And we apply the latest technologies to let them applied to the electronic devices. If you have any good ideas, our Apigee-API-Engineer Exam Questions are very happy to accept them. Apigee-API-Engineer learning braindumps are looking forward to having more partners to join this family. We will progress together and become better ourselves.

Google Cloud - Apigee Certified API Engineer Sample Questions (Q36-Q41):

NEW QUESTION # 36

As an API Engineer your team would like to make sure you are simulating a user experience prior to a deployment in a production environment. Which tests should be ran to closely resemble a consumer interaction with a APIs?

- A. Smoke tests.
- B. Unit tests
- C. Code quality analysis
- **D. Integration tests**

Answer: D

NEW QUESTION # 37

As an Apigee API Engineer you attend a meeting where a Product Owner would like to release a new feature to customers. There

are several teams in the meeting, Backend API team, Apigee API team, and the Security team. The feature will be exposed through the company's external-facing website. The architecture allows the website to call the backend APIs directly. The security team raises a concern about the backend APIs being wide open to anyone inside the network, not just the external website. You are later contacted and asked for your team's impacts. How should you reply?

- A. You should recommend an Apigee Edge Access Control policy
- B. You should recommend the use of custom secure headers with time stamp verification
- C. You should recommend a design change that uses an Apigee microgateway in front of the backend APIs.
- **D. You should recommend that the backend API's use TLS v1.2 to secure their APIs.**

Answer: D

NEW QUESTION # 38

You are part of an API team working on a versioning strategy for a new API. Several members of the team disagree on how to indicate the version. According to Apigee recommended practices, what would you recommend to the team?

- **A. Use the URI/v1/products/product id**
- B. Use the URI/products/productid/v1
- C. Use the payload.
- D. Use a header version: v1.

Answer: A

NEW QUESTION # 39

You need to restrict write access to those applications that have been specifically delegated that authority by end users. Your project is already using OAuth2 for user and app authentication. What should you do?

- A. Use an OAuth2 scope to identify allowed applications and user granted rights
- B. Create a different URL for updates
- **C. Implement user rights checks in the underlying microservice**
- D. Retrieve user rights from a database by inspecting the user id bound to the OAuth2 token

Answer: C

NEW QUESTION # 40

When retrieving a value from an encrypted KVM, the variable name to which it is assigned must be prefixed with which value to prevent it from being readable in tracing sessions?

- A. mask
- **B. kvm**
- C. encrypted
- D. private
- E. hidden

Answer: B

NEW QUESTION # 41

.....
