ability to embed credentials

Answer: A,B

Explanation:
Tableau Server supports multi-tenancy via sites, each with customizable settings managed by server or site administrators. Let's analyze what's configurable per site:
* Site Settings: Found in the web UI under Site > Settings > General. Server admins can override site admin settings.
* Option B (Limitation on storage space): Correct.
* Details: Server admins can set a storage quota per site (e.g., 100 GB) to cap disk usage for extracts and workbooks.
* How: In TSM or site settings (if enabled)-e.g., tsm configuration set -k site.storage.quota -v
100000.
* Impact: Prevents one site from monopolizing resources in multi-site deployments.
* Option D (Language and locale): Correct.
* Details: Each site can set its language (e.g., English, French) and locale (e.g., date/number formats).
* How: Site settings UI-e.g., "Language: French, Locale: France."
* Impact: Tailors the user experience per site's audience.
* Option A (Ability to embed credentials): Incorrect.
* Details: Embedding credentials (e.g., in data sources) is a server-wide setting (tsm data-access), not per-site. Site admins can't override it.
* Option C (Limitation on number of users): Incorrect.
* Details: User limits are tied to licenses (server-wide), not configurable per site. Site admins manage user assignments, not quotas.
Why This Matters: Site-specific settings enable tailored governance and resource allocation in multi-tenant environments.
Reference: Tableau Server Documentation - "Site Settings" (https://help.tableau.com/current/server/en-us/site_settings.htm).

NEW QUESTION # 25
You have a server that contains 16 processor cores. What is the default number of VizQL instances configured by the installer?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:
The VizQL Server process in Tableau Server handles rendering visualizations and processing queries for users viewing dashboards or workbooks. During installation, Tableau Server automatically configures the number of VizQL instances based on the number of processor cores on the machine, following this rule:
Default VizQL instances = 2 per node, unless manually adjusted post-installation.
In multi-node setups, additional instances may be added based on core count, but the question specifies a single server with 16 cores.
The installer does not scale VizQL instances linearly with core count by default (e.g., it doesn't set 1 instance per 4 cores). Instead:
For a single-node installation, the default is 2 VizQL instances, regardless of core count (assuming the minimum hardware requirements are met: 8 cores, 32 GB RAM).
Administrators can later adjust this using TSM (e.g., tsm topology set-process) based on performance needs, but the question asks

for the default configured by the installer.

Option A (4): Incorrect. Four instances might be configured manually for a 16-core server, but it's not the default.

Option B (6): Incorrect. Six instances exceed the default for a single node.

Option C (10): Incorrect. Ten instances are far beyond the default and would require manual configuration.

Option D (2): Correct. The installer sets 2 VizQL instances by default on a single-node installation.

Reference: Tableau Server Documentation - "Server Process Settings" (https://help.tableau.com/current/server/en-us/processes.htm).

NEW QUESTION # 26

What is the minimum required free hard disk space recommended for a Tableau Server installation in production?

- A. 32 GB
- B. 64 GB
- C. 15 GB
- D. 50 GB

Answer: D

Explanation:

Tableau Server has specific hardware requirements for production environments to ensure stability and performance. The minimum recommended free disk space for a production installation is 50 GB. This accounts for:

* The installation itself (approximately 1-2 GB).

* Space for log files, temporary files, and extracts managed by the File Store and Data Engine.

* Room for backups and operational overhead.

The full minimum hardware recommendations for a single-node production deployment are:

* 8 CPU cores (2.0 GHz or faster).

* 32 GB RAM.

* 50 GB free disk space (on the system drive, typically C: on Windows).

* Option A (32 GB): Incorrect. While 32 GB is the minimum RAM requirement, it's insufficient for disk space in production.

* Option B (50 GB): Correct. This matches Tableau's official recommendation for production environments.

* Option C (15 GB): Incorrect. 15 GB is the minimum for a non-production or trial installation, not production.

* Option D (64 GB): Incorrect. While 64 GB exceeds the minimum, it's not the specified requirement-

50 GB is sufficient.

Reference: Tableau Server Documentation - "Minimum Hardware Recommendations" (https://help.tableau.com/current/server/en-us/requirements.htm).

NEW QUESTION # 27

A user published a workbook ten days ago. The user can see the workbook on the Server, but she is unable to find the workbook by using Search. What should you do to resolve the problem?

- A. Instruct the user to add tags to the workbook
- B. Instruct the user to re-publish the workbook with keywords
- C. Instruct the user to log out, and then log back in
- D. Run the tsm maintenance reindex-search command

Answer: D

Explanation:

Tableau Server's search functionality relies on an indexed catalog of content (workbooks, data sources, etc.) stored in the Repository. If a user can see a workbook in the UI (e.g., under Content > Workbooks) but not find it via search, the search index may be outdated or corrupted. This can happen due to:

* Indexing delays after publishing.

* Server maintenance or crashes affecting the index.

* Option D (Run the tsm maintenance reindex-search command): Correct. This command rebuilds the search index, ensuring all content (including the user's workbook) is properly cataloged and searchable. Steps:

* Stop Tableau Server (tsm stop).

* Run tsm maintenance reindex-search.

* Start Tableau Server (tsm start).This is a server administrator task and resolves systemic search issues.

* Option A (Re-publish the workbook with keywords): Incorrect. Re-publishing might update the index for that workbook, but it

doesn't fix a broader indexing problem. Keywords enhance relevance, not indexing itself.
* Option B (Add tags to the workbook): Incorrect. Tags improve searchability but don't address an index failure. If the workbook isn't indexed, tags won't help.
* Option C (Log out, and then log back in): Incorrect. This refreshes the user session but doesn't affect the server-side search index.
Why This Matters: A reliable search index is critical for content discovery in large deployments-reindex- search ensures consistency.
Reference: Tableau Server Documentation - "Reindex Search" (https://help.tableau.com/current/server/en-us /cli_maintenance_tsm.htm#reindex-search).

NEW QUESTION # 28

......

Our Analytics-Admn-201 study guide provides free trial services, so that you can gain some information about our study contents, topics and how to make full use of the software before purchasing. It's a good way for you to choose what kind of Analytics-Admn-201 test prep is suitable and make the right choice to avoid unnecessary waste. Besides, if you have any trouble in the purchasing Analytics-Admn-201 practice torrent or trail process, you can contact us immediately and we will provide professional experts to help you online on the Analytics-Admn-201 learning materials.

Reliable Analytics-Admn-201 Exam Dumps: https://www.practicetorrent.com/Analytics-Admn-201-practice-exam-torrent.html

Salesforce Analytics-Admn-201 Latest Dumps Questions Our support team will resolve your issues within 24 hours, Salesforce Analytics-Admn-201 Latest Dumps Questions Please be assured that we will stand firmly by every warrior who will pass the exam, To test out the Analytics-Admn-201 study material, you can download a free Salesforce Analytics-Admn-201 demo from PracticeTorrent, To pass the Analytics-Admn-201 test on your first sitting, you must choose reliable Salesforce Certified Tableau Server Administrator exam study material.

Justifying and Deploying Business Portals, Easy, brief and Analytics-Admn-201 exam-relevant questions and answers provide you the best updated information with supported examples in an easy to understand language.

Wonderful Analytics-Admn-201 Exam Prep: Salesforce Certified Tableau Server Administrator demonstrates the most veracious Practice Dumps - PracticeTorrent

Our support team will resolve your issues within Analytics-Admn-201 24 hours, Please be assured that we will stand firmly by every warrior who will pass the exam, To test out the Analytics-Admn-201 study material, you can download a free Salesforce Analytics-Admn-201 demo from PracticeTorrent.

To pass the Analytics-Admn-201 test on your first sitting, you must choose reliable Salesforce Certified Tableau Server Administrator exam study material, Our Salesforce Certified Tableau Server Administrator test torrent has been well received and have reached 99% pass rate with all our dedication.
