

Associate-Google-Workspace-Administrator Unterlagen mit echte Prüfungsfragen der Google Zertifizierung

Außerdem sind jetzt einige Teile dieser DeutschPrüfung Associate-Google-Workspace-Administrator Prüfungsfragen kostenlos erhältlich: <https://drive.google.com/open?id=1qy8C-CWG9WJrYWLbmV2wWMbt9zJPBOrt>

Mit den Schulungsunterlagen zur Google Associate-Google-Workspace-Administrator Zertifizierungsprüfung von DeutschPrüfung können Sie die neuesten Fragen und Antworten zur Google Associate-Google-Workspace-Administrator Zertifizierungsprüfung bekommen und somit die Google Associate-Google-Workspace-Administrator Zertifizierungsprüfung erfolgreich einmalig bestehen. Die Google Associate-Google-Workspace-Administrator Zertifizierungsprüfung ist nützlich für Ihre Berufskarriere. Die Schulungsunterlagen zur Google Associate-Google-Workspace-Administrator Zertifizierungsprüfung von DeutschPrüfung garantieren, dass Sie die Fragen sowie deren Konzept verstehen können.

Google Associate-Google-Workspace-Administrator Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Managing Core Workspace Services: Targeting Workspace Configuration Specialists and Collaboration Platform Engineers, this domain focuses on configuring Gmail (mail routing, DLP, SPF • DKIM), Drive • Shared Drives (sharing policies, quotas), Calendar (resource delegation), Meet (security recording settings), Chat moderation, and Gemini licensing. It also covers AppSheet • Apps Script deployment for workflow automation.
Thema 2	• Managing Data Governance and Compliance: Designed for Data Governance Analysts and Compliance Officers, this section addresses Vault eDiscovery, DLP rule creation for sensitive data protection (credit cards, PII), Drive trust rules for external sharing restrictions, data location controls, and classification via Drive • Gmail labels. It evaluates strategies for Takeout management and regulatory alignment.

Thema 3	• Managing User Accounts, Domains, and Directory: This section measures the skills of Identity Administrators and Directory Managers, covering user lifecycle processes like automated provisioning • de-provisioning, SAML SSO configuration, and GCDS integration. It includes designing OU hierarchies aligned with organizational structures, managing dynamic • security groups, domain verification (MX records), and resource booking permissions for rooms • equipment.
Thema 4	• Troubleshooting Common Issues: Targeting Technical Support Engineers and Systems Administrators, this domain tests diagnostic skills for mail delivery failures (SPF • DMARC analysis), Calendar • Drive permission conflicts, Meet performance issues, and accidental file deletion recovery. It emphasizes log interpretation, HAR file generation, and leveraging the Workspace Status Dashboard for outage identification.

Google Associate-Google-Workspace-Administrator Deutsche, Associate-Google-Workspace-Administrator Simulationsfragen

DeutschPrüfung bietet Ihnen die zielgerichteten Fragenkataloge von guter Qualität, mit denen Sie sich gut auf die Google Associate-Google-Workspace-Administrator Zertifizierungsprüfung vorbereiten können. Die Übungen von DeutschPrüfung sind den echten Prüfungen sehr ähnlich. Wir versprechen, dass Sie nur einmal die Google Associate-Google-Workspace-Administrator Zertifizierungsprüfung bestehen können. Sonst gaben wir Ihnen eine Rückerstattung.

Google Associate Google Workspace Administrator Associate-Google-Workspace-Administrator Prüfungsfragen mit Lösungen (Q62-Q67):

62. Frage

Your organization collects credit card information in customer files. You need to implement a policy for your organization's Google Drive data that prevents the accidental sharing of files that contain credit card numbers with external users. You also need to record any sharing incidents for reporting. What should you do?

- A. Implement a third-party data loss prevention solution to integrate with Drive and provide advanced content detection capabilities.
- B. Enable Gmail content compliance, and create a rule to block email attachments containing credit card numbers from being sent to external recipients.
- C. Configure a data retention policy to automatically delete files containing credit card numbers after a specified period.
- **D. Create a data loss prevention (DLP) rule that uses the predefined credit card number detector, sets the action to "block external sharing", and enables the "Log event" option.**

Antwort: D

Begründung:

A data loss prevention (DLP) rule with the predefined credit card number detector will help you identify and prevent the accidental sharing of files that contain sensitive credit card information. Setting the action to "block external sharing" ensures that such files cannot be shared externally. Enabling the "Log event" option will record any incidents of external sharing for auditing and reporting purposes, fulfilling both the security and reporting requirements.

63. Frage

External sharing at your company is only permitted for the sales and marketing department. Engineering is not allowed to share externally. You need to configure the sharing settings to comply with this policy. What should you do?

- A. Create separate shared drives for each department with different external sharing settings.
- B. Use a data loss prevention (DLP) solution to control external sharing based on user groups.
- C. Configure Drive trust rules to restrict the engineering department from sharing externally.
- **D. Create organizational units (OUs) for each department. Configure different external sharing settings for each OU.**

Antwort: D

Begründung:

By creating separate organizational units (OUs) for each department, you can apply different external sharing settings based on the department's requirements. For example, you can configure the sales and marketing department's OU to allow external sharing, while configuring the engineering department's OU to restrict external sharing. This approach allows you to enforce departmental policies efficiently without impacting other departments.

64. Frage

You need to grant a specific set of users in your company access to YouTube, and you want to restrict their access to Merchant Center. What should you do?

- A. Enable YouTube for all users in the company. Individually restrict access to Merchant Center for specific Groups or organizational units (OUs).
- B. Contact Google Support and request that they enable YouTube access for the specific set of users and restrict their access to Merchant Center.
- **C. Enable access to YouTube at the Group or organizational unit (OU) level for the subset of users. Disable access to Merchant Center.**
- D. Create YouTube and Merchant Center as custom web apps. Apply access policies at the Group or organizational unit (OU) level.

Antwort: C

Begründung:

By enabling YouTube access at the Group or organizational unit (OU) level, you can target a specific set of users, allowing them to access YouTube. Simultaneously, you can disable access to Merchant Center for those same users, ensuring they can access YouTube but not Merchant Center. This approach uses Google Workspace's built-in capabilities to manage access based on user groups or organizational units.

65. Frage

Several employees from your finance department are collaborating on a long-term, multi-phase project. You need to create a confidential group for this project as quickly as possible. You also want to minimize management overhead. What should you do?

- A. Create a Google Group and update the settings to allow anyone in the organization to join the group.
- B. Create a Google Group and appoint a group admin to manage the membership of this group.
- C. Create a Google Group by using Google Cloud Directory Sync (GCDS) to automatically sync the members.
- **D. Create a dynamic group and define the Department user attribute as a condition for membership with the value as the finance department.**

Antwort: D

Begründung:

A dynamic group automatically updates membership based on user attributes, such as department, ensuring that only relevant employees (e.g., those in the finance department) are added to the group. This minimizes management overhead because the membership is updated automatically, without the need for manual intervention. It also ensures that the group remains up to date as employees join or leave the department.

66. Frage

Your company is transitioning to Google Workspace from legacy communication and collaboration applications. User accounts are managed in Active Directory and synced to Google Workspace by using Google Cloud Directory Sync (GCDS). Your company is implementing a new security policy for all accounts that requires complex passwords. Passwords must be at least 20 characters long, contain 3 symbols, 4 numbers, and 2 capital letters.

You need to enforce the new password policy in Google Workspace. What should you do?

- A. Create a password policy in Active Directory. Install Password Sync on the global catalog servers for Active Directory and require a password change for your users.
- B. Enable strong password enforcement and require a minimum length of 20 characters at the top-level organizational unit.

- C. Share the instructions for changing a Google account password with your users. Monitor password strength in the Google Admin console as users change their passwords.
- **D. Create a password policy in Active Directory. Enable password synchronization in GCDS.**

Antwort: D

Begründung:

Since user accounts are managed in Active Directory (AD) and synced to Google Workspace via Google Cloud Directory Sync (GCDS), the best approach to enforce the new password policy is to create the password policy within Active Directory and then enable password synchronization in GCDS. This ensures that the complex password requirements are enforced within AD, and when passwords are updated, they will be synchronized with Google Workspace, maintaining consistency across both systems.

67. Frage
