Hot Apigee-API-Engineer Spot Questions - Interactive Apigee-API-Engineer EBook

Our Apigee-API-Engineer Research materials design three different versions for all customers. These three different versions include PDF version, software version and online version, they can help customers solve any problems in use, meet all their needs. Although the three major versions of our Apigee-API-Engineer learning materials provide a demo of the same content for all customers, they will meet different unique requirements from a variety of users based on specific functionality. The most important feature of the online version of our Apigee-API-Engineer Learning Materials are practicality. The online version is open to all electronic devices,

which will allow your device to have common browser functionality so that you can open our products. At the same time, our online version of the Apigee-API-Engineer learning materials can also be implemented offline, which is a big advantage that many of the same educational products are not able to do on the market at present.

Earning the Google Apigee-API-Engineer certification demonstrates that the candidate has the skills and expertise required to design and develop high-quality APIs using the Apigee platform. Google Cloud - Apigee Certified API Engineer certification is ideal for developers, architects, and engineers who work with APIs and want to validate their knowledge and skills in this area. Google Cloud - Apigee Certified API Engineer certification also provides a competitive edge in the job market and opens up new career opportunities for certified professionals.

Candidates who pass the Google Apigee-API-Engineer Exam will be awarded the Google Cloud - Apigee Certified API Engineer certification, which will demonstrate their expertise in building and maintaining robust and scalable API solutions using Apigee. Google Cloud - Apigee Certified API Engineer certification can help individuals advance their career in API development and management, and gain recognition as a skilled and knowledgeable API engineer.

Google Cloud - Apigee Certified API Engineer Sample Questions (Q106-Q111):

NEW QUESTION # 106

Which statements are true when the following policy is used? Select all that are correct.

```
<SpikeArrest continueOnError="false" name="Arrest">
<Rate>5ps</Rate>
</SpikeArrest>
```

- A. The `continueOnError` setting means that normal flow processing will resume even if the traffic exceeds the spike arrest rate
- B. It is possible to make fewer than 5 requests in a second and still cause a spike arrest
- C. The rate of 5 per second indicates that 5 requests can be made at any time during a second; but the 6th and later requests during the same second would be rejected
- D. Spike arrest is calculated separately on each message processor, so you could end up with significantly more than 5 calls in a second

Answer: A,C

NEW QUESTION # 107

You need to restrict write access to those applications that have been specifically delegated that authority by end users. Your project is already using OAuth2 for user and app authentication. What should you do?

- A. Create a different URL for updates
- B. Use an OAuth2 scope to identify allowed applications and user granted rights
- C. Retrieve user rights from a database by inspecting the user id bound to the OAuth2 token
- D. Implement user rights checks in the underlying microservice

Answer: B

NEW QUESTION # 108

You have a single back end that needs to be exposed to customers using different API request and response payloads. You need to allow these different request types without breaking existing implementations. What should you do?

- A. Configure the API as a pass-through proxy and invoke backend target system with client request parameters.
- B. Create a new proxy xml and base path with upgraded version and invoke backend target system with required parameters.
- C. Create a new API proxy for new customers and invoke backend target system with required parameters.
- D. Include a new customer requirement in an existing API proxy and invoke backend target system with required parameters.

Answer: B

NEW QUESTION # 109

The product owner has asked you for a new API. This new API will change a configuration for a backend system. The use case

calls for a single API. Which verb should you use?

- A. HEAD
- B. GET
- C. POST
- **D. PUT**

Answer: D

NEW QUESTION # 110

You have implemented an Apigee Edge API proxy that includes a new shared flow. Before you release to production, you need to ensure all dependencies are readied. What should you do?

- A. Execute static code analysis on the bundle
- B. Deploy the shared flow to the production environment
- **C. Alert the quality analysis team and product owner that you are preparing the release**
- D. Run automated unit tests in the test environment

Answer: C

NEW QUESTION # 111
