

Are API API-936 Actual Questions Effective to Get Certified?

P.S. Free & New API-936 dumps are available on Google Drive shared by PassLeader: https://drive.google.com/open?id=1KpDibMuMwF_wVpQWyAIUXhV1B8jU-1BS

In recent years, our API-936 test torrent has been well received and have reached 99% pass rate with all our dedication. As a powerful tool for a lot of workers to walk forward a higher self-improvement, our API-936 certification training continue to pursue our passion for advanced performance and human-centric technology. A good deal of researches has been made to figure out how to help different kinds of candidates to get Refractory Personnel certification. We revise and update the Refractory Personnel guide torrent according to the changes of the syllabus and the latest developments in theory and practice. We base the API-936 Certification Training on the test of recent years and the industry trends through rigorous analysis.

API-936 (Refractory Personnel) Certification Exam is an industry-specific certification program that is designed for individuals who work with refractory materials in various industrial settings. Refractory Personnel certification program is offered by the American Petroleum Institute (API) and is recognized globally as a standard for refractory personnel.

2025 API-936 Practice Test - API Refractory Personnel - High Pass-Rate New API-936 Test Online

Do you have tried the API-936 online test engine? Here we will recommend the API-936 online test engine offered by PassLeader for all of you. Firstly, API-936 online training can simulate the actual test environment and bring you to the mirror scene, which let you have a good knowledge of the actual test situation. Secondly, the API-936 online practice allows self-assessment, which can bring you some different experience during the preparation. You can adjust your API-936 study plan according to the test result after each practice test.

API Refractory Personnel Sample Questions (Q25-Q30):

NEW QUESTION # 25

What temperature is required to form a permanent bond in phosphate-bonded plastic refractory?

- A. 500°F to 700°F (260°C and 370°C)
- B. 50°F to 100°F (10°C and 38°C)
- C. 300°F to 500°F (150°C and 260°C)
- D. 100°F to 300°F (38°C and 150°C)

Answer: A

Explanation:

Phosphate-bonded plastic refractories develop their final bonding during high-temperature exposure. As described in TR 980: "Phosphate-bonded plastics require temperatures between 500°F and 700°F (260°C and 370°C) to form a permanent ceramic bond."

- API TR 980, Section 5.2.3

NEW QUESTION # 26

The most commonly used binder for refractory concrete is

- A. cements
- B. calcium aluminate cement
- C. silicates
- D. all of the above

Answer: B

NEW QUESTION # 27

Who is responsible to provide details of metal fiber reinforcement including dimensions, concentration, type and metallurgy?

- A. Inspector
- B. Manufacturer
- C. Contractor
- D. Owner

Answer: B

Explanation:

The manufacturer is responsible for specifying the exact dimensions, type, concentration, and metallurgical properties of metal fiber reinforcement in castable refractories. These fibers are often integral to the formulation and performance of the material and are introduced during manufacturing (not field mixing), with characteristics tailored to improve thermal shock resistance and crack propagation control.

API 936 defers to the manufacturer's technical data for the design and quality control of any material component, including reinforcement. The contractor is responsible for verifying that materials match the manufacturer's documented specification.

Reference:

API Std 936, Section on "Material Submittals" and "Manufacturer's Technical Data sheets" API TR 978, Section on "Metallic Reinforcement in Monolithics" indicates that fiber specs are a manufacturer responsibility

NEW QUESTION # 28

The standard size of a fabricated test panel for pneumatic gunning qualification is

- A. (700 mm x 700 mm)
- B. None of the above
- C. (500 mm x 500 mm)
- D. (600 mm x 600 mm) 24 " x 24 "

Answer: D

NEW QUESTION # 29

Testing frequency for material qualification of refractory for other services requires

- A. None of the above
- B. 1 sample per 3 pallets or more from each production run
- C. 1 sample per pallet or less from each production run
- D. 1 sample per 3 pallets or less from each production run

Answer: D

NEW QUESTION # 30
