APMG-International Agile Project Management (AgilePM) Foundation Exam Sample Questions (Q133-Q138):

NEW QUESTION # 133

Which practice provides an interactive environment in which all key players can contribute to the outcome?

- A. Timeboxing
- B. Modelling
- **C. Facilitated Workshop**
- D. Iterative Development

Answer: C

Explanation:

A Facilitated Workshop provides an interactive environment where all key players can contribute to the outcome³. It is a practice within Agile and DSDM that encourages collaboration and active participation from all stakeholders to shape the project's direction and solutions.

NEW QUESTION # 134

Which of the following statements about diverse teams are true?

- * Quicker to make decisions than teams of 'similar.'
- * Members understand each other immediately.

- A. Only 1 is true.
- B. Both 1 and 2 are true.
- **C. Neither 1 nor 2 is true.**
- D. Only 2 is true.

Answer: C

Explanation:

* Statement 1: Incorrect. Diverse teams tend to take longer to make decisions due to differing perspectives and approaches.

However, this trade-off leads to more thorough and creative decision-making, which is a recognized strength of diverse teams.

* Statement 2: Incorrect. Members of diverse teams often require time to align on communication styles, goals, and processes. Effective collaboration in diverse teams is developed through trust-building and active engagement, as outlined in Agile team practices.

Why Diverse Teams Matter in Agile: Agile emphasizes collaboration and innovation, which are enhanced by diverse teams.

However, the process of building trust and understanding takes time. AgilePM recommends fostering inclusivity and addressing conflicts constructively to harness the strengths of diverse teams.

Key AgilePM Concepts Referenced:

* Building Effective Teams: AgilePM Handbook, Chapter 5, Section 5.3.

* Trust and Transparency in Teams: Chapter 4, Section 4.6.

NEW QUESTION # 135

Which of the following is a Scrum Event?

- **A. Sprint**
- B. Sprint Goal
- C. Sprint Backlog
- D. Product Increment

Answer: A

Explanation:

Comprehensive and Detailed 150 to 300 words Explanation From Exact Extract of Agile Project Management (paraphrased with Scrum alignment):

Scrum defines a small set of events within the Sprint to implement empiricism: Sprint Planning, Daily Scrum, Sprint Review, and Sprint Retrospective. Additionally, the Sprint itself is the overarching event—a fixed-length container that sets the cadence for inspection and adaptation, culminating in a usable Increment. By contrast, Sprint Goal is a commitment associated with the Sprint, guiding focus and coherence; Sprint Backlog is an artifact representing the plan for the Sprint; and Product Increment is an artifact representing the latest integrated outcome meeting the Definition of Done. Therefore, among the options, only Sprint is a Scrum Event.

NEW QUESTION # 136

Which approach is recommended for helping people through the 'change curve'?

- A. Assume that everyone will eventually move on in time to deal with the change.
- **B. Actively involve line managers in listening and providing support.**
- C. Advise people not to discuss their problems with colleagues.
- D. Recognize negative emotions as a sign that the change is being managed badly.

Answer: B

Explanation:

* Actively Involve Line Managers: Change management frameworks highlight the importance of involving line managers to support individuals through the emotional phases of the change curve. Line managers can offer guidance, listen to concerns, and provide the reassurance needed to navigate uncertainty.

* Why the Other Options Are Incorrect:

* B: Negative emotions are a normal part of the change curve and should not automatically be seen as mismanagement.

* C: Discouraging discussion can create further resistance and disengagement.

* D: Assuming individuals will adapt over time neglects the need for proactive engagement and support.

Key AgilePM Concepts Referenced:

* Navigating the Change Curve: AgilePM Handbook, Chapter 6, Section 6.3

NEW QUESTION # 137

According to the DSDM principle 'Never Compromise Quality', when should the overall level of quality to be delivered within the solution be agreed?

- A. Whenever the level of solution quality is known.
- B. During evolutionary development
- **C. At the start of the project**
- D. When the Business Advisor is available

Answer: C

Explanation:

According to the DSDM principle 'Never Compromise Quality,' the overall level of quality to be delivered within the solution should be agreed at the start of the project⁵. This principle ensures that quality is not compromised to recover from deviations; instead, the scope of the project will be dynamic⁶.

NEW QUESTION # 138

As a customer you will want to choose low-price and high-passing rate products. Sometime it seems paradoxical. But now our APMG-International AgilePM-Foundation exam questions vce will be a nice choice. If you care about price, there are many companies lower than us, if you care about passing rate I am sure there is little companies higher than us. Our AgilePM-Foundation Exam Questions Vce highlight the quality and value for money; it is really worth to buy in this field.
