In order to let customers enjoy the best service, all Associate-Cloud-Engineer exam prep of our company were designed by hundreds of experienced experts. Our Associate-Cloud-Engineer test questions will help customers learn the important knowledge about exam. At the same time, our Associate-Cloud-Engineer test torrent can help you avoid falling into rote learning habits. You just need to spend 20 to 30 hours on study, and then you can take and pass your Associate-Cloud-Engineer Exam. In addition, the authoritative production team of our Associate-Cloud-Engineer exam prep will update the study system every day in order to make our customers enjoy the newest information.

Google Associate Cloud Engineer Practice Test Questions, Google Associate Cloud Engineer Exam Practice Test Questions

The Google Associate Cloud Engineer certification is aimed at those professionals who deploy applications, manage enterprise solutions, and monitor operations. These individuals have the ability to utilize Google Cloud Console. They also use the command-line interface to carry out basic platform-based roles for the maintenance of multiple deployed solutions. These solutions leverage self-managed or Google-managed services on Google Cloud.

To become a Google Associate Cloud Engineer, you must pass the Associate Cloud Engineer Certification Exam, which consists of 50 multiple-choice questions and lasts for two hours. Associate-Cloud-Engineer Exam assesses your abilities in implementing and managing solutions on Google Cloud Platform, as well as your understanding of the key concepts and technologies used in cloud computing.

Associate-Cloud-Engineer Examinations Actual Questions & Associate-Cloud-Engineer Reliable Braindumps Files

We are conscious of the fact that most of the candidates have a tight schedule which makes it tough to prepare for the Google Associate Cloud Engineer Exam exam preparation. Lead2Passed provides you Google Associate-Cloud-Engineer Exam Questions in 3 different formats to open up your study options and suit your preparation tempo.

Deploying & Implementing Cloud Solutions

To answer the questions related to this domain, the examinees need to show that they know how to deploy and implement Compute Engine resources, Google Kubernetes Engine resources, App Engine resources, Cloud Run resources, and Cloud Functions resources. Moreover, they should have a good understanding of how to deploy and implement data solutions as well as networking resources. They also need to have the capacity to perform the deployment of a solution with the help of Cloud Marketplace. Additionally, their ability to perform the deployment of application infrastructure with the help of Cloud Deployment Manager is required.

Google Associate Cloud Engineer Exam Sample Questions (Q100-Q105):

NEW QUESTION # 100

You recently deployed a new version of an application to App Engine and then discovered a bug in the release. You need to immediately revert to the prior version of the application. What should you do?

- A. On the App Engine Versions page of the GCP Console, route 100% of the traffic to the previous version.
- B. Run `gcloud app restore`.
- C. Deploy the original version as a separate application. Then go to App Engine settings and split traffic between applications so that the original version serves 100% of the requests.
- D. On the App Engine page of the GCP Console, select the application that needs to be reverted and click Revert.

Answer: A

Explanation:

NEW QUESTION # 101

You need to create a custom VPC with a single subnet. The subnet's range must be as large as possible. Which range should you use?

- A. 172.16.0.0/12
- B. 192.168.0.0/16
- C. 0.0.0.0/0
- D. 10.0.0.0/8

Answer: D

Explanation:

The private network range is defined by IETF (Ref: <https://tools.ietf.org/html/rfc1918>) and adhered to by all cloud providers. The supported internal IP Address ranges are:

1. 24-bit block 10.0.0.0/8 (16777216 IP Addresses)
 2. 20-bit block 172.16.0.0/12 (1048576 IP Addresses)
 3. 16-bit block 192.168.0.0/16 (65536 IP Addresses)
- 10.0.0.0/8 gives you the most extensive range - 16777216 IP Addresses.

NEW QUESTION # 102

You are using Data Studio to visualize a table from your data warehouse that is built on top of BigQuery. Data is appended to the data warehouse during the day. At night, the daily summary is recalculated by overwriting the table. You just noticed that the charts in Data Studio are broken, and you want to analyze the problem. What should you do?

- A. Use the BigQuery interface to review the nightly Job and look for any errors
- B. In Cloud Logging create a filter for your Data Studio report
- C. Use Cloud Debugger to find out why the data was not refreshed correctly
- D. Review the Error Reporting page in the Cloud Console to find any errors.

Answer: A

Explanation:

Cloud Debugger helps inspect the state of an application, at any code location, without stopping or slowing down the running app // <https://cloud.google.com/debugger/docs>

NEW QUESTION # 103

A Solutions Architect is designing the architecture for a new three-tier web-based e-commerce site that must be available 24/7. Requests are expected to range from 100 to 10,000 each minute. Usage can vary depending on time of day, holidays, and promotions. The design should be able to handle these volumes, with the ability to handle higher volumes if necessary. How should the Architect design the architecture to ensure the web tier is cost-optimized and can handle the expected traffic? (Choose two.)

- A. Launch Amazon EC2 instances in an Auto Scaling group behind an ELB.
- B. Store all static files in a multi-AZ Amazon Aurora database.
- C. Use Amazon S3 multi-part uploads to improve upload times.
- D. Create an CloudFront distribution pointing to static content in Amazon S3.
- E. Use Amazon Route 53 to route traffic to the correct region.

Answer: A,D

NEW QUESTION # 104

As a cloud engineer, you have been asked to upgrade the free trial of your account and rename it to a production-inventory system. You are getting permission denied error while making the changes. Which of the following permissions will solve the problem?

- A. Billing.account.upgrade
- B. Billing.account.update
- C. Billing.accounts.upgrade
- D. Billing.accounts.update

Answer: D

Explanation:

The required permission is billing.accounts.update on Billing Account resource.
