

ANS-C01 Test Braindumps: AWS Certified Advanced Networking Specialty Exam & ANS-C01 Quiz Materials & ANS-C01 Exam Torrent

P.S. Free & New ANS-C01 dumps are available on Google Drive shared by Dumps4PDF: https://drive.google.com/open?id=14jaWksgAGkXZBoH77x5T5vm_fWn1ZEvi

If you get the ANS-C01 certification, your working abilities will be proved and you will find an ideal job. We provide you with ANS-C01 exam materials of high quality which can help you pass the exam easily. We provide you with ANS-C01 exam materials of high quality which can help you pass the exam easily. It also saves your much time and energy that you only need little time to learn and prepare for exam. We also provide timely and free update for you to get more ANS-C01 Questions torrent and follow the latest trend. The ANS-C01 exam torrent is compiled by the experienced professionals and of great value.

To prepare for the ANS-C01 exam, candidates can take various courses and training programs offered by AWS. They can also use practice exams and study materials available online. Passing the ANS-C01 exam is a crucial step in becoming an AWS Certified Advanced Networking Specialty professional, which can open up new job opportunities and help professionals stand out in the competitive IT job market.

Amazon ANS-C01 (AWS Certified Advanced Networking Specialty) Certification Exam is a professional-level certification exam designed for individuals who want to validate their skills and knowledge in advanced networking technologies on the Amazon Web Services (AWS) platform. AWS Certified Advanced Networking Specialty Exam certification exam is ideal for network architects, network engineers, and other IT professionals who want to demonstrate their expertise in designing, implementing, and managing complex network solutions on AWS.

The ANS-C01 Exam consists of multiple-choice and multiple-response questions that test the candidate's knowledge and understanding of advanced networking concepts and services in the AWS environment. ANS-C01 exam also includes scenario-based questions that assess the candidate's ability to apply their knowledge to real-world situations.

Comprehensive Amazon ANS-C01 Questions in PDF Format

Three versions of ANS-C01 study materials will be offered by us. Each one has its own advantage, you can pick the proper one for yourself. We also have free demo for you, you can have a look at and decide which version you want to choose. We also have the live chat service and the live off chat service to answer all questions you have. If you failed to pass the exam, money back will be guaranteed, if you have another exam to attend, we will replace another ANS-C01 Study Materials for you freely.

Amazon AWS Certified Advanced Networking Specialty Exam Sample Questions (Q160-Q165):

NEW QUESTION # 160

A company plans to deploy a two-tier web application to a new VPC in a single AWS Region. The company has configured the

VPC with an internet gateway and four subnets. Two of the subnets are public and have default routes that point to the internet gateway. Two of the subnets are private and share a route table that does not have a default route. The application will run on a set of Amazon EC2 instances that will be deployed behind an external Application Load Balancer.

The EC2 instances must not be directly accessible from the internet. The application will use an Amazon S3 bucket in the same Region to store data. The application will invoke S3 GET API operations and S3 PUT API operations from the EC2 instances. A network engineer must design a VPC architecture that minimizes data transfer cost.

Which solution will meet these requirements?

- A. Deploy the EC2 instances in the private subnets. Create a NAT gateway in the VPC. Create default routes in the private subnets to the NAT gateway. Connect to Amazon S3 by using the NAT gateway.
- B. Deploy the EC2 instances in the public subnets. Create an S3 interface endpoint in the VPC. Modify the application configuration to use the S3 endpoint-specific DNS hostname.
- **C. Deploy the EC2 instances in the private subnets. Create an S3 gateway endpoint in the VPC. Specify the route table of the private subnets during endpoint creation to create routes to Amazon S3.**
- D. Deploy the EC2 instances in the private subnets. Create an S3 interface endpoint in the VPC. Modify the application configuration to use the S3 endpoint-specific DNS hostname.

Answer: C

Explanation:

Option C is the optimal solution as it involves deploying the EC2 instances in the private subnets, which provides additional security benefits. Additionally, creating an S3 gateway endpoint in the VPC will enable the EC2 instances to communicate with Amazon S3 directly, without incurring data transfer costs. This is because the S3 gateway endpoint uses Amazon's private network to transfer data between the VPC and S3, which is not charged for data transfer. Furthermore, specifying the route table of the private subnets during endpoint creation will create routes to Amazon S3, which is required for the EC2 instances to communicate with S3.

NEW QUESTION # 161

Your corporate datacenter is located in San Francisco. You have data stored in S3 buckets in US-EAST-2 and US-WEST-2. You want to use a Direct Connect Public Virtual Interface. S3 data should not traverse the Internet. Which statement regarding this configuration is correct?

Response:

- A. A public VIF will support access to only a single region.
- **B. You can create a single Public VIF into US-WEST-2 and access both buckets.**
- C. Public VIFs are needed into US-WEST-2 and US-EAST-2 to access both buckets.
- D. A design with a Single Public VIF provides high availability.
- E. You can create a single Public VIF into US-WEST-2 and a VPN to US-EAST-1 to accomplish these requirements.

Answer: B

NEW QUESTION # 162

Which service parses large Flow Logs for consumption by other programs such as Kibana?

Response:

- A. Elastic Beanstalk
- B. S3
- C. Kinesis
- **D. Elasticsearch**

Answer: D

NEW QUESTION # 163

You wish to access all European regions using your Direct Connect connection. How should you accomplish this?

Response:

- A. One DX connection will connect you to all regions.
- **B. Use a DX Gateway.**
- C. Peer VPCs in the different regions and connect DX to one of the regions to communicate with the other.

- D. Find the prefix list for the other region and add it to your route table.

Answer: B

NEW QUESTION # 164

Which of the following characters is not allowed while creating a Namespace for a CloudWatch metric?

Response:

- A. #
- B. /
- C. @

Answer: C

NEW QUESTION # 165
