

APMG-International ISO-IEC-27001-Foundation Practice Questions - Latest ISO-IEC-27001-Foundation Test Objectives

Solutions is one of the top platforms that has been helping APMG-International ISO-IEC-27001-Foundation exam candidates for many years. Over this long time period countless candidates have passed their dream ISO-IEC-27001-Foundation exam. They all got help from Exams. The APMG-International ISO-IEC-27001-Foundation questions are designed by experience and qualified ISO-IEC-27001-Foundation expert. They work together and strive hard to design and maintain the top standard of Pass4suresVCE ISO-IEC-27001-Foundation Questions. So you rest assured that the APMG-International ISO-IEC-27001-Foundation questions you will not only ace your ISO/IEC 27001 (2022) Foundation Exam certification exam preparation but also be ready to perform well in the final ISO-IEC-27001-Foundation exam.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.
Topic 2	Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.
Topic 3	Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.

Topic 4	Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.
Topic 5	Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.
Topic 6	Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.

2025 APMG-International The Best ISO-IEC-27001-Foundation: ISO/IEC 27001 (2022) Foundation Exam Practice Questions

We have three different versions of ISO/IEC 27001 (2022) Foundation Exam prep torrent for you to choose, including PDF version, PC version and APP online version. Different versions have their own advantages and user population, and we would like to introduce features of these versions for you. There is no doubt that PDF of ISO-IEC-27001-Foundation exam torrent is the most prevalent version among youngsters, mainly due to its convenience for a demo, through which you can have a general understanding and simulation about our ISO-IEC-27001-Foundation Test Braindumps to decide whether you are willing to purchase or not, and also convenience for paper printing for you to do some note-taking.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q11-Q16):

NEW QUESTION # 11

Which aspect of ISO/IEC 27001 requires that contractors know about the organization's information security policies?

- **A. Awareness**
- B. Nonconformity and corrective action
- C. Communication
- D. Competence

Answer: A

Explanation:

Clause 7.3 (Awareness) requires:

"Persons doing work under the organization's control shall be aware of: (a) the information security policy; (b) their contribution to the effectiveness of the ISMS, including the benefits of improved information security performance; (c) the implications of not conforming with the ISMS requirements." This applies not only to employees but also contractors and external parties under the organization's control.

Competence (B) requires having skills, training, and experience, while Communication (C) covers defining communication processes (Clause 7.4). Nonconformity and corrective action (A) is part of Clause 10 (Improvement).

Therefore, the specific requirement that ensures contractors are made aware of the information security policies is found in Clause 7.3 Awareness. Correct answer: D.

NEW QUESTION # 12

Which statement describes the control for the Compliance with policies, rules and standards for information security within Annex A of ISO/IEC 27001?

- **A. Regular review of compliance**
- B. Regular review of contractual compliance
- C. Maintain contact with legal authorities
- D. Return assets to their legal owners

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.36 (Compliance with policies, rules and standards for information security) requires:

"Compliance with the organization's information security policies, rules and standards for information security should be regularly reviewed." This directly matches option A. Option B refers to contractual compliance, which is part of supplier management controls (Annex A.5.19). Option C relates to Annex A.5.7 (Contact with authorities). Option D refers to asset return controls (Annex A.5.9).

Thus, the correct answer is A.

NEW QUESTION # 13

Which benefit is NOT relevant by implementing an ISMS for an organization?

- A. Information security staff will be qualified to ISO/IEC 27001 Foundation level
- B. Information security controls are tailored to suit the organization's specific circumstances
- C. Information security compliance will increase stakeholder trust in the organization
- D. Information security risks are assessed and the probability and/or impact reduced

Answer: A

Explanation:

The benefits of implementing an ISMS under ISO/IEC 27001 are well established. Clause 0.1 (General) explains that an ISMS provides a systematic approach to managing sensitive information and "preserves confidentiality, integrity, and availability of information by applying a risk management process and gives confidence to interested parties that risks are adequately managed." Option A is correct as a benefit, since trust and confidence from stakeholders is an outcome of compliance.

Option C is also a benefit, since controls are chosen and tailored based on organizational context and risk assessment (Clause 6.1.3). Option D reflects another real benefit—reducing the probability and/or impact of incidents through effective risk management. However, staff qualifications (option B) are not guaranteed benefits of implementing an ISMS. While training and competence (Clause 7.2) are required, the standard does not require or provide ISO/IEC 27001 Foundation-level certification for staff. That is an external training/certification scheme, not an ISMS outcome.

Therefore, the benefit NOT relevant to implementing ISO/IEC 27001 is B.

NEW QUESTION # 14

Which audit activity related to ISO/IEC 27001 may be carried out by a practitioner?

- A. Conduct an audit of a Certification Body
- B. Conduct an audit of an Accredited Training Organization
- C. Conduct an internal audit of the organization
- D. Conduct a surveillance audit of their own area of the organization

Answer: C

Explanation:

ISO/IEC 27001 requires internal audits and sets out how they must be conducted: "The organization shall conduct internal audits at planned intervals..." (9.2.1) and "plan, establish, implement and maintain an audit programme(s)... [and] select auditors and conduct audits that ensure objectivity and the impartiality of the audit process" (9.2.2). These extracts confirm that practitioners (internal to the organization) can conduct internal audits provided objectivity and impartiality are ensured (e.g., they do not audit their own work). Surveillance audits (option A) and audits of Accredited Training Organizations or Certification Bodies (options C, D) are third-party activities outside the remit of an internal practitioner under ISO/IEC 27001; the standard's audit requirement is focused on the organization's own internal audit programme. Therefore, conducting an internal audit (B) is the correct practitioner activity per Clause 9.2.

NEW QUESTION # 15

Which statement is a factor that will influence the implementation of the information security management system?

- A. The ISMS will be separate from the organization's overall management structure
- B. The ISMS will be operated as an independent process within the organization
- C. The ISMS will be scaled to the controls according to the needs of the organization

- D. The ISMS will encompass all controls specified within ISO/IEC 27001

Answer: C

Explanation:

ISO/IEC 27001 makes clear that the ISMS is intended to be tailored to the organization. The standard states: "This document also includes requirements for the assessment and treatment of information security risks tailored to the needs of the organization. The requirements set out in this document are generic and are intended to be applicable to all organizations regardless of type, size or nature." This means implementation is scaled based on each organization's risk, context, and needs, not a fixed one-size-fits-all set of activities or controls. Clause 6.1.3 further reinforces that control selection is flexible and risk-driven: "Organizations can design controls as required or identify them from any source," and "Annex A contains a list of possible information security controls... The information security controls listed in Annex A are not exhaustive and additional information security controls can be included if needed." Together, these extracts verify that the ISMS implementation is influenced by and scaled to the organization's needs and selected controls, not separated from management processes (A, D) nor mandated to include "all controls" (B).

NEW QUESTION # 16

.....

As the unprecedented intensity of talents comes in great numbers, what abilities should a talent of modern time possess and finally walk to the success? Well, of course it is ISO-IEC-27001-Foundation exam qualification certification that gives you capital of standing in society. Our ISO-IEC-27001-Foundation preparation materials display a brand-new learning model and a comprehensive knowledge structure on our official exam bank, which aims at improving your technical skills and creating your value to your future. You will be bound to pass the ISO-IEC-27001-Foundation Exam with our advanced ISO-IEC-27001-Foundation exam questions.
