With a high pass rate as 98% to 100%, our CIS-SPM training questions can help you achieve your dream easily.

## ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q36-Q41):

### NEW QUESTION # 36

What plugin must be installed to use Capacity Planning in a portfolio?

- A. Collaborative Work Management
- B. Skills Management
- C. Time Card Management
- **D. Portfolio Planning**

**Answer: D**

### NEW QUESTION # 37

When can a user choose from multiple rate types for their work, while logging a time card?

- A. Only one (1) rate type can apply
- B. Only if this capability is enabled in the Project Record
- C. Only if the capability is enabled in the Project Preferences
- **D. Only if the capability is enabled in the Time Sheet Policies**

**Answer: D**

Explanation:

According to the Using rate types and labor rate cards document, a user can choose from multiple rate types for their work, while logging a time card, only if the capability is enabled in the Time Sheet Policies. This capability allows users to select different rate types for different tasks, such as standard, overtime, or travel. The other options are not correct, as they are not the places where the capability can be enabled. The Project Record is used to create and update project details, such as name, description, and state. The Project Preferences are used to set the default values for project fields, such as number, type, and priority. The option C is not correct, as more than one rate type can apply if the capability is enabled.

### NEW QUESTION # 38

The color band at the top of the project card in Project Workspace displays what project attribute?

- A. Risk
- B. Issues
- C. State
- **D. Status**

**Answer: D**

Explanation:

According to the ServiceNow documentation<sup>1</sup>, the color band at the top of the project card in Project Workspace displays the project status. The project status is a calculated field that indicates the health of the project based on the schedule, cost, and scope variance. The color band can be green, yellow, or red, depending on the status value. The other options are incorrect because:  
B . Risk: The risk is a potential problem that could affect the project or its outcome. The risk level is displayed as a circle icon on the project card, not as a color band<sup>2</sup>.

C . State: The state is the current phase of the project, such as Draft, Planning, Work in Progress, or Closed. The state is displayed as a text field on the project card, not as a color band<sup>3</sup>.

D . Issues: The issues are the actual problems that affect the project or its outcome. The number of issues is displayed as a badge icon on the project card, not as a color band<sup>4</sup>.

### NEW QUESTION # 39

The project property to update actual effort from time card is controlled at what level?

- A. Portfolio Level.
- B. Program Level.
- **C. Project Level.**
- D. Application Level (Global).

**Answer: C**

Explanation:

According to the ServiceNow documentation<sup>1</sup>, the project property to update actual effort from time card is controlled at the project level. This property is called Update actual effort from time card and it determines if the Actual effort field on the Dates tab should be updated based on the hours entered from time cards for the project. If set to Yes, the Actual effort field is read-only on the Project and Project Task forms. If set to No, the Actual effort field is editable on the Project and Project Task forms.

### NEW QUESTION # 40

What is the default table that stores the idea categories that a user can select from when submitting an idea?

- A. im\_category
- B. im\_module
- C. dmn\_demand
- D. im\_idea\_core

**Answer: A**

Explanation:

According to the Category Configuration document, the default table that stores the idea categories that a user can select from when submitting an idea is im\_category. This table contains the predefined categories for ideas, such as Business Process, Customer Service, or IT Service. The other options are not correct, as they are not the tables that store the idea categories. The dmn\_demand table stores the demand records that are created from the approved ideas. The im\_module table stores the idea modules that are used to group ideas by different criteria. The im\_idea\_core table stores the core fields of the idea records.

## NEW QUESTION # 41

.....
