

Analytics-DA-201 exams questions and answers & dumps PDF for Salesforce Certified Tableau Data Analyst

D) \$2.968 million.

Question #7 of 80

Question ID: 1530979

A portfolio manager currently holds 20,000 shares of Costiuk, Inc., in a particular portfolio. The daily volume of Costiuk shares traded on the stock exchange is 50,000. Additionally, on any given day, the portfolio manager wishes to trade no more than 15% of the daily trading volume of Costiuk. Which of the following amounts is closest to the liquidity duration of Costiuk in this portfolio?

- A) 0.06.
- B) 0.375.
- C) 2.67.
- D) 16.67.

Question #8 of 80

Question ID: 1530955

A firm has determined that the risk-adjusted return on capital (RAROC) for a particular project is 14%. To evaluate whether the firm should accept the project, an analyst determines that the firm's beta is 1.3, the expected market return is 13%, and the risk-free interest rate is 5.5%. If the analyst uses the adjusted RAROC (ARAROC) methodology to make an accept/reject decision, should the project be accepted?

- A) No, because the computed ARAROC is approximately 1% less than the risk-free rate.
- B) No, because the RAROC is 1.25% less than the return predicted by the capital asset pricing model (CAPM).
- C) Yes, because the computed ARAROC is approximately 1% more than the risk-free rate.
- D) Yes, because the ARAROC is approximately 4% more than the return predicted by the CAPM.

Question #9 of 80

Question ID: 1530968

Reliable Analytics-DA-201 Exam Preparation - Analytics-DA-201 New Guide

Files

Are you still staying up for the Analytics-DA-201 exam day and night? If your answer is yes, then you may wish to try our Analytics-DA-201 exam materials. We are professional not only on the content that contains the most accurate and useful information, but also on the after-sales services that provide the quickest and most efficient assistants. With our Analytics-DA-201 practice torrent for 20 to 30 hours, we can claim that you are ready to take part in your Analytics-DA-201 exam and will achieve your expected scores.

Salesforce Analytics-DA-201 Exam Syllabus Topics:

| Topic | Details |
|---------|--|
| Topic 1 | <ul style="list-style-type: none">ABAP RESTful Application Programming Model: This section of the exam evaluates the capabilities of the SAP S/4HANA Technical Consultant in using the ABAP RESTful Application Programming Model (RAP). It focuses on understanding the structure and components of RAP, including behavior definitions, service bindings, and metadata extension. The goal is to validate the ability to develop modern and scalable applications using RAP. |
| Topic 2 | <ul style="list-style-type: none">Core ABAP Programming: This part of the exam assesses the foundational programming skills of the SAP S/4HANA Technical Consultant. It includes knowledge of syntax, control structures, modularization, and internal tables in ABAP. The section aims to validate the candidate's proficiency in writing clean, efficient ABAP code using best practices. |
| Topic 3 | <ul style="list-style-type: none">ABAP SQL and Code Pushdown: This section of the exam measures the competencies of the SAP ABAP Cloud Developer related to performance optimization through ABAP SQL and code pushdown techniques. It ensures that the developer understands how to shift logic to the database layer using efficient SQL scripting to enhance performance in data-intensive applications. |
| Topic 4 | <ul style="list-style-type: none">ABAP Core Data Services and Data Modeling: This section of the exam measures the skills of the SAP ABAP Cloud Developer and covers the fundamental understanding of core data services (CDS) and how to design data models in the SAP ABAP environment. Candidates are expected to know how to define, consume, and optimize CDS views effectively to support application development in the cloud. |

Salesforce Certified Tableau Data Analyst Sample Questions (Q140-Q145):

NEW QUESTION # 140

You have the following dataset.

| Student ID | Subject | Score |
|------------|------------------|-------|
| 1324 | English | 65 |
| 4070 | Science | 71 |
| 685 | Social Studies | 74 |
| 788 | Computer Science | 74 |
| 707 | Science | 51 |
| 741 | Computer Science | 74 |

You want to create a new calculated dimension field named Category that meets the following conditions:

- When Subject is Computer Science or Science, Category must be Sciences.
- When Subject is English or Social Studies, Category must be Humanities.

Which two logical functions achieve the goal? Choose two.

- A. IF ENDSWITH ([Subject], 'Computer Science') THEN 'Sciences' ELSE 'Humanities' END
- B. CASE [Subject]
WHEN 'Computer Science' THEN 'Sciences'
WHEN 'Science' THEN 'Sciences'

```

WHEN 'English' THEN 'Humanities'
WHEN 'Social Studies' THEN 'Humanities'
End
• C. IIF( CONTAINS ([Subject], 'Science') = TRUE) , 'Humanities', 'Sciences'
• D. IF [Subject]- 'Science' THEN 'Sciences'
ELSEIF [Subject]= 'English' THEN 'Humanities'
ELSEIF [Subject]- 'Social Studies' THEN 'Humanities'
ELSEIF [Subject]= 'Computer Science' THEN 'Sciences'
END

```

Answer: B,D

Explanation:

To create a new calculated dimension field named Category that meets the given conditions, you can use either the IF or the CASE logical function. Both functions allow you to evaluate an expression and return a value based on different scenarios. Option A uses the IF function with multiple ELSEIF clauses to check the value of the Subject field and assign it to either 'Sciences' or 'Humanities'. Option D uses the CASE function with multiple WHEN clauses to do the same thing. Both options will produce the same result, but the CASE function is more concise and easier to read. Option B is incorrect because it will assign 'Humanities' to any subject that contains 'Science' in its name, which is not the desired outcome. Option C is incorrect because it will only check if the subject ends with 'Computer Science' and ignore the other subjects. References:

NEW QUESTION # 141

A Data Analyst has the following two tables named Orders and Returns.

| Orders | | | |
|----------------|----------------|-------------|-----------------|
| Order ID | Ship Mode | Customer ID | Customer Name |
| CA-2020-152156 | Second Class | CG-12520 | Claire Gute |
| CA-2020-138688 | Second Class | DV-13045 | Darrin Van Huff |
| US-2019-108966 | Standard Class | SO-20335 | Sean O'Donnell |
| ... | ... | ... | ... |

| Returns | |
|----------|----------------|
| Returned | Order ID |
| Yes | CA-2019-100762 |
| Yes | CA-2020-168921 |
| Yes | CA-2021-100111 |
| ... | ... |

The analyst needs to get the Customer ID and Customer Name for only the orders that were returned. Orders will be the leading table.

Which type of join should the analyst perform in Tableau Prep?

- A. Full join
- B. Inner join
- C. Unmatched only join
- D. Left join

Answer: B

NEW QUESTION # 142

A Data Analyst would like to receive the draft results of a colleague's Tableau Prep flow to start work on a dashboard before it has been published.

What should the analyst do to accomplish this?

- A. Have the colleague output the results of the flow to a .hyper file. Create a new workbook in Tableau Cloud, choose Files on the Connect to Data page, and upload the .hyper file from the computer.
- B. On the Tableau Desktop Connect page, under To a File, choose "More ...", and browse for the colleague's .tf file on the local file system
- C. Have the colleague output the results of the flow to a .hyper file. On the Tableau Desktop Connect page, under To a File, choose "More ...", and browse for the .hyper file on the local file system

- D. Open Tableau Desktop and make a connection to Tableau Prep, then choose the colleague's flow that the analyst wants to connect to.

Answer: C

NEW QUESTION # 143

A Data Analyst has the following two tables named Orders and Returns.

Orders

| Order ID | Ship Mode | Customer ID | Customer Name |
|----------------|----------------|-------------|-----------------|
| CA-2020-152156 | Second Class | CG-12520 | Claire Gute |
| CA-2020-138688 | Second Class | DV-13045 | Darrin Van Huff |
| US-2019-108966 | Standard Class | SO-20335 | Sean O'Donnell |
| ... | ... | ... | ... |

Returns

| Returned | Order ID |
|----------|----------------|
| Yes | CA-2018-100762 |
| Yes | CA-2020-168921 |
| Yes | CA-2021-100111 |
| ... | ... |

The analyst needs to get the Customer ID and Customer Name for only the orders that were returned. Orders will be the leading table.

Which type of join should the analyst perform in Tableau Prep?

- A. Full join
- B. **Inner join**
- C. Unmatched only join
- D. Left join

Answer: B

NEW QUESTION # 144

You have a dataset that contains people and the awards they have won.

Which formula should you use to get the number of different types of awards that have been won?

- A. MAX ({Award})
- B. COVAR({Award})
- C. **COUNTD({Award})**
- D. COUNTD ({NAME})
- E. INDEX()

Answer: C

Explanation:

To get the number of different types of awards that have been won, you should use the formula COUNTD ({Award}). This formula will return the count of distinct values in the Award field, which are the different types of awards that have been won.

The other options are not correct for this scenario. COVAR({Award}) is not a valid function in Tableau. MAX ({Award}) will return the maximum value in the Award field, which may not be a type of award. INDEX() will return the index or rank of each row in a partition, which is not related to the types of awards. References:

https://help.tableau.com/current/pro/desktop/en-us/functions_functions_aggregate.htm#COUNTD https://help.tableau.com/current/pro/desktop/en-us/functions_functions_tablecalculation.htm#INDEX

The COUNTD function in Tableau calculates the number of distinct (unique) items in a field. When looking to get the number of different types of awards that have been won, the COUNTD([Award]) function will count each unique award name only once, regardless of how many times it appears in the dataset. This will return the total number of unique award types.

NEW QUESTION # 145

.....

After the user has purchased our Analytics-DA-201 learning materials, we will discover in the course of use that our product design is extremely scientific and reasonable. Details determine success or failure, so our every detail is strictly controlled. For example, our learning material's Windows Software page is clearly, our Analytics-DA-201 Learning material interface is simple and beautiful. There are no additional ads to disturb the user to use the Salesforce Certified Tableau Data Analyst qualification question. Once you have submitted your practice time, Analytics-DA-201 study tool system will automatically complete your operation.
