These ActualTestsIT ANVE exam dumps will provide you with everything that you need to prepare and pass the final ANVE exam with flying colors.

Axis Network Video Exam Sample Questions (Q32-Q37):

NEW QUESTION # 32

This image represents an enlargement of an actual surveillance image. How could you improve the overall quality of the image? (Choose two)

- A. Change to a camera with higher resolution
- B. Decrease image compression setting

- C. Decrease the gain setting in the camera
- D. Increase the gain setting in the camera
- E. Increase the image compression setting

Answer: A,B

Explanation:

To improve the overall quality of the image:

A: Decrease image compression setting: Lowering the compression setting will reduce artifacts and improve image clarity by preserving more of the original data in each frame. E. Change to a camera with higher resolution: Using a camera with higher resolution will capture more detail and improve the clarity of the enlarged image.

These adjustments ensure better image quality by enhancing the detail and reducing compression artifacts.

Reference: Axis Communications documentation on image quality settings and resolution.

NEW QUESTION # 33

What type of lens does a fixed box camera typically use?

- A. An M12 lens
- B. A C-mount lens
- **C. A CS-mount lens**
- D. ATA-lens

Answer: C

NEW QUESTION # 34

Which features can an outdoor ready camera have to accommodate for changes in weather?

- A. Artic temperature control and IR-cut filter
- B. A cooling fan and an IK rating
- **C. A cooling fan and a heater element**
- D. A heater element and I/O ports

Answer: C

Explanation:

Outdoor-ready cameras from Axis can be equipped with a cooling fan and a heater element to handle varying weather conditions. The cooling fan helps manage high temperatures by preventing overheating, while the heater element ensures the camera operates effectively in cold environments by preventing frost and condensation. These features allow the camera to maintain optimal performance and reliability regardless of the weather, as specified in Axis' product datasheets and technical specifications for outdoor models.

NEW QUESTION # 35

In dark scenes, which feature causes the camera to automatically adjust the exposure when an object approaches?

- A. Zipstream
- B. Electronic image stabilization
- **C. Lightfinder**
- D. OptimizedIR

Answer: C

Explanation:

Lightfinder is a technology developed by Axis that allows cameras to maintain color images even in very low light conditions. In dark scenes, Lightfinder automatically adjusts the exposure when an object approaches, enhancing visibility and detail. This feature is particularly useful for capturing clear images in challenging lighting environments without requiring additional lighting. References: Axis Communications product specifications and technical descriptions of Lightfinder technology.

NEW QUESTION # 36

Match the product series with right product. Drag each gray box from the left column to the matching image box in the right column.
