Visit and download Axis ANVE updated exam questions right away to start the process of cracking your test in one go.

Axis Network Video Exam Sample Questions (Q256-Q261):

NEW QUESTION # 256

If a camera is pointed down a hallway with no windows and the color seems "washed out" or faded, which of the following settings should first be adjusted to improve the image?

- A. Decrease image brightness
- B. Increase image contrast
- C. Adjust the exposure settings
- D. Uncheck backlight compensation

Answer: C

Explanation:

When a camera's image appears "washed out" or faded, especially in a hallway with no windows, the first setting to adjust is the

exposure settings. Proper exposure settings ensure that the camera captures the right amount of light, enhancing image quality and color accuracy. Adjusting settings such as the shutter speed, iris, and gain can help improve the overall image contrast and color fidelity. [Reference: Axis Communications - Image Quality Settings and Adjustments]

NEW QUESTION # 257

What feature allows a PTZ camera to maintain a sharp image even when it is pointed above the horizon?

- A. Speed dry
- B. Cleardome
- C. Sharpdome
- D. Sharpview

Answer: C

Explanation:

The Sharpdome technology allows PTZ cameras to maintain a sharp image even when pointed above the horizon. This feature uses a specialized mechanical design and advanced image processing to ensure clear, undistorted images across the entire dome, including the critical area above the horizon. Axis Communications has integrated Sharpdome technology into several of their PTZ camera models, as explained in their product specifications and technical white papers.

NEW QUESTION # 258

This image represents an enlargement of an actual surveillance image. How could you improve the overall quality of the image? (Choose two)

- A. Decrease image compression setting
- B. Increase the gain setting in the camera
- C. Decrease the gain setting in the camera
- D. Change to a camera with higher resolution
- E. Increase the image compression setting

Answer: A,D

Explanation:

To improve the overall quality of the image:

A: Decrease image compression setting: Lowering the compression setting will reduce artifacts and improve image clarity by preserving more of the original data in each frame. E. Change to a camera with higher resolution: Using a camera with higher resolution will capture more detail and improve the clarity of the enlarged image.

These adjustments ensure better image quality by enhancing the detail and reducing compression artifacts.

Reference: Axis Communications documentation on image quality settings and resolution.

NEW QUESTION # 259

If a camera lens is broken and you need to replace it, you should always disconnect the power and network cables because there is a risk that

- A. The sensor will attract dust.
- B. The camera electronics will short circuit.
- C. The shutter will break.
- D. The lens electronics will short circuit.

Answer: A

NEW QUESTION # 260

When would the most noticeable difference between progressive scan and interlaced video be apparent?

- A. Viewing frame-by-frame recorded video of moving vehicles
- B. Viewing frame-by-frame recorded video of an empty field
- C. During live viewing of a football game
- D. During live viewing of an office lobby, after work hours

Answer: A

NEW QUESTION # 261
