100% Pass Quiz 2025 Google Associate-Cloud-Engineer: Google Associate Cloud Engineer Exam Fantastic Exam Simulator Fee

These Google Associate Cloud Engineer Exam (Associate-Cloud-Engineer) practice test questions are customizable and give real Google Associate Cloud Engineer Exam (Associate-Cloud-Engineer) exam experience. Windows computers support desktop software. The web-based Associate-Cloud-Engineer Practice Exam is supported by all browsers and operating systems.

Google Associate Cloud Engineer certification exam covers a broad range of topics, including Google Cloud Platform services, infrastructure, networking, security, and application development. Associate-Cloud-Engineer Exam is designed to test your ability to deploy, manage, and monitor applications and services on the Google Cloud Platform, as well as your ability to troubleshoot issues and optimize performance.

Google Associate Cloud Engineer Exam Sample Questions (Q320-Q325):

NEW QUESTION # 320

You want to send and consume Cloud Pub/Sub messages from your App Engine application. The Cloud Pub/Sub API is currently disabled. You will use a service account to authenticate your application to the API. You want to make sure your application can use Cloud Pub/Sub. What should you do?

- **A. Enable the Cloud Pub/Sub API in the API Library on the GCP Console.**
- B. Use Deployment Manager to deploy your application. Rely on the automatic enablement of all APIs used by the application being deployed.
- C. Grant the App Engine Default service account the role of Cloud Pub/Sub Admin. Have your application enable the API on the first connection to Cloud Pub/Sub.
- D. Rely on the automatic enablement of the Cloud Pub/Sub API when the Service Account accesses it.

Answer: A

Explanation:

Quickstart: using the Google Cloud Console

This page shows you how to perform basic tasks in Pub/Sub using the Google Cloud Console.

Note: If you are new to Pub/Sub, we recommend that you start with the interactive tutorial.

Before you begin

Set up a Cloud Console project.

Set up a project

Click to:

Create or select a project.

Enable the Pub/Sub API for that project.

You can view and manage these resources at any time in the Cloud Console.

Install and initialize the Cloud SDK.

Note: You can run the gcloud tool in the Cloud Console without installing the Cloud SDK. To run the gcloud tool in the Cloud Console, use Cloud Shell.

NEW QUESTION # 321

You have a development project with appropriate IAM roles defined. You are creating a production project and want to have the same IAM roles on the new project, using the fewest possible steps. What should you do?

- A. In the Google Cloud Platform Console, use the 'create role from role' functionality.
- B. Use gcloud iam roles copy and specify your organization as the destination organization.
- C. In the Google Cloud Platform Console, use the 'create role' functionality and select all applicable permissions.
- **D. Use gcloud iam roles copy and specify the production project as the destination project.**

Answer: D

NEW QUESTION # 322

You need to select and configure compute resources for a set of batch processing jobs. These jobs take around 2 hours to complete and are run nightly. You want to minimize service costs. What should you do?

- A. Select Google Kubernetes Engine. Use a three-node cluster with micro instance types.
- **B. Select Compute Engine. Use preemptible VM instances of the appropriate standard machine type.**
- C. Select Compute Engine. Use VM instance types that support micro bursting.
- D. Select Google Kubernetes Engine. Use a single-node cluster with a small instance type.

Answer: B

NEW QUESTION # 323

You have a VM instance running in a VPC with single-stack subnets. You need to ensure that the VM instance has a fixed IP address so that other services hosted in the same VPC can communicate with the VM. You want to follow Google-recommended practices while minimizing cost. What should you do?

- A. Reserve a new static external IPv6 address and assign the new IP address to the VM.

- B. Promote the existing IP address of the VM to become a static internal IP address.
- C. Reserve a new static external IP address and assign the new IP address to the VM.
- **D. Promote the existing IP address of the VM to become a static external IP address.**

Answer: D

NEW QUESTION # 324

You are the team lead of a group of 10 developers. You provided each developer with an individual Google Cloud Project that they can use as their personal sandbox to experiment with different Google Cloud solutions. You want to be notified if any of the developers are spending above \$500 per month on their sandbox environment. What should you do?

- A. Create a single billing account for all sandbox projects and enable BigQuery billing exports. Create a Data Studio dashboard to plot the spending per project.
- B. Create a single budget for all projects and configure budget alerts on this budget.
- **C. Create a budget per project and configure budget alerts on all of these budgets.**
- D. Create a separate billing account per sandbox project and enable BigQuery billing exports. Create a Data Studio dashboard to plot the spending per billing account.

Answer: C

NEW QUESTION # 325

.....

To fulfill our dream of helping our users get the Associate-Cloud-Engineer certification more efficiently, we are online to serve our customers 24 hours a day and 7 days a week. Therefore, whenever you have problems in studying our Associate-Cloud-Engineer test training, we are here for you. You can contact with us through e-mail or just send to our message online. And unlike many other customer service staff who have bad temper, our staff are gentle and patient enough for any of your problems in practicing our Associate-Cloud-Engineer study torrent. In addition, we have professional personnel to give you remote assistance on Associate-Cloud-Engineer exam questions.
