APS Reliable Braindumps & Leading Offer in Qualification Exams & IOFM Accredited Payables Specialist (APS) Certification Exam

In order to facilitate the wide variety of users' needs the APS study guide have developed three models with the highest application rate in the present - PDF, software and online. Online mode of another name is App of APS study materials, it is developed on the basis of a web browser, as long as the user terminals on the browser, can realize the application which has applied by the APS

simulating materials of this learning model, such as computer, phone, laptop and so on.

IOFM Accredited Payables Specialist (APS) Certification Exam Sample Questions (Q58-Q63):

NEW QUESTION # 58

Which of the following are data security concerns?

- **A. I, II, and III (What data is being accessed; Who is accessing the data; For what purpose the data is being used)**
- B. I and II only (What data is being accessed; Who is accessing the data)
- C. II and III only (Who is accessing the data; For what purpose the data is being used)
- D. I and III only (What data is being accessed; For what purpose the data is being used)

Answer: A

Explanation:

Data security concerns in accounts payable involve protecting sensitive information from unauthorized access or misuse. Key concerns include what data is being accessed (Option I, e.g., sensitive vendor or financial data), who is accessing the data (Option II, e.g., authorized vs. unauthorized users), and for what purpose the data is being used (Option III, e.g., legitimate business needs vs. fraudulent activities). All three are critical to ensuring data security.

The web source from Esker states: "Data security in AP requires monitoring what data is accessed, who is accessing it, and the purpose of access to prevent unauthorized use or breaches." This supports Option D, as all three elements are essential data security concerns.

The IOFM APS Certification Program covers "Internal Controls," including data security practices. The curriculum's focus on "peer-tested best practices" aligns with comprehensive monitoring of data access, users, and purposes to safeguard sensitive information.

IOFM Accounts Payable Specialist (APS) Certification Program, covering Internal Controls Esker: "Data security in AP requires monitoring what data is accessed, who is accessing it, and the purpose of access"

NEW QUESTION # 59

Which of the following has significantly reduced the number of small dollar invoices to be processed?

- A. Electronic data interchange
- **B. Payment cards**
- C. Evaluated receipt settlement
- D. Petty cash

Answer: B

Explanation:

Payment cards, such as procurement cards (P-cards) or corporate credit cards, have significantly reduced the number of small dollar invoices processed by accounts payable departments. By consolidating small, recurring, or low-value purchases onto a single card statement, organizations can avoid processing individual invoices for each transaction, streamlining AP workflows and reducing administrative costs.

The web source from Corcentric states: "Payment cards, like P-cards, significantly reduce the number of small dollar invoices by consolidating multiple purchases into a single statement, minimizing AP processing efforts." This directly supports Option B. The other options are less relevant:

* Petty cash (A) is used for small cash transactions but does not reduce invoice volume, as it typically bypasses invoicing.

* Evaluated receipt settlement (B) eliminates invoices for specific purchases but is not primarily focused on small dollar transactions.

* Electronic data interchange (C) automates invoice data exchange but does not inherently reduce the number of invoices.

The IOFM APS Certification Program covers "Payments," including the role of payment cards in optimizing AP processes. The curriculum's focus on "peer-tested best practices for each phase of the payment process" aligns with the use of payment cards to reduce small dollar invoice processing.

IOFM Accounts Payable Specialist (APS) Certification Program, covering Payments Corcentric: "Payment cards, like P-cards, significantly reduce the number of small dollar invoices by consolidating multiple purchases"

NEW QUESTION # 60

A copy of front and back of the original check, which is legally the same as the original check, is termed a substitute check or:

- **A. An image replacement document**
- B. A surrogate financial instrument
- C. An electronic conversion order
- D. A negotiated bank draft

Answer: A

Explanation:

A substitute check, created under the Check Clearing for the 21st Century Act (Check 21), is a paper reproduction of the front and back of an original check, legally equivalent to the original for processing purposes. It is also known as an image replacement document (IRD), as it replaces the original check with a digital image-based substitute. This facilitates faster check clearing through electronic processing.

The web source from NetSuite states: "A substitute check, also known as an image replacement document (IRD), is a paper copy of the front and back of a check, legally equivalent to the original, created under Check 21." This directly supports Option D. The other options are incorrect:

* Electronic conversion order (A) is not a recognized term.

* Surrogate financial instrument (B) is not a standard term for substitute checks.

* Negotiated bank draft (C) refers to a different financial instrument.

The IOFM APS Certification Program covers "Payments," including check processing and Check 21 regulations. The curriculum's focus on "peer-tested best practices" aligns with the definition of a substitute check as an image replacement document.

References:

IOFM Accounts Payable Specialist (APS) Certification Program, covering Payments NetSuite: "A substitute check, also known as an image replacement document (IRD), is a paper copy of the front and back of a check"

NEW QUESTION # 61

All of the following items are typically addressed in an organization's vendor setup guidelines except:

- **A. Whether or not the vendor outsources its order fulfillment process**
- B. Verification that the vendor is not already in the system
- C. Validating that the person who requested the new vendor is authorized to do so
- D. The conventions for the way letters and abbreviations must be entered

Answer: A

Explanation:

The Vendor Master File topic in the APS Certification Program covers vendor setup guidelines, which ensure consistency, accuracy, and compliance when adding new vendors. Guidelines typically include validating requester authority, standardizing data entry, and checking for duplicates. Whether the vendor outsources its order fulfillment process is a procurement or operational concern, not typically part of VMF setup guidelines.

* Option A (Validating that the person who requested the new vendor is authorized to do so):

Included, to ensure only authorized personnel initiate vendor setups, reducing fraud risk.

* Option B (Whether or not the vendor outsources its order fulfillment process): Not typically included, as this relates to vendor operations, not VMF data or setup compliance. Correct answer.

* Option C (The conventions for the way letters and abbreviations must be entered): Included, to ensure consistent data formatting (e.g., "Inc." vs. "Incorporated") for accurate reporting.

* Option D (Verification that the vendor is not already in the system): Included, to prevent duplicate vendor records, which can lead to errors like double payments.

Reference to IOFM APS Documents: The APS e-textbook under Vendor Master File states, "Vendor setup guidelines include verifying requester authority, standardizing data entry, and checking for duplicates, but operational details like outsourcing fulfillment are handled by Procurement." The training video notes, "Setup guidelines focus on data integrity and compliance, not vendor business processes like fulfillment."

NEW QUESTION # 62

The acronym "VAT" stands for:

- A. Variable added tax
- **B. Value added tax**

- C. Variable assessed tax
- D. Value assessed tax

Answer: B

Explanation:

The Tax and Regulatory Compliance topic in the APS Certification Program covers value-added tax (VAT), a consumption tax levied on the value added at each stage of production or distribution, common in many countries (e.g., EU, Canada). The acronym VAT stands for Value Added Tax, a standard term in tax compliance.

* Option A (Value assessed tax): Incorrect. This is not a recognized term in tax regulations.

* Option B (Variable added tax): Incorrect. The term does not reflect the concept of value added at production stages.

* Option C (Variable assessed tax): Incorrect. This is not a standard tax term.

* Option D (Value added tax): Correct. VAT is universally known as Value Added Tax, as defined by tax authorities and IOFM materials.

Reference to IOFM APS Documents: The APS e-textbook under Tax and Regulatory Compliance defines VAT as "Value Added Tax, a tax on the value added at each stage of goods or services production." The training video explains, "VAT, or Value Added Tax, is a key compliance area for AP in international transactions, requiring accurate invoicing and reporting."

NEW QUESTION # 63

.....

Are you still feeling uncomfortable about giving up a lot of time to entertain, work or accompany your family and friends in preparation for the exam? Using APS quiz torrent, you can spend less time and effort reviewing and preparing, which will help you save a lot of time and energy. Whether you are a worker or student, you will save much time to do something whatever you want. It only needs 5-10 minutes after you pay for our APS learn torrent that you can learn it to prepare for your exam. Actually, if you can guarantee that your effective learning time with APS test preps are up to 20-30 hours, you can pass the exam.
