In today's society, there are increasingly thousands of people put a priority to acquire certificates to enhance their abilities. With a total new perspective, Analytics-DA-201 study materials have been designed to serve most of the office workers who aim at getting an exam certification. Moreover, Analytics-DA-201 Exam Questions have been expanded capabilities through partnership with a network of reliable local companies in distribution, software and product referencing for a better development. That helping you pass the Analytics-DA-201 exam successfully has been given priority to our agenda.

Salesforce Analytics-DA-201 Exam Syllabus Topics:

Topic	Details
Topic 1	ABAP Core Data Services and Data Modeling: This section of the exam measures the skills of the SAP ABAP Cloud Developer and covers the fundamental understanding of core data services (CDS) and how to design data models in the SAP ABAP environment. Candidates are expected to know how to define, consume, and optimize CDS views effectively to support application development in the cloud.
Topic 2	- SAP Clean Core Extensibility and ABAP Cloud: This part of the exam targets the SAP S 4HANA Technical Consultant and covers concepts of clean core extensibility using ABAP in the cloud. The focus is on in-app and side-by-side extensibility techniques, ensuring that custom code complies with cloud-readiness principles and does not compromise the upgrade stability of core systems.
Topic 3	- ABAP RESTful Application Programming Model: This section of the exam evaluates the capabilities of the SAP S 4HANA Technical Consultant in using the ABAP RESTful Application Programming Model (RAP). It focuses on understanding the structure and components of RAP, including behavior definitions, service bindings, and metadata extension. The goal is to validate the ability to develop modern and scalable applications using RAP.

Topic 4	ABAP SQL and Code Pushdown: This section of the exam measures the competencies of the SAP ABAP Cloud Developer related to performance optimization through ABAP SQL and code pushdown techniques. It ensures that the developer understands how to shift logic to the database layer using efficient SQL scripting to enhance performance in data-intensive applications.
Topic 5	Object-Oriented Design: This section of the exam evaluates the SAP ABAP Cloud Developer's understanding of object-oriented principles in the ABAP context. It focuses on class-based programming, inheritance, interfaces, and polymorphism, all crucial for building modular and maintainable ABAP cloud applications.

Latest Analytics-DA-201 Examcollection - How to Download for PDF Free Analytics-DA-201 Practice Exams

Our Salesforce Certified Tableau Data Analyst exam question has been widely praised by all of our customers in many countries and our company has become the leader in this field. Our product boost varied functions and they include the self-learning and the self-assessment functions, the timing function and the function to stimulate the exam to make you learn efficiently and easily. Thus you could decide whether it is worthy to buy our product or not after you understand the features of details of our product carefully on the pages of our Analytics-DA-201 Study Tool on the website.

Salesforce Certified Tableau Data Analyst Sample Questions (Q124-Q129):

NEW QUESTION # 124

A Data Analyst has a data source that contains the following columns:

Name	Data Type
Order Date	Date
Region	String
State	String
City	String
Sales	Number (decimal)
Profit	Number (decimal)

The analyst has the following FIXED Level of Detail (LOD) expression called Region Sales:

```
{ FIXED [Region] : SUM([Sales]) }
```

The analyst has a view that has a dimension filter on the State column to exclude five states.

What should the analyst do to ensure the five states are also excluded from the LOD expression?

- A. Change the LOD expression to { FIXED [Region], [State] : SUM([Sales]) }.
- B. Right-click the State dimension filter, and then click Attribute.
- C. Drag the LOD expression to the Filters shelf.
- D. Right-click the State dimension filter, and then click Add to Context.

Answer: D

NEW QUESTION # 125

You have the following dataset.

Quarter	Sales	Calculation
2010 Q1	20,301	
2010 Q2	58,872	
2010 Q3	36,522	
2010 Q4	44,261	0.66%
2011 Q1	52,982	160.98%
2011 Q2	45,264	-23.11%
2011 Q3	63,121	72.83%
2011 Q4	87,867	98.52%
2012 Q1	77,777	46.80%
2012 Q2	118,448	161.68%
2012 Q3	83,829	32.81%
2012 Q4		

Which formula calculates the percent difference in sales relative to the same quarter the previous year as shown in the Calculation field?

- A. $(\text{SUM}([Sales]) - \text{LOOKUP}(\text{SUM}([Sales]), -4)) / (\text{LOOKUP}(\text{SUM}([Sales]), -4))$
- B. $(\text{SUM}([Sales]) / (\text{LOOKUP}(\text{SUM}([Sales]), -4)))$
- C. $(\text{SUM}([Sales]) - \text{LOOKUP}(\text{SUM}([Sales]), -4))$
- D. $(\text{ZN}(\text{SUM}([Sales])) - \text{LOOKUP}(\text{ZN}(\text{SUM}([Sales])), -4))$

Answer: A

Explanation:

The formula in option B calculates the percent difference in sales relative to the same quarter the previous year. It subtracts the sales of the same quarter from the previous year from the current year's sales, and then divides this by the previous year's sales. This gives a percentage change, which aligns with what is shown in the Calculation field of your dataset. The LOOKUP function returns the value of a specified offset from the current row in the partition. In this case, the offset is -4, which means the value of the same measure four rows above the current row. This corresponds to the same quarter of the previous year, assuming the data is sorted by quarter. References:

NEW QUESTION # 126

What should a Data Analyst use to visualize the distribution and variability of measure values along an axis?

- A. Histogram
- B. Box Plot
- C. Scatter Plot
- D. Bullet Graph

Answer: B

NEW QUESTION # 127

You are the owner of an alert.

You receive an email notification that the alert was suspended.

From where can you resume the suspended alert?

- A. The Notification area of Tableau Prep
- B. The Data Source page of Tableau Desktop
- C. The My Content area of Tableau web pages

- D. The Shared with Me page

Answer: C

Explanation:

To resume a suspended alert, you need to go to the My Content area of Tableau web pages, where you can see all the alerts that you own or subscribe to. You can click on the alert name and then select Resume from the menu. You can also edit or delete the alert from there. References: <https://help.tableau.com/current/pro/desktop/en-us/alerts.htm> https://help.tableau.com/current/pro/desktop/en-us/alerts_manage.htm In Tableau, the "My Content" area on the web interface is the place where a user can manage their content, including workbooks, data sources, and alerts. If an alert is suspended, the owner of the alert can go to the "My Content" area to resume it.

NEW QUESTION # 128

You have the following worksheet.

Answer:

Explanation:

NEW QUESTION # 129

.....

If I tell you, you can get international certification by using Analytics-DA-201 preparation materials for twenty to thirty hours. You must be very surprised. However, you must believe that this is true! You can ask anyone who has used Analytics-DA-201 Actual Exam. We can receive numerous warm feedbacks every day. Our reputation is really good. After you have learned about the achievements of Analytics-DA-201 study questions, you will definitely choose us!
