ISO-IEC-27001-Foundation Best Practice - 100% Realistic Questions Pool

We never boost on the achievements of our ISO-IEC-27001-Foundation exam questions. There is no single version of level that is suitable for all exam candidates. Because we are all individual creature has unique requirement. But our ISO-IEC-27001-Foundation training materials are considerate for your preference and convenience. After many years of review, experts boiled their knowledge and experience of the exam down to three versions of ISO-IEC-27001-Foundation Training Materials. They are all booming ISO-IEC-27001-Foundation guide dump in today's market.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q17-Q22):

NEW QUESTION # 17
Which of the following statements about the relationship between ISO/IEC 27001 and ISO/IEC 27002 is true?
* ISO/IEC 27002 provides implementation advice on the controls selected during the ISO/IEC 27001 information security risk management process
* ISO/IEC 27002 provides a process for information security risk management which implements the requirements of ISO/IEC 27001

- A. Only 2 is true
- B. Only 1 is true
- C. Neither 1 or 2 is true
- D. Both 1 and 2 are true

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001 & 27002:2022 standards:
ISO/IEC 27001 Annex A lists reference controls. ISO/IEC 27002 providesdetailed guidance on the implementation of those controls, including purpose, guidance, and examples. Clause 6.1.3 of ISO/IEC
27001 makes the link explicit: controls from Annex A are referenced, but ISO/IEC 27002 explains how to implement them.
However, ISO/IEC 27002 doesnotprovide a process for risk management-that is covered by ISO/IEC
27005. Risk management requirements are in ISO/IEC 27001 (Clauses 6.1.2 and 6.1.3).
Therefore, statement 1 is true, but statement 2 is false. Correct answer:A.

NEW QUESTION # 18
Which item is required to be defined when planning the organization's risk assessment process?

- A. The criteria for acceptable levels of risk
- B. How the effectiveness of the method will be measured
- C. The parts of the ISMS scope which are excluded from the risk assessment
- D. There are NO specific information requirements

Answer: A

Explanation:
Clause 6.1.2 (Information security risk assessment) requires organizations to "define and apply an information security risk assessment process that... establishes and maintains information security risk criteria, including criteria for accepting risk." This means that acceptable levels of risk (risk acceptance criteria) must be explicitly defined. These criteria ensure consistent decision-making when evaluating whether identified risks need further treatment or can be tolerated.
Option A is incorrect because exclusions relate to the ISMS scope (Clause 4.3), not risk assessment planning.
Option B is not a requirement; effectiveness of risk assessment methods is not required to be measured, though methods must be applied consistently. Option D is false-the standard clearly specifies required elements for risk assessment.
Thus, the correct answer isC: The criteria for acceptable levels of risk.

NEW QUESTION # 19
Which attribute is NOT a required focus of continual ISMS improvement?

- A. Importance
- B. Suitability
- C. Effectiveness
- D. Adequacy

Answer: A

Explanation:
Clause 10.2 (Continual Improvement) specifies that the organization must"continually improve the suitability, adequacy and effectiveness of the information security management system." This makes it clear that three attributes are explicitly required to be

addressed:

* Suitability: ensuring the ISMS continues to meet organizational needs in changing contexts.
* Adequacy: ensuring the ISMS covers the necessary scope and provides sufficient control coverage.
* Effectiveness: ensuring the ISMS achieves intended outcomes in protecting information security.

The word "importance" is not part of the continual improvement requirement. Importance is implicit in prioritization of risks and actions, but it is not a required continual improvement attribute in ISO/IEC 27001.

Therefore, option D: Importance is the correct choice as it is not specified.

This distinction reinforces that continual improvement is not about subjective importance, but about systematic enhancement of the ISMS's suitability, adequacy, and effectiveness.

NEW QUESTION # 20

Identify the missing word in the following sentence.

The organization shall determine the [?] of interested parties relevant to information security.

- A. structure
- B. requirements
- C. influence
- D. number

Answer: B

Explanation:

Clause 4.2 of ISO/IEC 27001:2022 states:

"The organization shall determine: a) interested parties that are relevant to the information security management system; b) the relevant requirements of these interested parties; c) which of these requirements will be addressed through the ISMS." This confirms that the missing word is requirements. Neither number, structure, nor influence are specified in the standard.

NEW QUESTION # 21

Which action is an organization required to take to ensure that personnel are competent to perform their assigned tasks within the ISMS?

- A. Ensure all personnel are trained to ISO/IEC 27001 Foundation level
- B. Ensure that the controls for compliance with legal and contractual requirements are implemented
- C. Identify products which could be used in the organization to improve ISMS performance and effectiveness
- D. Hold up-to-date records on training, skills, experience and qualifications

Answer: D

Explanation:

Clause 7.2 (Competence) requires the organization to:

* "determine the necessary competence of person(s) doing work under its control that affects its information security performance;"
* "ensure that these persons are competent on the basis of appropriate education, training, or experience;"
* "retain appropriate documented information as evidence of competence." This makes holding up-to-date records on training, skills, experience, and qualifications (D) the correct answer. Option A is irrelevant to competence. Option B is incorrect since ISO does not require Foundation- level training - competence is context-based. Option C is related to compliance but does not ensure individual competence.

Thus, the verified correct answer is D.
