ASIS-PSP exam is a computer-based test that consists of 125 multiple-choice questions. ASIS-PSP Exam is designed to test an individual's knowledge, skills, and abilities in areas such as security risk assessment, security management, and business operations. ASIS-PSP exam is administered by Pearson VUE, a global leader in computer-based testing. Individuals who pass the exam will earn the ASIS-PSP certification and will be recognized as experts in the field of physical security.

ASIS-PSP Certification Exam covers a range of topics including risk assessment, physical security assessments, security design and application, emergency management, and investigations. ASIS-PSP exam is computer-based and consists of 125 multiple-choice questions that must be completed in 2.5 hours. The passing score for the exam is 70%.

The PSP certification exam covers various topics including asset protection, crime prevention, risk assessment, physical security design, and emergency response planning. Once a candidate passes the exam, they will join an elite group of security professionals recognized for their expertise in preventing and responding to physical security threats. Physical Security Professional Exam certification not only enhances career opportunities but also demonstrates a commitment to continuous professional development and a mastery of the skills needed to effectively manage physical security risks.

Do not miss the opportunity to buy the best ASIS-PSP preparation questions in the international market which will also help you to advance with the times.

ASIS Physical Security Professional Exam Sample Questions (Q244-Q249):

NEW QUESTION # 244

Which of the following types of procurement is most frequently used when a customer has intimate knowledge of the requirements defined and the systems available in the market?

- A. Invitation to bid
- B. Request for quote
- C. Request for proposals
- D. Sole source

Answer: A

Explanation:

An Invitation to Bid (ITB) is typically used when the buyer has clearly defined requirements and a good understanding of the market offerings. It focuses on obtaining competitive pricing for known solutions and is suitable for well-specified projects where minimal deviation is expected.

B (Request for proposals) is used when buyer needs input on how to meet requirements.

C (Sole source) limits competition and is only used under specific conditions.

D (Request for quote) is generally used for lower-cost, commodity items.

NEW QUESTION # 245

Which of the following is the category of integrity and lie detection tests?

- A. Polygraph
- B. Personal Security Inventory
- C. Psychological Stress Evaluator
- D. All of the above

Answer: D

Explanation:

Integrity and lie detection tests fall into multiple categories, including:

Polygraph: Measures physiological responses to assess truthfulness.

Psychological Stress Evaluator (PSE): Analyzes voice stress to detect deception.

Personal Security Inventory: A written assessment designed to evaluate honesty and attitudes toward theft or other misconduct.

Each of these tools can play a role in assessing trustworthiness, particularly in high-risk or sensitive positions, and are often part of pre-employment or internal investigation procedures (where legally permissible).

NEW QUESTION # 246

The concept of what requires the mobilization of political, financial and industrial resources for the development and production of

modern homeland security and defense?

- **A. Modern terrorism**
- B. Modern War weapons
- C. International terrorism
- D. Modern Revolutionary

Answer: A

Explanation:

Modern terrorism, unlike historical or localized violence, leverages advanced technologies and global networks. It necessitates comprehensive national strategies involving political decision-making, resource allocation, intelligence, law enforcement, and industry collaboration to combat the sophisticated threats posed.

NEW QUESTION # 247

What allows people to log on to a remote computer and use the resources of that system if they have a valid account?

- A. None of the above
- B. Cabinet
- C. Telecom
- **D. Telnet**

Answer: D

Explanation:

Telnet is a network protocol that allows users to connect to remote computers and access their resources, typically via command-line interface, assuming they have proper credentials. While outdated for secure applications (due to lack of encryption), it was widely used for remote access to systems.

Cabinet (A) and Telecom (C) are unrelated.

"None of the above" (D) is incorrect because Telnet is the correct protocol.

NEW QUESTION # 248

Security is a business unit and its function must:

- **A. Support the organization's mission**
- B. Cycle on a quarterly basis
- C. Be performed at the lowest cost
- D. Be directed by a certified manager

Answer: A

Explanation:

Security is not a standalone function; it must align with and support the broader mission and strategic goals of the organization. This includes protecting assets, enabling business continuity, and ensuring safety in a way that complements business objectives.

A (Quarterly cycle) is not a standard requirement.

B (Certified manager) is good practice but not a defining mandate.

D (Lowest cost) is not always ideal; effectiveness and alignment are more important than minimal cost.
