ASIS Physical Security Professional Exam Sample Questions (Q67-Q72):

NEW QUESTION # 67

Which of the following types of post-implementation testing is MOST likely to involve the use of measuring devices, calibrated instruments, or special methods?

- A. Post-maintenance
- B. Subsystem
- C. **Performance**
- D. Operational

Answer: C

Explanation:

Performance testing typically involves precise measurement using calibrated instruments or devices to ensure systems meet specified performance criteria (e.g., camera resolution, sensor range, alarm response time).

A (Operational) testing checks usability.

C (Subsystem) testing targets individual components.

D (Post-maintenance) confirms system functionality after servicing.

NEW QUESTION # 68

Successful security design recognizes technological developments and integrates:

- A. Operational factors, organizational needs, and the human element
- B. Architectural aspects, security systems, and operational factors
- C. Adversary sequence diagrams, system specifications, and work breakdown structure
- D. Threats, operational factors, and likelihood of occurrence

Answer: A

Explanation:

Effective security design must balance technological advances with operational realities, organizational priorities, and human behavior. This holistic approach ensures the system is usable, sustainable, and aligned with company goals.

A (Adversary diagrams) and B (Threats and likelihood) are analytical tools, not integration principles.

D omits the critical "human element," which affects usability and compliance.

NEW QUESTION # 69

Which records provide detailed, documented records of an applicant's personal history, background, and financial relationships?

- A. Civil litigation
- B. Legal action
- C. All of the above
- D. Civil lawsuit

Answer: C

Explanation:

Legal action, civil lawsuits, and civil litigation all fall under categories of public records that provide documented histories of an individual's involvement in legal or financial disputes. These records can offer valuable insight into behavior patterns, financial stability, and legal integrity - all of which are critical in personnel vetting.

Such records are accessed (where lawful) during comprehensive background checks.

NEW QUESTION # 70

Removing the problem by eliminating the risk is known as:

- A. Risk avoidance
- B. Risk prevention
- C. Risk elimination
- D. Risk reduction

Answer: A

Explanation:

Risk avoidance means eliminating a threat entirely by discontinuing the activity or removing the condition that creates the risk. For example, if transporting valuable goods through a high-risk area poses too much danger, a company might choose to stop shipments

through that route altogether.

NEW QUESTION # 71

Which department has total supervision over a firm's money and will generally be the area most vulnerable to major loss due to crime?

- A. Accounting
 - B. Purchasing
 - C. Shipping and Receiving
 - D. Data-Processing

Answer: A

NEW QUESTION # 72
